

Securing the Delivery of Energy Supplies to Europe

Monitoring the 1,850km Trans-Anatolian Natural Gas Pipeline

With combined experience and capacity, OptaSense and Optilan collaborate to deliver the optimal solution for TANAP.

Running from Azerbaijan to Europe, the Trans-Anatolian Natural Gas Pipeline (TANAP) will form a central part of the Southern Gas Corridor, connecting the giant Shah Deniz gas field to European markets. With TANAP scheduled for completion in 2018, the project is of major strategic importance for the region, enabling the first Azerbaijani gas exports into Europe while strengthening Turkey's role as a regional energy hub. Given its importance, it is vital the pipeline's security is assured at all times and at all points. Guaranteeing TANAP remains operational, without incident and disruption, is paramount.

Providing integrated leak detection and security monitoring

TANAP awarded a US\$35 million contract to OptaSense, working in partnership with international communications and security systems provider Optilan, to deliver the world's largest fiber distributed sensing project. Deploying unique Distributed Acoustic Sensing (DAS) technology, OptaSense Fiber Optic Pipeline Monitoring will provide leak detection and security monitoring for more than 1,850km of pipeline, including perimeter security for all facilities.

TANAP solutions include pipeline leak detection, third party intrusion and other security functionality, all delivered via a single fiber-optic cable that "listens" to the pipeline to provide detailed data on its status. Changes feed to an interrogator unit in real time, enabling any issues or threats to be identified and addressed early to maintain the highest levels of pipeline integrity.

Delivering peace of mind

The system has provided the customer security and peace of mind. This is, by definition, revenue assurance. OptaSense has been involved with TANAP from its early stages to help ensure security is efficient and that the pipeline remains operational 365 days a year.

OptaSense is the trusted partner for DAS solutions worldwide, supporting customers in more than 50 countries and more than 30000km of assets under contract.

Background

- Trans-Anatolian Natural Gas Pipeline
- 1,850km of pipeline
- Running from Azerbaijan through Georgia and Turkey, to Europe

Solution

- OptaSense Fiber Optic Pipeline Monitoring
 - Leak Detection
 - Security Monitoring
 - Third-Party Intrusion
 - Right of Way
 - Perimeter Security for in-line facilities

Value Delivered

- A single pipeline monitoring solution that delivers multiple detector applications using a single fiber:
 - Four mode leak detection (temperature, acoustics, ground strain and pressure)
 - External interference and damage prevention monitoring
 - Lower installation costs
 - Real-time, 24/7 peace of mind and security

Johansson,Anand Prabhakar Patwardhan,Nebojša Nakićenović,Luis Gomez-Echeverri,2012-08-27 Independent scientifically based integrated policy relevant analysis of current and emerging energy issues for specialists and policymakers in academia industry government Energy Transitions in Latin America Lira

Luz Benites Lazaro, Esteban Serrani, 2023-09-30 This book comprehensively analyzes the challenges and opportunities associated with transitioning to sustainable energy systems in Latin America. Recognizing that energy transition goes beyond mere changes in energy systems, it is also essential to address the imperative of ensuring a just transition and equitable benefits for all, particularly for vulnerable populations. This recognition emphasizes prioritizing social equity and inclusivity throughout the energy transition process. By adopting a critical perspective grounded in multidisciplinary approaches from the social sciences, the book delves into the complex energy transition issues, exploring the broader social, economic, and political dimensions involved. The book is divided into four parts: Part I highlights the changing energy mix in Latin America and the geopolitical implications of the increasing reliance on renewable sources; Part II examines the dilemmas faced by countries that rely on oil and gas revenues and the obstacles they face in transitioning to a low carbon economy; Part III analyzes the production technology and costs as limits and opportunities for energy transition and adoption of renewable energies; Finally, part IV explores energy access and the democratization of energy generation in Latin America, including efforts to address energy poverty, the growth of distributed energy, and prosumers. *Energy Transitions in Latin America: The Tough Route to Sustainable Development* is a valuable resource that will benefit researchers in energy studies and policymakers alike. It serves as a comprehensive guide for those seeking to navigate the complexities of energy transitions. It is an essential source for fostering informed decision making and driving sustainable development in the region.
