Roma Barocca The History Of An Architectonic Culture:

Roma Barocca Paolo Portoghesi, 1970 *Roma Barocca* comprises a complete history of building activity in Rome from about 1600 to 1750 But it acquires a far broader interest because of the critical method which it applies to one of the key periods and centers in the history of architecture and urbanism The discussion includes a broad summary of the urban policies and building programs of the popes as well as an analytic history of the artistic culture of Rome as documented by the theoretical writings and architectural publications of the period Against this historical background the basic formal principles and compositional methods of the Baroque are verified through critical and technical analyses of the monuments themselves In this way the author is able to define those great themes which held the attention of the artistic world in the complex period known as Baroque the themes of infinity of the relativity of perceptions of the popular and vernacular artistic expression and the communicative force of art of history conceived as a continual development of technology as a factor of independence and autonomous authority for the arts and the theme of nature interpreted as a dynamic process The three great masters Bernini Borromini and Cortona are treated in individual chapters The dynamic eruption of creative energy manifest in the works of these architects whose contributions comprised the revolutionary use of light the unification of all the arts and above all the ability on both the architectonic and urban scales to operate directly on space is here analyzed with penetrating perspective But the lesser architects who worked contemporaneously with the masters are also fully discussed Architects of the generation following that of the masters such as Carlo Rainaldi and Carlo Fontana are studied critically in light of the rich legacy to which they fell heir and which they seriously undermined through their essentially regressive and conservative positions An integral part of the author's analyses are the many fascinating detailed photographs in great part executed by the author himself The illustrative analytical material is still further enriched by drawings inserted in the text or contained in the drawing appendix

Roma Barocca Paolo Portoghesi, 1970 **The Baroque in Architectural Culture, 1880-1980** Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical

and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Ssu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of The Oxford Dictionary of Architecture has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader

Architectural Temperance Victor Deupi, 2015-03-05 Architectural Temperance examines relations between Bourbon Spain and papal Rome 1700 1759 through the lens of cultural politics With a focus on key Spanish architects sent to study in Rome by the Bourbon Kings the book also discusses the establishment of a program of architectural education at the newly founded Real Academia de Bellas Artes de San Fernando in Madrid Victor Deupi explores why a powerful nation like Spain would temper its own building traditions with the more cosmopolitan trends associated with Rome often at the expense of its own national and regional traditions Through the inclusion of previously unpublished documents and images that shed light on the theoretical debates which shaped eighteenth century architecture in Rome and Madrid Architectural Temperance provides readers with new insights into the cultural history of early modern Spain

Understanding Architecture Leland M. Roth, 2018-03-13 This widely acclaimed beautifully illustrated survey of Western architecture is now fully revised throughout including essays on non Western traditions The expanded book vividly examines the structure function history and meaning of architecture in ways that are both accessible and engaging

Rome from the Ground Up James H. S. McGregor, 2006-10-31 Rome is not one city but many each with its own history

unfolding from a different center now the trading port on the Tiber now the Forum of antiquity the Palatine of imperial power the Lateran Church of Christian ascendancy the Vatican the Quirinal palace Beginning with the very shaping of the ground on which Rome first rose this book conjures all these cities past and present conducting the reader through time and space to the complex and shifting realities architectural historical political and social that constitute Rome A multifaceted historical portrait this richly illustrated work is as gritty as it is gorgeous immersing readers in the practical world of each period James McGregor's explorations afford the pleasures of a novel thick with characters and plot twists amid the life struggles hopes and failures of countless generations we see how things truly worked then and now we learn about the materials of which Rome was built of the Tiber and its bridges of roads aqueducts and sewers and always of power especially the power to shape the city and imprint it with a particular personality like that of Nero or Trajan or Pope Sixtus V or a particular institution McGregor traces the successive urban forms that rulers have imposed from emperors and popes to national governments including Mussolini's And in archaeologists and museums presentation of Rome's past he shows that the documenting of history itself is fraught with power and politics In McGregor's own beautifully written account the power and politics emerge clearly manifest in the distinctive styles and structures practical concerns and aesthetic interests that constitute the myriad Romes of our day and days past

Madama Raphael's late masterwork of architecture landscape and decoration for the Medici popes is a paradigm of the Renaissance villa. The creation of this important unfinished complex provides a remarkable case study for the nature of architectural invention. Drawing on little known poetry describing the villa while it was on the drawing board as well as ground plans, letters and antiquities once installed there, Yvonne Elet reveals the design process to have been a dynamic collaborative effort involving humanists as well as architects. She explores design as a self-reflexive process and the dialectic of text and architectural form illuminating the relation of word and image in Renaissance architectural practice. Her revisionist account of architectural design as a process engaging different systems of knowledge visual and verbal has important implications for the relation of architecture and language meaning in architecture and the translation of idea into form.

The Routledge History Handbook of Gender and the Urban Experience Deborah Simonton, 2017-02-03
Challenging current perspectives of urbanisation, *The Routledge History Handbook of Gender and the Urban Experience* explores how our towns and cities have shaped and been shaped by cultural spatial and gendered influences. This volume discusses gender in an urban context in European, North American and colonial towns from the fourteenth to the twentieth century, casting new light on the development of medieval and modern settlements across the globe. Organised into six thematic parts covering economy, space, civic identity, material culture, emotions and the colonial world, this book comprises 36 chapters by key scholars in the field. It covers a wide range of topics from women and citizenship in medieval York to gender and tradition in nineteenth and twentieth century South African cities, reframing our understanding of the role of gender in constructing the spaces and places that form our urban environment. Interdisciplinary and transnational in scope, this volume analyses the individual dynamics of each case study while also examining the complex relationships and exchanges between urban cultures. It is a valuable resource for all researchers and students interested in gender, urban history and their intersection and interaction throughout the past five centuries.
