**The University Desk Encyclopedia** Sequoia, 1977 *The American Catalogue ... July 1, 1876-Dec. 31, 1910*, 1908

**The American Catalogue**, 1908 American national trade bibliography The History and Future of Technology Robert U. Ayres, 2021-07-27 Eminent physicist and economist Robert Ayres examines the history of technology as a change agent in society focusing on societal roots rather than technology as an autonomous self-perpetuating phenomenon With rare exceptions technology is developed in response to societal needs that have evolutionary roots and causes In our genus Homo language evolved in response to a need for our ancestors to communicate both in the moment and to posterity A band of hunters had no chance in competition with predators that were larger and faster without this type of organization which eventually gave birth to writing and music The steam engine did not leap fully formed from the brain of James Watt It evolved from a need to pump water out of coal mines driven by a need to burn coal instead of firewood in turn due to deforestation Later the steam engine made machines and mechanization possible Even quite simple machines increased human productivity by a factor of hundreds if not thousands That was the Industrial Revolution If we count electricity and the automobile as a second industrial revolution and the digital computer as the beginning of a third the world is now on the cusp of a fourth revolution led by microbiology These industrial revolutions have benefited many in the short term but devastated the Earth's ecosystems Can technology save the human race from the catastrophic consequences of its past success That is the question this book will try to answer **Religious Warfare in Europe 1400-1536** Norman Housley, 2008-11-06 Religious warfare has been a recurrent feature of European history In this intelligent and readable study the distinguished Crusade historian Norman Housley describes and analyses the principal expressions of holy war in the

period from the Hussite wars to the first generation of the Reformation The context was one of both challenge and expansion The Ottoman Turks posed an unprecedented external threat to the Christian republic while doctrinal dissent constant warfare between states and rebellion eroded it from within Professor Housley shows how in these circumstances the propensity to sanctify warfare took radically different forms At times warfare between national communities was shaped by convictions of sacred patriotism either in defending God given native land or in the pursuit of messianic programmes abroad Insurrectionary activity especially when driven by apocalyptic expectations was a second important type of religious war In the 1420s and early 1430s the Hussites waged war successfully in defence of what they believed to be God s Law And some frontier communities depicted their struggle against non believers as religious war by reference to crusading ideas and habits of thought Professor Housley pinpoints what these conflicts had in common in the ways the combatants perceived their own role their demonization of their opponents and the ongoing critique of religious war in all its forms This is a major contribution to both Crusade history and the study of the Wars of Religion of the early modern period Professor Housley explores the interaction between Crusade and religious war in the broader sense and argues that the religious violence of the sixteenth and seventeenth centuries was organic in the sense that it sprang from deeply rooted proclivities within European society
