## **Roman Law Contemporary Law European Law The Civilian Tradition Today:**

**Roman Law, Contemporary Law, European Law**, 2001 This book examines the relationships between common and civil law and using the example of Germany shows how legal historiography can enable us to understand the variation between the civil practice of different countries *The New European Private Law:Vol. 3:Essays on the Future of Private Law in Europe* Martijn Hesselink,2002-10-16 In *The New European Private Law* Martijn W Hesselink presents a revised and supplemented collection of essays written over the last five years on European private law He argues that the creation of a common private law in Europe is not merely a matter of rediscovering the old *ius commune* or of neutrally establishing the present common core which may be codified in a European Civil Code Rather it is a matter of making choices some of which may be highly controversial In this book he discusses some of the most important choices which will have to be made with regard to culture principles politics models rights concepts and structure in the new European private law *European Legal History* Randall Lesaffer,2009-06-25 This historical introduction to the civil law tradition considers the political and cultural context of Europe's legal history from its Roman roots Political diplomatic and constitutional developments are discussed and the impacts of major cultural movements such as scholasticism humanism the Enlightenment and Romanticism on law and jurisprudence are highlighted **European Contract Law** Hector MacQueen,2019-08-05 This volume tests the claim that as combinations of Civil and Common Law influences the mixed systems of contract law in Scotland and South Africa have anticipated the content of the Principles of European Contract Law PECL concluded and published in 2003 by the unofficial Commission on European Contract Law Going further it rigorously explores what the implications of a Europe wide contract law would be The current official moves towards a European contract law within the European Union make the critiques of PECL in this volume especially urgent and significant With a European contract law nearer to reality than ever before mere policy critiques are no longer enough This book provides the essential technical and substantive assessments of PECL from the perspective of Scots and South African contract lawyers and is offered to the European debate without prejudice as to the deeper policy questions At the same time this volume will inform Scots and South African lawyers about the substance of international developments in the field and suggest ways to develop their still vigorous and vital national laws to remain in step with the needs of the present day **A Global View of Business Insolvency Systems** Jay Lawrence Westbrook,2010 We live in an age of economic turmoil The recent crises emphasize the need for modern sophisticated rules to govern businesses in financial distress in order to realize value from distressed companies and to protect economic institutions This book provides information for legislators policymakers lawyers accountants academics and administrators who seek to understand the workings of insolvency laws Guided by the World Bank's Principles and Guidelines it supplements the work in this field done by UNCITRAL Unjustified Enrichment David Johnston,Reinhard Zimmermann,2005-01-28 Unjustified enrichment has been one of the most intellectually vital areas of private law There is

however still no unanimity among civil law and common law legal systems about how to structure this important branch of the law of obligations Several key issues are considered comparatively in this 2002 book including grounds for recovery of enrichment defences third party enrichment as well as proprietary and taxonomic questions Two contributors deal with each topic one a representative of a common law system the other a representative of a civil law or mixed system This approach illuminates not just similarities or differences between systems but also what different systems can learn from one another In an area of law whose territory is still partially uncharted and whose borders are contested such comparative perspectives will be valuable for both academic analysis of the law and its development by the courts

**Judicial Deliberations** Mitchell de S.-O.-L'E. Lasser, 2009 Judicial Deliberations compares how and why the European Court of Justice the French Cour de cassation and the US Supreme Court offer different approaches for generating judicial accountability and control judicial debate and deliberation and ultimately judicial legitimacy Examining the judicial argumentation of the United States Supreme Court and of the French Cour de cassation the book first reorders the traditional comparative understanding of the difference between French civil law and American common law judicial decision making It then uses this analysis to offer the first detailed comparative examination of the interpretive practice of the European Court of Justice Lasser demonstrates that the French judicial system rests on a particularly unified institutional and ideological framework founded on explicitly republican notions of meritocracy and managerial expertise Law making per se may be limited to the legislature but significant judicial normative administration is entrusted to State selected trained and sanctioned elites who are policed internally through hierarchical institutional structures The American judicial system by contrast deploys a more participatory and democratic approach that reflects a more populist vision Shunning the unifying controlling and hierarchical French structures the American judicial system instead generates its legitimacy primarily by argumentative means American judges engage in extensive debates that subject them to public scrutiny and control The ECJ hovers delicately between the institutional argumentative and republican democratic extremes On the one hand the ECJ reproduces the hierarchical French discursive structure on which it was originally patterned On the other it transposes this structure into a transnational context of fractured political and legal assumptions This drives the ECJ towards generating legitimacy by adopting a somewhat more transparent argumentative approach

*The Struggle for European Private Law* Leone Niglia, 2015-03-26 The European codification project has rapidly gathered pace since the turn of the century This monograph considers the codification project in light of a series of broader analytical frameworks comparative historical and constitutional which make modern codification phenomena intelligible This new reading across fields renders the European codification project currently being promoted through the Common Frame of Reference and the Optional Sales Law Code proposal vulnerable to constitutionally grounded criticism traceable to normative considerations of private law authority and legitimacy Arguing that modern codification phenomena are more complex than positivist socio legal and historical approaches have suggested over the past two centuries the book stages a pathbreaking method of analysis of the law discourse nomos centred which questions at once the reduction of private law to legislation and of law to power and on this basis redefines the ways in which to counter law's disintegration and crisis in the context of Europeanisation Professor Niglia reconstructs the European codification project as a complex structure of government in the making that embodies a set of contingent world views excludes alternatives challenges the plurality of private laws and entrenches conflicts that pertain not only to form codification de codification recodification but also to dilemmas implicated in determining the substantive orientation of European private law The book investigates the position of the codifiers and their discontents in the shadow of the codification strategy pursued by the European Commission noting a new turn in the struggle over the configuration of private law which has taken place since the Savigny Thibaut dispute of 1814 which this book critically revisits exactly two centuries later This monograph is particularly aimed at readers interested in exploring the complexities and interconnections of the supposedly separate realms of comparative law European law private law legal history constitutional law sociology of law and last but not least legal theory and jurisprudence

European law including both civil law and common law has gone through several major phases of expansion in the world. European legal history thus also is a history of legal transplants and cultural borrowings which national legal histories as products of nineteenth century historicism have until recently largely left unconsidered. The Handbook of European Legal History supplies its readers with an overview of the different phases of European legal history in the light of today's state of the art research by offering cutting edge views on research questions currently emerging in international discussions. The Handbook takes a broad approach to its subject matter both nationally and systemically. Unlike traditional European legal histories which tend to concentrate on heartlands of Europe notably Italy and Germany the Europe of the Handbook is more versatile and nuanced taking into consideration the legal developments in Europe's geographical fringes such as Scandinavia and Eastern Europe. The Handbook covers all major time periods from the ancient Greek law to the twenty first century. Contributors include acknowledged leaders in the field as well as rising talents representing a wide range of legal systems methodologies areas of expertise and research agendas.     *EU Internet Law in the Digital Era* Tatiana-Eleni Synodinou, Philippe Jougoux, Christiana Markou, Thalia Prastitou, 2019-10-18. The text includes translations of relevant French and German codal material and references to relevant cases from all of the jurisdictions. This new edition includes constitutional changes in France and the United Kingdom in particular the new procedure for challenging existing legislation before the Conseil constitutionnel. It examines the consequences of the Lisbon Treaty as well as other recent codal and legislative changes. Comprehensive and topical the text explores a wide variety of new case law on issues such as preventive detention the use of evidence obtained by torture the balance between suppression of terrorism and personal
