Roof Of Voyaging:

The Roof of Voyaging Garry Kilworth, 2011-09-29 When Kupe one of the great Polynesian voyagers chases a huge octopus across the ocean he discovers the strange and mysterious Land of Mists and rescues a man and a woman from the wild sea. He carries them back to the island of Raiatea where the pale strangers witness the momentous events that follow the death of the king and the struggle for succession. But the gods are watching also and when Prince Tangiia and his followers secretly flee the island in search of a new home their intervention becomes inevitable. Delighting in the rich and colourful detail and myth of Polynesian life *The Roof of Voyaging* is the first part of a wonderful tale which will become a landmark in fantastic fiction.

Roof of Voyaging Hb Book Club Garry Kilworth, 1996-09-24 Pacific Ethnomathematics Nicholas J. Goetzfridt, 2007-09-20 This ground breaking bibliography by distinguished Pacific researcher Nicholas Goetzfridt examines mathematical concepts and practices in Polynesia, Melanesia and Micronesia. It covers number systems, counting, measuring, classifying, spatial relationships, symmetry, geometry and other aspects of ethnomathematics in relation to a wide range of activities such as trade, education, navigation, construction, rituals and festivals, divination, weaving, tattooing and music. In compiling nearly five hundred citations, Goetzfridt makes use of the vast resources of writing about the Pacific from the 1700s to the present. In addition to discussing Pacific knowledge systems in general, his introductory chapter includes a helpful overview of the relatively new field of ethnomathematics and important theoretical reflections on the discipline as a research program. Extensive subject and geographic indexes provide numerous ways to experience the rich heritage and history of Pacific ethnomathematical concepts covered in this book, including the 256 possible knotted fates enabled by the Carolinian sky god Supwunumen, etak segmentation concepts in stellar based voyaging, the highly diverse counting systems of Papua New Guinea, the alignment of stone structures with stars to mark the appearance of the equinox and solstice and contemporary educational issues in the standardized teaching of Western mathematics.

The Lost Art of Finding Our Way John Edward Huth, 2013-05-15 Long before GPS, Google Earth and global transit, humans traveled vast distances using only environmental clues and simple instruments. John Huth asks what is lost when modern technology substitutes for our innate capacity to find our way. Encyclopedic in breadth, weaving together astronomy, meteorology, oceanography and ethnography, *The Lost Art of Finding Our Way* puts us in the shoes of ships and sleds of early navigators for whom paying close attention to the environment around them was quite literally a matter of life and

death Haunted by the fate of two young kayakers lost in a fog bank off Nantucket Huth shows us how to navigate using natural phenomena the way the Vikings used the sunstone to detect polarization of sunlight and Arab traders learned to sail into the wind and Pacific Islanders used underwater lightning and read waves to guide their explorations Huth reminds us that we are all navigators capable of learning techniques ranging from the simplest to the most sophisticated skills of direction finding Even today careful observation of the sun and moon tides and ocean currents weather and atmospheric effects can be all we need to find our way Lavishly illustrated with nearly 200 specially prepared drawings Huth's compelling account of the cultures of navigation will engross readers in a narrative that is part scientific treatise part personal travelogue and part vivid re creation of navigational history Seeing through the eyes of past voyagers we bring our own world into sharper view *An Anthology of Gilbertese Oral Tradition* Honor C.
