*Judging Credentials* Doris Marie Provine,1986 Must judges be trained as lawyers in order to be effective in office or can nonlawyers serve equally well This question has long provoked controversy among lawyers judges legislators and the public In her empirical study of the place of the nonlawyer judge in the American legal system Doris Marie Provine concludes that despite the opposition of the legal profession to nonlawyer judges they are as competent as lawyers in carrying out judicial duties in courts of limited jurisdiction Provine presents a persuasive argument that the case against nonlawyer judges has been weighted in favor of the professional interests of lawyers not public concerns Her examination reveals as much about the presuppositions of legal professionals as it does about the competency of nonlawyer judges to old judicial office To substantiate her claims Provine has conducted the most comprehensive survey of nonlawyer and lawyer judges yet undertaken augmenting this material with court observations and extensive interviews of judges She integrates the results of this survey into the historical context of the lay versus lawyer judge debate showing how the legally trained judge came to predominate in the American judicial system and analyzing in detail the campaign both in and out of the courts to make legal training a prerequisite for being a judge Ultimately Provine

suggests Americans are too committed to the significance of credentials and to the legal profession's vision of the judicial process to respond very favorably to nonlawyer judges however well they might perform Judging Credentials will force lawyers judges scholars and the public to reconsider the role nonlawyer judges play in the American judicial system Provine's provocative views and exhaustive research adds new dimensions to our understanding of the ethics of professionalism and its consequences

RULES OF PROFESSIONAL CONDUCT FOR LAWYERS Survival Ebooks **The Judicial System and Reform in**

**Post-Mao China** Yuwen Li, 2016-03-03 This comprehensive study examines the development and changing characteristics of the judicial system and reform process over the past three decades in China. As the role of courts in society has increased so too has the amount of public complaints about the judiciary. At the same time political control over the judiciary has retained its tight grip. The shortcomings of the contemporary system such as institutional deficiencies, shocking cases of injustice and cases of serious judicial corruption are deemed quite appalling by an international audience. Using a combination of traditional modes of legal analysis, case studies and empirical research, this study reflects upon the complex progress that China has made and continues to make towards the modernisation of its judicial system. Li offers a better understanding on how the judicial system has transformed and what challenges lay ahead for further enhancement. This book is unique in providing both the breadth of coverage and yet the substantive details of the most fundamental as well as controversial subjects concerning the operation of the courts in China. **Researching the European Court of Justice** Mikael Rask

Madsen, Fernanda Nicola, Antoine Vauchez, 2022-05-26 The book takes stock of the on-going methodological turn in the field of EU law scholarship. Introducing a new generation of scholars of the European Court of Justice from law, history, sociology, political science and linguistics, it provides a set of novel interdisciplinary research strategies and empirical materials for the study of the Court of Justice of the European Union. The twelve case studies included challenge the usual top-down approach to EU law and the CJEU and instead suggest a more localized and fine-grained observation of the socio-legal actors and practices involved in the making of CJEU case law. Moving beyond mainstream legal scholarship and the established grand narratives of legal integration, the volume provides a more historically informed and sociologically grounded account of the EU law's uneven embeddedness in Europe's economies and societies.
