Rome's Eastern Trade Gary K. Young, 2003-10-04 Utilising new archaeological research the author questions the traditionally held view that the imperial government had a strong political interest in eastern trade Instead he argues that their primary motivation was the tax income The Roman Empire at Bay, AD 180-395 David S. Potter, 2004-07-31 Skilfully weaving together cultural intellectual and political history this detailed survey of two critical and eventful centuries travels the course of imperial decline A striking achievement of historical synthesis with a compelling interpretative line **The Oxford Handbook of Roman Egypt** Christina Riggs, 2012-06-21 This handbook arranged in seven thematic sections is unique in drawing together many different strands of research on Roman Egypt in order to suggest both the state of knowledge in the field and the possibilities for collaborative synthetic and interpretive research **A Companion to the Archaeology of the Roman Empire, 2 Volume Set** Barbara Burrell, 2024-03-13 A one of a kind exploration of archaeological evidence from the Roman Empire between 44 BCE and 337 CE In A Companion to the Archaeology of the Roman Empire distinguished scholar and archaeologist Professor Barbara Burrell delivers an illuminating and wide ranging discussion of peoples institutions and their material remains across the Roman Empire Divided into two parts the book begins by focusing on the unifying factors institutions and processes that affected the entire empire This ends with a chapter by Professor Greg Woolf Ronald J Mellor Professor of Ancient History at UCLA which summarizes and enlarges upon the themes and contributions of the volume Meanwhile the second part brings out local patterns and peculiarities within the archaeological remains of the City of Rome as well as almost every province of its empire Each chapter is written by a noted scholar whose career has focused on the subject Chronological coverage for each chapter is formally 44 BCE to 337 CE but since material remains are not always so closely datable most chapters center on the first three centuries of the Common Era plus or minus 50 years In addition the book is amply illustrated and includes new and little known finds from oft ignored provinces Readers will also find A thorough introduction to the peoples and operations of the Roman Empire including not just how the center affected the periphery Romanization but how peripheral provinces operated on their own and among their neighbors Comprehensive explorations of local patterns within individual provinces Contributions from a diverse panel of leading scholars in the field A unique form of organization that brings out systems across the empire such as transport across sea rivers and roads monetary systems pottery and foodways the military construction and technology Perfect for graduate and advanced undergraduate students of archaeology and the history of the Roman Empire A Companion to the Archaeology of the Roman Empire will also earn a place in the libraries of professional archaeologists in other fields including Mayanists medievalists and Far Eastern scholars seeking comparanda and bibliography on other imperial structures Trade, Commerce, and the State in the Roman World Andrew Wilson, Alan Bowman, 2017-11-03 This volume presents eighteen papers by leading Roman historians and archaeologists discussing trade in the Roman Empire during the

period c 100 BC to AD 350 It focuses especially on the role of the Roman state in shaping the institutional framework for trade within and outside the empire in taxing that trade and in intervening in the markets to ensure the supply of particular commodities especially for the city of Rome and for the army As part of a novel interdisciplinary approach to the subject the chapters address its myriad facets on the basis of broadly different sources of evidence historical papyrological and archaeological They are grouped into three sections covering institutional factors taxation legal structures market regulation financial institutions evidence for long distance trade within the empire in wood stone glass and pottery and trade beyond the frontiers with the east as far as China India Arabia the Red Sea and the Sahara Rome's external trade with realms to the east emerges as being of particular significance but it is in the eastern part of the empire itself where the state appears to have adapted the mechanisms of taxation in collaboration with the elite holders of wealth to support its need for revenue On the other hand the price of that collaboration which was in effect a fiscal partnership ultimately led in the longer term in slightly different forms in the east and the west to a fundamental change in the political character of the empire

Wortham,2016-04-22 Terra Australis the southern land was one of the most widespread concepts in European geography from the sixteenth to the eighteenth centuries although the notion of a land mass in the southern seas had been prevalent since classical antiquity Despite this fact there has been relatively little sustained scholarly work on European concepts of Terra Australis or the intellectual background to European voyages of discovery and exploration to Australia in the eighteenth and nineteenth centuries Through interdisciplinary scholarly contributions ranging across history the visual arts literature and popular culture this volume considers the continuities and discontinuities between the imagined space of Terra

Australis and its subsequent manifestation It will shed new light on familiar texts people and events such as the Dutch and French explorations of Australia the Batavia shipwreck and the Baudin expedition by setting them in unexpected contexts and alongside unfamiliar texts and people The book will be of interest to among others intellectual and cultural historians literary scholars historians of cartography the visual arts women s and post colonial studies *Sri Lanka at the Crossroads of History* Zoltán Biedermann, Alan Strathern, 2017-06-07 The peoples of Sri Lanka have participated in far flung trading networks religious formations and Asian and European empires for millennia This interdisciplinary volume sets out to draw Sri Lanka into the field of Asian and Global History by showing how the latest wave of scholarship has explored the island as a crossroads a place defined by its openness to movement across the Indian Ocean Experts in the history archaeology literature and art of the island from c 500 BCE to c 1850 CE use Lankan material to explore a number of pressing scholarly debates They address these matters from their varied disciplinary perspectives and diverse array of sources critically assessing concepts such as ethnicity cosmopolitanism and localisation and elucidating the subtle ways in which the foreign may be resisted and embraced at the same time The individual chapters and the volume as a whole are a welcome addition to the history and historiography of Sri Lanka as well as studies of the Indian Ocean region kingship colonialism imperialism and early modernity *Roman Berytus* Linda Jones Hall, 2004-06-01 Examining the numerous primary sources including inscriptions religions histories literary references legal codes and archaeological reports Linda Jones Hall presents a composite history of late antique Berytus from its founding as a Roman colony in the time of Augustus to its development into a center of legal study under Justinian The book examines all aspects of life in the city including geographical setting economic base built environment political structures religious transitions from paganism to Christianity and the self identity of the inhabitants in terms of ethnicity and occupation This volume provides the first detailed investigation of late antique Phoenicia a look at religious affiliations are traced among pagans Jews and Christians a study of the bishops and the churches The full texts of numerous narratives are presented to reveal the aspirations of the law students the professors and their fellow citizens such as the artisans The study also explores the cultural implications of the city s Greek Roman and then Syro Phoenician heritage *The Silk Road in World History* Xinru Liu, 2010-07-09 The Silk Road was the contemporary name for a complex of ancient trade routes linking East Asia with Central Asia South Asia and the Mediterranean world This network of exchange emerged along the borders between agricultural China and the steppe nomads during the Han Dynasty 206BCE 220CE in consequence of the inter dependence and the conflicts of these two distinctive societies In their quest for horses fragrances spices gems glassware and other exotics from the lands to their west the Han Empire extended its dominion over the oases around the Takla Makan Desert and sent silk all the way to the Mediterranean either through the land routes leading to the caravan city of Palmyra in Syria desert or by way of northwest India the Arabian Sea and the Red Sea landing at Alexandria The Silk Road survived the turmoil of the demise of the Han and Roman Empires reached its

golden age during the early middle age when the Byzantine Empire and the Tang Empire became centers of silk culture and established the models for high culture of the Eurasian world The coming of Islam extended silk culture to an even larger area and paved the way for an expanded market for textiles and other commodities By the 11th century however the Silk Road was in decline because of intense competition from the sea routes of the Indian Ocean Using supply and demand as the framework for analyzing the formation and development of the Silk Road the book examines the dynamics of the interactions of the nomadic pastoralists with sedentary agriculturalists and the spread of new ideas religions and values into the world of commerce thus illustrating the cultural forces underlying material transactions This effort at tracing the interconnections of the diverse participants in the transcontinental Silk Road exchange will demonstrate that the world had been linked through economic and ideological forces long before the modern era

Roman Law and Economics Giuseppe

Dari-Mattiacci,Dennis P. Kehoe,2020-05-26 Ancient Rome is the only society in the history of the western world whose legal profession evolved autonomously distinct and separate from institutions of political and religious power Roman legal thought has left behind an enduring legacy and exerted enormous influence on the shaping of modern legal frameworks and systems but its own genesis and context pose their own explanatory problems The economic analysis of Roman law has enormous untapped potential in this regard by exploring the intersecting perspectives of legal history economic history and the economic analysis of law the two volumes of Roman Law and Economics are able to offer a uniquely interdisciplinary examination of the origins of Roman legal institutions their functions and their evolution over a period of more than 1000 years in response to changes in the underlying economic activities that those institutions regulated Volume I explores these legal institutions and organizations in detail from the constitution of the Roman Republic to the management of business in the Empire while Volume II covers the concepts of exchange ownership and disputes analysing the detailed workings of credit property and slavery among others Throughout each volume contributions from specialists in legal and economic history law and legal theory are underpinned by rigorous analysis drawing on modern empirical and theoretical techniques and methodologies borrowed from economics In demonstrating how these can be fruitfully applied to the study of ancient societies with due deference to the historical context Roman Law and Economics opens up a host of new avenues of research for scholars and students in each of these fields and in the social sciences more broadly offering new ways in which different modes of enquiry can connect with and inform each other

Rome and Persia in Late Antiquity Beate Dignas, Engelbert Winter, 2007-09-13 A narrative history with sourcebook of the turbulent relations between Rome and the Sasanian Empire

Rome and China Walter Scheidel, 2009-02-05 Transcending ethnic linguistic and religious boundaries early empires shaped thousands of years of world history Yet despite the global prominence of empire individual cases are often studied in isolation This series seeks to change the terms of the debate by promoting cross cultural comparative and transdisciplinary perspectives on imperial state formation prior to the European colonial expansion Two thousand years ago up to one half of the human species was contained within two political systems the Roman empire in western Eurasia centered on the Mediterranean Sea and the Han empire in eastern Eurasia centered on the great North China Plain Both empires were broadly comparable in terms of size and population and even largely coextensive in chronological terms 221 BCE to 220 CE for the Qin Han empire c 200 BCE to 395 CE for the unified Roman empire At the most basic level of resolution the circumstances of their creation are not very different In the East the Shang and Western Zhou periods created a shared cultural framework for the Warring States with the gradual consolidation of numerous small polities into a handful of large kingdoms which were finally united by the westernmost marcher state of Qin In the Mediterranean we can observe comparable political fragmentation and gradual expansion of a unifying civilization Greek in this case followed by the gradual formation of a handful of major warring states the Hellenistic kingdoms in the east Rome Italy Syracuse and Carthage in the west and likewise eventual unification by the westernmost marcher state the Roman led Italian confederation Subsequent destabilization occurred again in strikingly similar ways both empires came to be divided into two halves one that contained the original core but was more exposed to the main barbarian periphery the west in the Roman case the north in China and a traditionalist half in the east Rome and south China These processes of initial convergence and subsequent divergence in Eurasian state formation have never been the object of systematic comparative analysis This volume which brings together

experts in the history of the ancient Mediterranean and early China makes a first step in this direction by presenting a series of comparative case studies on clearly defined aspects of state formation in early eastern and western Eurasia focusing on the process of initial developmental convergence. It includes a general introduction that makes the case for a comparative approach, a broad sketch of the character of state formation in western and eastern Eurasia during the final millennium of antiquity, and six thematically connected case studies of particularly salient aspects of this process. *The Oxford Handbook of Palmyra* Rubina Raja, 2024. With contributions from thirty archaeologists, epigraphists, historians, and philologists, this book covers Palmyra's archaeological remains and history from its earliest phases in the pre-Roman era to the destruction of many of its monuments during the Syrian Civil War and subsequent looting. The authors give comprehensive overviews of already published evidence as well as significant new findings and analyses from fieldwork and cover a broad range of themes which not only relate to the archaeology and history of the site but also to its relationship with the rest of the ancient world as a major trade hub during the Roman period. *Land Transport in Roman Egypt* Colin E. P. Adams, 2007-03-15. Publisher description: Lettered Christians Lincoln Blumell, 2012-03-02. With the discovery of the Oxyrhynchus Papyri just over a century ago, a number of important texts directly relating to ancient Christianity have come to light. While certain literary texts have received considerable attention in scholarship, by comparison the documentary evidence relating to Christianity has received far less attention and remains rather obscure. To help redress this imbalance and to lend some context to the Christian literary materials, this book examines the extant Christian epistolary remains from Oxyrhynchus between the third and seventh centuries CE. Drawing upon this unique corpus of evidence which until this point has never been collectively nor systematically treated, this book breaks new ground as it employs the letters to consider various questions relating to Christianity in the Oxyrhynchite. Not only does this lucid study fill a void in scholarship, it also gives a number of insights that have larger implications on Christianity in late antiquity.
