Throughout its many subgenres biological horror cosmic horror and others and formats film literature comics horror records humanity's uneasy relationship with its own ability to reason understand and learn. The text first outlines a loose framework defining several distinct periods in horror development then explores each period sequentially by looking at the scientific and cultural background of the period its expression in horror literature and its expression in horror visual and performing arts.

Tribbe, 2014-06-06 During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register. Such was the zeitgeist in the year of the moon. Yet this holy trinity of 1960s America would quickly fall apart. Although Jesus and John F. Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing. Why did support for the space program decrease so sharply by the early 1970s? Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources. To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti-rationalism arose throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that Apollo embodied. Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to do with
