Germania was one of the most important and complex zones of cultural interaction and conflict between Rome and neighbouring societies A vast region it became divided into urbanised provinces with elaborate military frontiers and the northern part of the continental Barbaricum Recent decades have seen a major effort by German archaeologists ancient historians epigraphers numismatists and other specialists to explore the Roman era in their own territory with rich and often surprising new knowledge This Handbook aims to make the results of this great effort of modern German and overwhelmingly German language scholarship more widely available to Anglophone scholarship on the empire Archaeology and ancient history are international enterprises characterised by specific national scholarly traditions this is notably true of the study of Roman era Germania This volume comprises a collection of essays in English by leading scholars working in Germany presenting the latest developments in current research as well as situating their work within wider international scholarship through a series of critical responses from other very different national perspectives In doing so this book aims to reveal the riches of the archaeology of Roman Germany promote the achievements of German scholars in the area and help facilitate continued English and German language discourses on the Roman era **National Union Catalog**, 1973 Includes entries for maps and atlases **Empires and Barbarians** Peter Heather, 2010-03-04

Empires and Barbarians presents a fresh provocative look at how a recognizable Europe came into being in the first millennium AD With sharp analytic insight Peter Heather explores the dynamics of migration and social and economic interaction that changed two vastly different worlds the undeveloped barbarian world and the sophisticated Roman Empire into remarkably similar societies and states The book s vivid narrative begins at the time of Christ when the Mediterranean circle newly united under the Romans hosted a politically sophisticated economically advanced and culturally developed civilization one with philosophy banking professional armies literature stunning architecture even garbage collection The rest of Europe meanwhile was home to subsistence farmers living in small groups dominated largely by Germanic speakers Although having some iron tools and weapons these mostly illiterate peoples worked mainly in wood and never built in stone The farther east one went the simpler it became fewer iron tools and ever less productive economies And yet ten centuries later from the

Atlantic to the Urals the European world had turned Slavic speakers had largely superseded Germanic speakers in central and Eastern Europe literacy was growing Christianity had spread and most fundamentally Mediterranean supremacy was broken Bringing the whole of first millennium European history together and challenging current arguments that migration played but a tiny role in this unfolding narrative Empires and Barbarians views the destruction of the ancient world order in light of modern migration and globalization patterns ARCHAEOLOGY AND THE MEDIA Timothy Clack, 2007 The public's fascination with archaeology has meant that archaeologists have had to deal with media more regularly than other scholarly disciplines In this volume a group of archaeologists address a wide range of questions in this intersection of fields **The Publishers Weekly**, 1975 **The Horn Book Magazine** Bertha E. Mahony, Bertha E. Mahony Miller, 1945 Vol 2 includes extra number Experimental schools in England Jan 1926 **Rome and the Barbarians** Barry W. Cunliffe, 1975 Describes what the work of archaeologists has revealed about the Roman armies and the barbarians from Northern Europe whom they fought in the period of approximately 150 B C to 150 A D *Publishers Weekly*, 1975 **International Who's Who of Authors and Writers 2004** Europa Publications, 2003 Accurate and reliable biographical information essential to anyone interested in the world of literature The International Who's Who of Authors and Writers offers invaluable information on the personalities and organizations of the literary world including many up and coming writers as well as established names With over 8 000 entries this updated edition features Concise biographical information on novelists authors playwrights columnists journalists editors and critics Biographical details of established writers as well as those who have recently risen to prominence Entries detailing career works published literary awards and prizes membership and contact addresses where available An extensive listing of major international literary awards and prizes and winners of those prizes A directory of major literary organizations and literary agents A listing of members of the American Academy of Arts and Letters
