Theologische Revue, 1990 **The Logic of Incarnation** Neal DeRoos, Brian Lightbody, 2009-01-01 With his *Logic of Incarnation* James K A Smith has provided a compelling critique of the universalizing tendencies in some strands of postmodern philosophy of religion A truly postmodern account of religion must take seriously the preference for particularity first evidenced in the Christian account of the incarnation of God Moving beyond the urge to universalize which characterizes modern thought Smith argues that it is only by taking seriously particular differences historical religious and doctrinal that we can be authentically religious and authentically postmodern Smith remains hugely influential in both academic discourse and church movements This book is the first organized attempt to bring both of these aspects of Smith's work into conversation with each other and with him With articles from an internationally respected group of philosophers theologians pastors and laypeople the entire range of Smith's considerable influence is represented here Discussing questions of embodiment eschatology inter religious dialogue dogma and difference this book opens all the most relevant issues in postmodern religious life to a unique and penetrating critique **After the Death of God** John D. Caputo, Gianni Vattimo, 2007 In these original essays and interviews leading hermeneutical philosophers and postmodern theorists John D Caputo and Gianni Vattimo engage with each other's past and present work on the subject and reflect on our modern transition from secularism to post secularism *After God* Mark C. Taylor, 2007-10-15 With fundamentalists dominating the headlines and scientists arguing about the biological and neurological basis of faith religion is the topic of the day But religion Mark C Taylor shows is more complicated than either its defenders or critics think and indeed is much more influential than any of us realize Our world Taylor maintains is shaped by religion even when it is least obvious Faith and value he insists are unavoidable and inextricably interrelated for believers and nonbelievers alike Using scientific theories of dynamical systems and complex adaptive networks for cultural and theological analysis *After God* redefines religion for our contemporary age Taylor begins by asking a critical question What is religion He then proceeds to explain how Protestant ideas in particular undergird the character and structure of our global information society the Reformation Taylor argues was an information and communications revolution that effectively prepared the way for the media revolution at the end of the twentieth century Taylor's breathtaking account of religious ideas allows us to understand for the first time that contemporary notions of atheism and the secular are already implicit in classical Christology and Trinitarian theology Weaving together theoretical analysis and historical interpretation Taylor demonstrates the codependence and coevolution of traditional religious beliefs and practices with modern literature art architecture information technologies media financial markets and theoretical biology *After God* concludes with prescriptions for new ways of thinking and acting If we are to negotiate the perils of the twenty first century Taylor contends we must refigure the symbolic networks that inform our policies and guide our actions A religion without God creates the possibility of an ethics without absolutes that leads to the promotion of creativity and life in an ever more fragile world Publisher description *Religion in Late Modernity* Inger
