Rooftop Rocket Party:

The Rooftop Rocket Party Roland Chambers,2003-03-04 A boy with a passion for rockets heads to New York and discovers to his amazement and delight that the water tanks adorning the city's rooftops are really rocket ships and that the Man in the Moon is giving a birthday party A quirky delightful text and distinctive illustrations make this a notable picture book debut

A to Zoo Rebecca L. Thomas,2018-06-21 Whether used for thematic story times program and curriculum planning readers advisory or collection development this updated edition of the well known companion makes finding the right picture books for your library a breeze Generations of savvy librarians and educators have relied on this detailed subject guide to children's picture books for all aspects of children's services and this new edition does not disappoint Covering more than 18 000 books published through 2017 it empowers users to identify current and classic titles on topics ranging from apples to zebras Organized simply with a subject guide that categorizes subjects by theme and topic and subject headings arranged alphabetically this reference applies more than 1 200 intuitive as opposed to formal catalog subject terms to children's picture books making it both a comprehensive and user friendly resource that is accessible to parents and teachers as well as librarians It can be used to identify titles to fill in gaps in library collections to find books on particular topics for young readers to help teachers locate titles to support lessons or to design thematic programs and story times Title and illustrator indexes in addition to a bibliographic guide arranged alphabetically by author name further extend access to titles

Picture-Book Professors Melissa Terras,2018-10-31 How is academia portrayed in children's literature This Element ambitiously surveys fictional professors in texts marketed towards children who are overwhelmingly white and male tending to be elderly scientists Professors fall into three stereotypes the vehicle to explain scientific facts the baffled genius and the evil madman By the late twentieth century the stereotype of the male mad muddlehead called Professor SomethingDumb is formed in humorous yet pejorative fashion This Element provides a publishing history of the role of academics in children's literature questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media This title is also available with additional material as Open Access

Launch Something! Myung-hoon Bae,2022-10-17 Earth is experiencing a sweltering heatwave caused by a second sun a shining object in the sky that either

looks like Pac Man or a pizza missing a slice depending on who you ask As this object increases in size and risks making Earth uninhabitable the Korean government decides it has to do its part and help the US led Allied Space Force Launch Something is a sci fi novel about a Korean Space Force that contains his quirky brand of political satire Gatsby's Party Patti White,1992 Information based theories and sets up a theory of relations as a critical methodology to widen the field of approaches to narrative dynamics *Thrown a Curve* Kate McMurray,2015-06-19 The Rainbow League Book Two Mason made headlines when after his professional baseball career was sidelined by an injury he very publicly came out of the closet Now he s scratching the baseball itch playing in the Rainbow League while making his way through New York s population of beefcakes even though they all come up short Plus he s still thinking about last summer s encounter with hot effeminate pierced and tattooed Patrick pretty much the opposite of the sort of man he has long pictured himself with Patrick hasn t been able to forget Mason either and now that baseball season is back upon them he s determined to have him again Mason is unlike any man Patrick has ever been with before and not just because he s an ex Yankee All Patrick has to do is convince a reluctant Mason that their one night wasn t just a crazy fluke and that they could be great together if only Mason could get past his old hang ups and his intolerant family **Rocket Dreams** Christian Davenport,2025-09-16 Musk versus Bezos China versus the United States The government versus the private sector Welcome to the rivalries and alliances defining the New Space Age At stake Billions of dollars national prestige and a place in the history books Moon landings and space walks once captivated the public s attention But in recent decades the U S space enterprise has felt moribund Now that s finally about to change A fleet of powerful new rockets is poised to take humans into the cosmos more than ever before A lunar land rush has sparked a geopolitical competition among nations And the world s two richest men have engaged in escalating brinkmanship as NASA and the U S government embraces Silicon Valley innovation to jump start the nation s ambitions Space has entered a golden age and this is just the beginning In this gripping work award winning Washington Post writer Christian Davenport chronicles the mad scramble to shape humanity s off planet future He takes readers behind the scenes at NASA and the Pentagon as China s aggressive moon mining plans raise alarms onto the sprawling Cape Canaveral factory where Blue Origin is working toward Amazon style lunar deliveries and onto SpaceX launch pads as Musk s engineers log 100 hour weeks leaving veteran astronauts marveling that they re now operating flying iPhones What will happen as human ambition outpaces governmental regulation Which country will win the race back to the moon Was Donald Trump s much derided creation of the Space Force a surprising act of foresight and will the U S finally make a real push to the moon and eventually toward Mars Masterfully paced rigorously reported and vividly told *Rocket Dreams* offers a riveting fly on the wall account of the grit fueled global battle to push humankind further into the cosmos revealing that the science fiction dreams of the last century may soon become our reality School Library Journal ,2003 *The British National Bibliography* Arthur James Wells,2003 Childrens' Catalog H.W. Wilson Company,2005 The 1st ed includes an index to v 28 36 of St

Nicholas *The Life of the Party* Christopher Ames, 2010-08-01 Critics have long recognized the links between community festivals and literary art The comedies and tragedies of the ancient Greeks grew out of their festivals Anglo Saxon poetry was often read at festival occasions and the structural patterns of renaissance drama are inseparable from their festive origins In *The Life of the Party* Christopher Ames argues that the private party has become the festival of modern culture and has served as a shaping force in the fiction of many important twentieth century writers Drawing upon and extending theories of Mikhail Bakhtin and others Ames contends that parties have inherited much of the spirit and social function of festivals and carnivals In these controlled transgressions ordinary rules of behavior are set aside for a short time permitting excess and including usually in veiled form a ritual encounter with death as well as a cathartic return to the normal social order when the party ends In the experimental fiction of James Joyce and Virginia Woolf the mingling of many voices at the party challenges both social and narrative decorum For F Scott Fitzgerald Evelyn Waugh and Henry Green the party becomes a microcosm of a decadent society and informs a festive vision characteristic of the literature that emerged between the wars And in postmodern works by Thomas Pynchon and Robert Coover the novelists celebrate the disruptive and liberating force of parties even as they illustrate the dangers of chaos through scenes of the party gone wild With its creative application of literary theory and ethnographic studies of festival *The Life of the Party* demonstrates the persistence of the festive vision and its significance in the evolution of modern fiction

Beyond the Saga of Rocket Science Walter Sierra, 2016-12-19 *Beyond the Saga of Rocket Science* is a series of four closely related books that provide an amply illustrated overarching perspective to a broad nontechnical audience of the entire panorama surrounding the development of rockets missiles and space vehicles as we know them today and what the exciting future holds The books are sequential and form an integrated whole *The Dawn of the Space Age* *Avoiding Armageddon* *In Space To Stay* *The Never Ending Frontier* *The Dawn of the Space Age* begins with exciting tales of the earliest developers of rudimentary rockets and the deadly battles they fought in China between 228 and 1600 A D A historical fiction approach brings long ago characters and events to life Palace intrigues treachery and warmongering are interwoven with vivid depictions of courage and bravery to showcase the gradual progression of the science of rocketry from fireworks displays to effective weapons in the battlefield Readers in the West will learn something about the Eastern mindset where over half the world's population lives today The tremendous achievements of the Wright Brothers Wilbur and Orville in the early 1900s serve as a useful backdrop for showcasing the difficulties in developing completely new technologies for practical use The Wright Brothers had to go abroad to France before World War I to garner enough support and funding to mature airplane science to the point that the U S Army took notice Building on the Wrights successes Ludwig Prandtl in Germany and Theodore von Kármán in the United States made pioneering developments in aerodynamics which are crucial to rocket flight The invention of the airplane inspired early innovators in the 1920s 1930s to lay the foundation for the giant aerospace conglomerates of today including William Boeing Boeing Company Allan

Loughead and Glenn Martin Lockheed Martin Jack Northrop and Leroy Grumman Northrop Grumman James McDonnell and Donald Douglas McDonnellDouglas These stalwarts were very foresighted and willing to take calculated risks The ingenious Dr Robert Goddard inventor of the modern rocket developed a sound theory and conducted pioneering flight tests in the 1920s 1930s while overcoming many failures However Goddards rockets were not taken seriously enough in the United States to enable the development of practical missiles and launch vehicles But Germany sure took notice World War II gave the biggest impetus ever to advancing rocket science and related technologies The Nazi war machine funded Dr Wernher von Braun and his cohorts to develop rocketdriven weapons such as the V1 and V2 which killed thousands during World War II Fortunately for America von Braun and key members of his team decided to seek asylum in the United States when the war ended Now the country took up the engineering of rockets in earnest Von Braun went on to lead the American space program during the crucial decades of the 1950s 1960s He did more to advance missiles rockets spaceflight and enable manned landings on the moon than anybody else in America Six astronauts flew solo on six Project Mercury flights 1961-1963 Three of them joined another 13 astronauts to orbit Earth on 10 twoperson Project Gemini flights 1965-1966 Without a single failure The Soviet Union captured their fair share of German rocketeers including the influential Helmut Grttrup They learned everything possible from the German expatriates Then they cast the Germans aside and undertook rocket and missile development using indigenous experts like Sergei Korolyov and Valentin Glushko Like von Braun Korolyov was ingenious in his own right and led the development of Soviet rocket science until his untimely death in January 1966 Engineers and scientists are todays unsung heroes They work in the shadows without any public acclaim or recognition yet the technologies they develop touch every facet of our daily lives □□□□□□,2006 *Blood Clot* Jake Scott,2009-01-19 As you know blood clot means blood cells coming together to form a strong clot that forms and sticks together to keep the wound sealed enabling it to repair The Parachute Regiment s blood clot acts the same whether downtown scrapping or in some far away country fighting alongside each other Our maroon berets come together they stick together they close ranks forming the blood clot and fight against anything that comes their way Jake Scott When the 3 Para battle group departed for Helmand Province south Afghanistan nobody really knew what to expect Within a month of being on the ground the first of many contacts between the Taliban and British forces began The British government and media were in shock for the men on the ground it was what they were trained for As weeks went on the fighting increased Resources and manning were poor but for the Paras it was too late it was back to basics living in holes in the ground in 60 degree temperatures often in small numbers and under constant attack from the Taliban It looked as if it was going to be a long six months Blood Clot is a personal account of the Parachute Regiment s ferocious tour of duty in Helmand Province Afghanistan 2006 by a man who was involved in the thick of the action Born in 1981 Jake Scott joined the Parachute Regiment aged 17 and had already seen service around the world including Iraq before becoming part of a small reconnaissance team trained to operate behind

enemy lines known as the Patrols Jake and his mates probed escorted and fought their way in and around some of the most dangerous areas in the whole of the Middle East virgin Taliban country After intense fighting against the odds leaving dead Taliban soldiers in their wake and encountering some very near misses themselves the Patrols platoon eventually ended their tour of duty This is their story the very beginning of the Afghan troubles in the south the build up and lack of support and equipment in the initial stages the close and dangerous fighting the boredom of the open desert and the uncontrollable sadness of friends killed and injured around them The Paras and their battle group arrived in small numbers in Helmand in 2006 They set the example for others to follow for many years to come the aggressiveness of the airborne soldier when it was called for fighting the Taliban on their turf up close and personal
