Industry Association at Multiple Levels of Governance Aynsley Kellow, Marian Simms, 2021-12-14 Many books on interest groups study how they conduct themselves in politics and rather take for granted their existence Unusually this book examines the reasons why for many years there was no global level group representing the mining and non ferrous metals industry and how the sector found a basis for association at the turn of the millennium in response to the globalisation of environmental policy and the emerging focus on sustainable development The associated reconfiguration of competences at the national and state levels in Australia is also shown to have had important consequences for sector associability at those levels In short it examines the changing associability of a business sector at what Theodore Lowi described as three levels of governance macro meso and micro The book draws on interviews with key participants and extensive archival research
