The Deadly Ethnic Riot Donald L. Horowitz, 2023-11-15 Donald L Horowitz s comprehensive consideration of the structure and dynamics of ethnic violence is the first full scale comparative study of what the author terms the deadly ethnic riot an intense sudden lethal attack by civilian members of one ethnic group on civilian members of another ethnic group Serious frequent and destabilizing these events result in large numbers of casualties Horowitz examines approximately 150 such riots in about fifty countries mainly in Asia Africa and the former Soviet Union as well as fifty control cases With its deep and thorough scholarship incisive analysis and profound insights The Deadly Ethnic Riot will become the definitive work on its subject Furious and sadistic the riot is nevertheless directed against a precisely specified class of targets and conducted with considerable circumspection Horowitz scrutinizes target choices participants and organization the timing and supporting conditions for the violence the nature of the events that precede the riot the prevalence of atrocities during the violence the location and diffusion of riots and the aims and effects of riot behavior He finds that the deadly ethnic riot is a highly patterned but emotional event that tends to occur during times of political uncertainty He also discusses the crucial role of rumor in triggering riots the surprisingly limited role of deliberate organization and the striking lack of remorse exhibited by participants Horowitz writes clearly and eloquently without compromising the complexity of his subject With impressive analytical skill he takes up the important challenge of explaining phenomena that are at once passionate and calculative Donald L Horowitz s comprehensive consideration of the structure and dynamics of ethnic violence is the first full scale comparative study of what the author terms the deadly ethnic riot an intense sudden lethal attack by civilian members of one ethn

Confronting Genocide

René Provost, Payam Akhavan, 2010-11-11 Never again stands as one the central pledges of the international community following the end of the Second World War upon full realization of the massive scale of the Nazi extermination programme Genocide stands as an intolerable assault on a sense of common humanity embodied in the Universal Declaration of Human Rights and other fundamental international instruments including the Convention on the Prevention and Punishment of the Crime of Genocide and the United Nations Charter And yet since the Second World War the international community has proven incapable of effectively preventing the occurrence of more genocides in places like Cambodia Yugoslavia Rwanda and Sudan Is genocide actually preventable or is ever again a more accurate catchphrase to capture the reality of this phenomenon The essays in this volume explore the complex nature of genocide and the relative promise of various avenues identified by the international community to attempt to put a definitive end to its occurrence Essays focus on a conceptualization of genocide as a social and political phenomenon on the identification of key actors Governments international institutions the media civil society individuals and on an exploration of the relative promise of different means to prevent genocide criminal accountability civil disobedience shaming intervention Criminal Justice in Transition

Jonathan K. Crane And Jordi Agusti-Panareda R.P. Misra,2007 **Emotions in Conflict** Eran Halperin,2015-12-07 Social and political psychologists have attempted to reveal the reasons why individuals and societies that acknowledge that peace would improve their personal and collective well being and are aware of the required actions needed to promote it are simply incapable of making this step forward Some social psychologists have advocated the idea that certain societal beliefs and collective memories about the nature of the opponent the in group the history and the current state of the conflict distort the perceptions of society members and prevent them from identifying opportunities for peace But these cognitive barriers capture only part of the picture Could identifying the role of discrete emotions in conflicts and conflict resolution potentially provide a wide platform for developing pinpoint conflict resolution interventions Using a vast array of primary sources critical literature analysis and firsthand personal experiences in various conflict zones Middle East Cyprus Bosnia and Northern Ireland Eran Halperin introduces a new perspective on psychological barriers to peace Halperin focuses on various emotional mechanisms that hamper peace processes even when parties face real opportunities for conflict resolution More specifically he explores how hatred anger fear angst hope despair empathy guilt and shame combined with various emotion regulation strategies provide emotions based explanations for people s attitudinal and behavioral reactions to peace related events during the ongoing process of conflict resolution Written in a clear and accessible style *Emotions in Conflict* offers a thought provoking and pioneering insight into the role discrete intergroup emotions play in impeding as well as facilitating peace processes in intractable conflicts This book is essential reading for those who study intractable conflicts and their resolutions and those who are interested in the real world implication of recent theories and findings on emotion and emotion regulation **Building Sustainable Peace** Arnim Langer,Graham K. Brown,2016-06-16 Countries emerging from civil war or protracted violence often face the daunting challenge of rebuilding their economy while simultaneously creating the political and social conditions for a stable peace The implicit assumption in the international community that rapid political democratisation along with economic liberalisation holds the key to sustainable peace is belied by the experiences of countries such as Iraq and Afghanistan Often the challenges of post conflict reconstruction revolve around the timing and sequencing of different reform that may have contradictory implications Drawing on a range of thematic studies and empirical cases this book examines how post conflict reconstruction policies can be better sequenced in order to promote sustainable peace The book provides evidence that many reforms that are often thought to be imperative in post conflict societies may be better considered as long term objectives and that the immediate imperative for such societies should be people centred policies *Making History in Mugabe's Zimbabwe* Blessing-Miles Tendi,2010 The crisis that has engulfed Zimbabwe since 2000 is not simply a struggle against dictatorship It is also a struggle over ideas and deep seated historical issues still unresolved from the independence process that both Robert Mugabe s ZANU PF regime and Morgan Tsvangirai s MDC are vying first to define and then to address This book traces the role of politicians and public intellectuals in media

civil society and the academy in producing and disseminating a politically usable historical narrative concerning ideas about patriotism race land human rights and sovereignty It raises pressing questions about the role of contemporary African intellectuals in the making of democratic societies In so doing the book adds a new and rich dimension to the study of African politics which is often diluted by the neglect of ideas
