**Materiality in Roman Art and Architecture** Annette Haug,Adrian Hielscher,M. Taylor Lauritsen,2021-12-31 The focus of this volume is on the aesthetics semantics and function of materials in Roman antiquity between the 2nd century B C and the 2nd century A D It includes contributions on both architectural spaces and their material design and objects types of artefacts that differ greatly in the way they were used perceived and loaded with cultural significance With respect to architecture the analysis of material aesthetics leads to a new understanding of the performance imitation and transformation of surfaces including the social meaning of such strategies In the case of objects surface treatments are equally important However object form a specific design category which can enter into tension with materiality comes into particular focus Only when materials are shaped do

their various qualities emerge and these qualities are to a greater or lesser extent transferred to objects. With a focus primarily on Roman Italy, the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world.

**Roman Architecture** Rogan Fish, Roman architecture emerged as a distinctive style that blended elements from earlier civilizations, primarily Greek and Etruscan influences. As Rome expanded from a small settlement into a powerful empire, its architectural identity evolved, incorporating new techniques and materials that allowed for grander and more functional structures. The early foundations of Roman architecture set the stage for innovations that would shape the empire's urban landscape for centuries. One of the most significant influences on Roman architecture came from the Etruscans, a civilization that dominated central Italy before Rome's rise. The Etruscans were skilled builders who introduced techniques such as the use of the arch and vault, both of which would later become hallmarks of Roman engineering. Etruscan temples, with their high podiums and deep porches, also served as models for early Roman religious structures. Another major influence was Greek architecture, which Romans admired and adapted to suit their needs. The Greeks provided inspiration in the use of columns, decorative friezes, and symmetrical design elements that were later integrated into Roman temples, public buildings, and monuments. Roman architectural development was also shaped by advancements in building materials and construction techniques. The early Romans initially built using wood and mudbrick, but as they refined their skills, they transitioned to more durable materials like stone and concrete. The introduction of concrete was a groundbreaking innovation, allowing for stronger and more flexible structures. Unlike the Greeks, who relied heavily on marble, the Romans preferred concrete for its affordability and adaptability, enabling them to construct larger and more complex buildings, such as amphitheaters, aqueducts, and domes.

**A Companion to Roman Architecture** Roger B. Ulrich, Caroline K. Quenemoen, 2013-10-10. *A Companion to Roman Architecture* presents a comprehensive review of the critical issues and approaches that have transformed scholarly understanding in recent decades in one easy-to-reference volume. **The Building Program of Herod the Great** Duane W. Roller, 1998. Herod the Great, King of Judaea from 44 B.C., is known as one of the world's great villains. This notoriety has overshadowed his actual achievements, particularly his role as a client king of Rome during Augustus's reign as emperor. An essential aspect of Herod's responsibilities as king of Judaea was his role as a builder. Remarkably innovative, he created an astonishing record of architectural achievement, not only in Judaea but also throughout Greece and the Roman east. Duane W. Roller systematically presents and discusses all the building projects known to have been initiated by Herod and locates this material in a broad historical and cultural context. Bringing together previously inaccessible material, Roller enriches our

understanding of the enigmatic Herod and provides new insights into Roman architecture Herod was instrumental in the diffusion of the Augustan architectural revolution into the provinces and was the first to build outside Italy such Italian architectural forms as the basilica amphitheater villa and Italian temple Herod's legacy provided a groundwork for the architectural Romanization of the east influencing the construction of the great temple complexes and palaces so familiar from later Roman architecture Herod like Augustus himself was not only interested in architecture but also in diplomatic and financial contacts among cities of the region In addition to providing a repertorium of the building projects this study is also an exploration of international relations in the eastern Mediterranean at the beginning of the Roman imperial period **The**

*Public Needs and Private Pleasures* Rabun M. Taylor, 2000 A meticulously detailed investigation of Rome's practical solution to the problems of providing and distributing the city's water supply between the end of the Republic and Trajan's reign Taylor's principal aims are to determine where and why aqueduct systems crossed the Tiber and to assess the function of the enigmatic Aqua Alsietia An initial discussion of the technical and legal context for aqueduct planning is followed by a topographical inquiry into several specific aqueducts including the four earliest aqueduct river crossings the Aqua Appia Anio Velus Aqua Marcia and the Aqua Virgo Taylor also examines the expansion and organisation of water supply within the Transiberim a heavily populated district of Rome to the west of the Tiber and assesses its influence on Rome's wider urban policy

**The Genesis of Roman Architecture** John North Hopkins, 2016-02-09 This groundbreaking study traces the development of Roman architecture and its sculpture from the earliest days to the middle of the 5th century BCE Existing narratives cast the Greeks as the progenitors of classical art and architecture or rely on historical sources dating centuries after the fact to establish the Roman context Author John North Hopkins however allows the material and visual record to play the primary role in telling the story of Rome's origins synthesizing important new evidence from recent excavations Hopkins's detailed account of urban growth and artistic political and social exchange establishes strong parallels with communities across the Mediterranean From the late 7th century Romans looked to increasingly distant lands for shifts in artistic production By the end of the archaic period they were building temples that would outstrip the monumentality of even those on the Greek mainland The book's extensive illustrations feature new reconstructions allowing readers a rare visual exploration of this fragmentary evidence

*The Oxford Handbook of Engineering and Technology in the Classical World* John Peter Oleson, 2008-01-31 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to the topics of engineering and technology This volume highlights both the accomplishments of the ancient societies and the remaining research problems and stimulates further progress in the history of ancient technology The subject matter of the book is the technological framework of the Greek and Roman cultures from ca 800 B C through ca A D 500 in the circum

Mediterranean world and Northern Europe Each chapter discusses a technology or family of technologies from an analytical rather than descriptive point of view providing a critical summation of our present knowledge of the Greek and Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period Each presentation reviews the issues and recent contributions and defines the capacities and accomplishments of the technology in the context of the society that used it the available technological shelf and the resources consumed These studies introduce and synthesize the results of excavation or specialized studies The chapters are organized in sections progressing from sources written and representational to primary e g mining metallurgy agriculture and secondary e g woodworking glass production food preparation textile production and leather working production to technologies of social organization and interaction e g roads bridges ships harbors warfare and fortification and finally to studies of general social issues e g writing timekeeping measurement scientific instruments attitudes toward technology and innovation and the relevance of ethnographic methods to the study of classical technology The unrivalled breadth and depth of this volume make it the definitive reference work for students and academics across the spectrum of classical studies     Roman Architecture and Urbanism Fikret K. Yegül, Diane G. Favro, 2019 With 835 illustrations including numerous new plans and drawings as well as digital renderings     Rome: Continuing Encounters between Past and Present Dorigen Caldwell, 2016-12-05 Few other cities can compare with Rome's history of continuous habitation nor with the survival of so many different epochs in its present This volume explores how the city's past has shaped the way in which Rome has been built rebuilt represented and imagined throughout its history Bringing together scholars from the disciplines of architectural history urban studies art history archaeology and film studies this book comprises a series of studies on the evolution of the city of Rome and the ways in which it has represented and reconfigured itself from the medieval period to the present day Moving from material appropriations such as spolia in the medieval period through the cartographic representations of the city in the early modern period to filmic representation in the twentieth century we encounter very different ways of making sense of the past across Rome's historical spectrum The broad chronological arrangement of the chapters and the choice of themes and urban locations examined in each allows the reader to draw comparisons between historical periods An imaginative approach to the study of the urban and architectural make up of Rome this volume will be valuable not only for historians of art and architecture but also for students of cultural history and film studies     **Anchoring Science and Technology in Greco-Roman Antiquity** , 2024-12-19 This collection of essays explores processes of innovation in Greco-Roman technology and science It uses the concept of anchoring to investigate the microhistories of technological and scientific practices and ideas The volume combines broad theoretical essays with more targeted case studies of individual inventions and innovations In doing so it moves beyond the emphasis on achievement that has traditionally characterized modern scholarship on ancient technology and science Instead the chapters of this volume analyse the manifold ways in which new technologies and ideas

were anchored in what was already known and familiar and highlight how once familiar technologies and ideas could themselves become anchoring points for inventions and innovations      *The World of Ancient Rome* James W.
