Putting Intellectual Property in Its Place Laura J. Murray,S. Tina Piper,Kirsty Robertson,2014-03 Putting Intellectual Property in its Place examines the relationship between creativity and intellectual property law on the premise that despite concentrated critical attention devoted to IP law from academic policy and activist quarters its role as a determinant of creative activity is overstated The effects of IP rights or law are usually more unpredictable non linear or illusory than is often presumed Through a series of case studies focusing on nineteenth century journalism fake art plant hormone research between the wars online knitting communities creativity in small cities and legal practice the authors discuss the many ways people comprehend the law through information and opinions gathered from friends strangers coworkers and the media They also show how people choose to share create negotiate and dispute based on what seems fair just or necessary in the context of how their community functions in that moment while ignoring or reimagining legal mechanisms In this book authors Murray Piper and Robertson define the everyday life of IP law constituting an experiment in non normative legal scholarship and in building theory from material and located practice Democracy as Fetish Ralph Cintron,2019-12-10 Democracy has

long been fetishized. Consequently how we speak about democracy and what we expect from democratic governance are at odds with practice. With unflinching resolve this book probes the theory of democracy and how the left and right are fascinated by it. In this innovative multidisciplinary study Ralph Cintron provides sustained analysis of our political discourse. He shows not only how the rhetoric of democracy produces strong desires for social order, global wealth and justice but also how these desires cannot be satisfied. Throughout his discussion Cintron includes ethnographic research from fieldwork conducted over the course of twenty years in the Latino neighborhoods of Chicago where he observes both citizens and the undocumented looking to democracy to fulfill their highest aspirations. Politicians hand out favors to the elite developers, strong arm aldermen and the disenfranchised have little redress. The problem Cintron argues is that the conditions required to put democracy into practice, territory, a bordered nation state, citizens, property are constituted by inequality and violence because there is no inclusivity that does not also exclude. Drawing on ethnography, economics, political theory and rhetorical analysis Cintron makes his case with tremendous analytic rigor. This challenge to reassess the discourses on democracy and to consider democratic politics as always compromised by oligarchy will be of particular interest to political and rhetorical theorists.

Anthropocene Ecologies of Food Simon C. Estok, Susan Deborah, Rayson K. Alex, 2022-06-22. *Anthropocene Ecologies of Food* provides a detailed exploration of cross cultural aspects of food production, culinary practices and their ecological underpinning in culture. The authors draw connections between humans and the entire process of global food production focusing on the broad implications these processes have within the geographical and cultural context of India. Each chapter analyzes and critiques existing agricultural food practices and representations of aspects of food through various media such as film, literature and new media as they relate to global issues generally and Indian contexts specifically, correcting the omission of analyses focused on the Global South in virtually all of the work that has been done on Anthropocene ecologies of food. This unique volume employs an ecocritical framework that connects food with the land in physical and virtual communities and the book as a whole interrogates the meanings and implications of the Anthropocene itself.

Ethics and Sustainability in Digital Cultures Thomas Taro Lennerfors, Kiyoshi Murata, 2023-10-09. Digital technologies now ubiquitous around the world can promote positive values as well as support those that are less socially acceptable. To better understand such technologies' impact on ethics and sustainability this book situates digital technologies within a cultural context, arguing that the technology is received differently in different cultural contexts. The book contains chapters on state of the art digital technologies such as artificial intelligence from various countries including Japan and Sweden to highlight the multifarious ways in how ethical and sustainability issues are being manifested in certain cultural contexts. The book contributes to furthering understandings on the similarities and differences between digital technology implementations in different cultures, promoting a cross cultural dialogue on desired values and how they are promoted or downplayed by such technologies. The book is divided into two parts: the former focuses on how individuals relate to new

digital technologies and the latter focuses on those who develop digital technologies The book targets scholars businesspeople and policymakers interested in the interconnection between digital technologies ethics and sustainability from various cultural viewpoints It provides new case studies on a range of digital technologies and discussions about digital technology implementations in cultural contexts **Empowered Connections** Barrett Williams, ChatGPT, 2024-12-18
