Romantic Stability Using Polarity To Tra:

The Major Victorian Poets: Reconsiderations (Routledge Revivals) Isobel Armstrong, 2013-06-17 First published in 1969 this edition collection brings together a series of essays offering a re evaluation of Victorian poetry in the light of early 20th Century criticism The essays in this collection concentrate upon the poets whose reputations suffered from the great redirection of energy in English criticism initiated in this century by Eliot Richards and Leavis What theses poets wrote about the values they expressed the form of the poems the language they used all these were examined and found wanting in some radical way One of the results of this criticism was the renewal of interest in metaphysical and eighteenth century poetry and corresponding ebb of enthusiasm for Romantic poetry and for Victorian poetry in particular Most of the essays in this book take as their starting point questions raised by the debate on Victorian poetry both earlier in this century and in the more recent past There are essays on the poetry of Tennyson Browning and Arnold on that of Clough who until recently has been neglected and Hopkins because of rather than in spite of the fact that he is usually considered to be a modern poet The volume is especially valuable in that it will give a clearer understanding of the nature of Victorian poetry concentrating as it does on those areas of a poet's work where critical discussion seems most necessary In the Shadow of Christ Derek Joseph Wiertel, 2025-05-29 In the Shadow of Christ presents a fresh theological interpretation of nature's violent and suffering character as determined by God's self interpretation in Jesus Christ Grounded in the rich spiritual tradition of premodern natural theology Wiertel retrieves a figural reading of nature that interprets the entire span of created existence through Scripture's symbolic landscape This restored vision of the two books rooted in God's creative and redemptive word establishes an interpretive framework that sees all of creation its beauty its strangeness and its tragedies through the creative dynamics of God's revelatory speech In this essay Wiertel critically embraces scriptural figuration with its profoundly Christocentric metaphysical orientation to offer a rich theological vision of creational suffering By engaging Scripture and the natural world figurally and in critical dialogue with contemporary philosophy ethics and biology Wiertel unfolds an expansive theological narrative He maps creation's suffering within the mystery of Jesus Christ inviting readers to see all of natural history as a divine gift ordered toward its eschatological transformation **The Acquisition of Italian** Adriana Belletti, Maria Teresa Guasti, 2015-07-15 A major contribution to the study of language acquisition and language development inspired by theoretical linguistics has been made by research on the acquisition of Italian syntax This book offers an updated overview of results from theory driven experimental and corpus based research on the acquisition of Italian in different modes monolingual early and late L2 SLI etc as well as exploring possible developments for future research The book focuses on experimental studies which address research questions generated by linguistic theory providing a detailed illustration of the fruitful interaction between linguistic theorizing and developmental studies The authors are leading figures in theoretical linguistics and language acquisition their own work is featured in the research presented here Students and
