Religion Aging An Annotated Bibliography:

Religion [and] Aging Vicent John Fecher, 1982 **Religion & Aging** Vincent John Fecher, 1982 *Research on Religion and Aging* Harold G. Koenig, 1995-03-18 This first systematic guide to the latest research about religion and aging focuses on the linkage between religion and health outcomes in people over 55 who will represent one third of America's population by the year 2025. A short introduction points to the rapidly growing literature since 1980; the conclusion offers a brief synthesis of the varied basic and applied studies on the subject and suggests a useful model to consider applying. Nearly 300 entries with concise and comprehensive annotations are organized under four main subjects: religious beliefs, behaviors, and experience; relationships between religion and health; practical applications of research findings; and measuring religiosity and spirituality. Arranged under numerous additional sub-topics and with author and subject indexes, the guide is accessible and designed for varied use by students, teachers, researchers, policymakers, practitioners, and professionals in the fields of sociology and social work, psychology and psychiatry, and medicine and health. Researchers, educators, and policymakers will find this book invaluable in identifying research and application studies and in evaluating their quality and methodology. Arranged under additional sub-topics by populations in many situations with varied problems in terms of concerns relating to mental and physical health and with applications in different fields and with author and subject indexes, the guide is accessible and designed for varied use by students, teachers, practitioners, and professionals in the fields of sociology and social work, psychology and psychiatry, and medicine and health. Religion and Aging Southwestern Baptist Theological Seminary. School of Religious Education, 1988 **Methods in Religion, Spirituality & Aging** James W. Ellor, 2013-10-18 Since the 1971 White House Conference on Aging in the United States, the need to move from religiosity into new areas such as Spiritual Assessment and Spirituality has emerged. This movement has picked up momentum among scholars, particularly in terms of research in the area of Spirituality. While spirituality as a term is employed in many new studies, this term continues to defy the quest for a single definition and method. This book is divided into three sections. In the first, the authors reflect on the philosophical and theological issues presented by these terms from a variety of both cognate and practical methodological approaches. The second section offers insights from the major professions of sociology, psychology, public health, nursing, and social work. The final section offers insight and assistance to researchers and authors on specific religious traditions. This book will be important for anyone working to develop such practical tools as spiritual assessment forms for those who engage in more formal scholarly investigation. **The Encyclopedia of Aging** Linda S.
