Security Of China:

Human Security in China Chi Zhang, 2021-10-21 This book explores the emergent concept of human security within the political context of COVID 19 Chinese politics For decades Western nations have used human rights as a rubric with which to scold Chinese leaders betraying a fundamental unwillingness to accept diversity of governance systems As COVID 19 has demonstrated different governance systems yield different outcomes the freedom of circulation speech and movement in Western democracies yielding one and use of surveillance lockdowns and private public collaboration in China and Asian societies such as Korea and Singapore yielding another Chinese political scientists have become fixated on the notion of human security a utilitarian concept which insists on the importance of protecting and extending human life via health care technology and a wide range of other systems sometimes in ways which contradict Western notions of human rights even as they demonstrably achieve superior outcomes for the humans involved Being the first English language book to explore these issues this book aims to generate a sustained theoretical relevance in the aftermath of the crisis which is likely to have lasting effects on how people live and will be of note for political scientists China scholars and economists Rising Star Bates Gill, 2010-10-01 China's diplomatic strategy has changed dramatically since the mid 1990s creating both challenges and opportunities for other world powers Through a combination of pragmatic security policies growing economic clout and increasingly deft diplomacy China has established productive and increasingly solid relationships throughout Asia and around the globe Yet U S policymakers are still trying to comprehend these critical changes Rising Star provides a coherent framework for understanding China's new security diplomacy and guiding America's China policy Bates Gill has completely updated his original analysis focusing on Chinese policy in three areas regional security mechanisms nonproliferation and arms control and questions of sovereignty and intervention Looking to the future he offers specific recommendations for a balanced and realistic approach that emphasizes what China and the United States have in common rather than what divides them The main arguments and recommendations of the original book continue to hold true and in many respects are more compelling now than ever before given China's continued ascendancy *China's Challenges to Human Security* Guoguang Wu, 2012-11-27 This book looks at human security in China's foreign relations It discusses the concept and theory of human security and their implications for China The book goes on to analyse environmental security issues including climate change and water resources as well as looking at issues from an energy consumption perspective Significant human security issues are then focussed on including food safety pandemic disease control migration and the human rights implications of China's overseas investment Achieving Food Security in China Zhang-Yue Zhou, 2017-05-18 China's food security has never failed to attract the public's attention Feeding China's large population has always been a huge challenge The latest large scale famine took place in 1958-62 during which approximately 37 million people died of starvation However since the early 1980s China's food availability has improved drastically The important question is then has China achieved its food security

Although China's food availability has significantly improved it has not achieved a high level of food security due to the lack of progress in several other important dimensions of food security The book examines China's food security practices in the past six decades explores the root causes that led to food shortages or abundances and elaborates on the challenges that China has to deal with in order to improve its future food security China's quest for food security serves as a valuable lesson for many other countries to learn through China's experiences and to better manage their food security in the future The book also draws attention to the fact that China's food security status has a huge impact on the global community and hence global collaboration is a mutually beneficial approach

Security and Profit in China's Energy Policy Øystein

Tunsjø, 2013-11-19 China has developed sophisticated hedging strategies to insure against risks in the international petroleum market It has managed a growing net oil import gap and supply disruptions by maintaining a favorable energy mix pursuing overseas equity oil production building a state owned tanker fleet and strategic petroleum reserve establishing cross border pipelines and diversifying its energy resources and routes Though it cannot be secured China's energy security can be insured by marrying government concern with commercial initiatives This book comprehensively analyzes China's domestic global maritime and continental petroleum strategies and policies establishing a new theoretical framework that captures the interrelationship between security and profit Arguing that hedging is central to China's energy security policy this volume links government concerns about security of supply to energy companies search for profits and by drawing important distinctions between threats and risks peacetime and wartime contingencies and pipeline and seaborne energy supply routes the study shifts scholarly focus away from securing and toward insuring an adequate oil supply and from controlling toward managing any disruptions to the sea lines of communication The book is the most detailed and accurate look to date at how China has hedged its energy bets and how its behavior fits a hedging pattern

China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic military and political power Indeed few analysts would dispute the observation that China's power has strongly influenced the structure of the international system major power strategic relations international security the patterns of trans border economic activities and most importantly the political and security dynamics in Asia in the twenty first century This book maps the growth of China's political economic and military capabilities and its impact on the security order in Asia over the coming decades While updating the emerging power dimensions and prevailing discourse it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive or even aggressive in its behavior and pursuit of national interests It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political economic and military power China's Power and Asian Security will be of huge interest to student and scholars of Asian politics Chinese politics security studies and international security and international relations more

generally **China's National Security** Cora Chan, Fiona de Londras, 2020-03-05 All states are challenged by the need to protect national security while maintaining the rule of law but the issue is particularly complex in the China Hong Kong context This timely and important book explores how China conceives of its national security and the position of Hong Kong It considers the risks of introducing national security legislation in Hong Kong and Hong Kong's sources of resilience against encroachments on its rule of law that may come under the guise of national security It points to what may be needed to maintain Hong Kong's rule of law once China's 50 year commitment to its autonomy ends in 2047 The contributors to this book include world renowned scholars in comparative public law and national security law The collection covers a variety of disciplines and jurisdictions and both scholarly and practical perspectives to present a forward looking analysis on the rule of law in Hong Kong It illustrates how Hong Kong may succeed in resisting pressure to advance China's security interests through repressive law Given China's growing international stature the book's reflections on China's approach to security have much to tell us about its potential impact on the global political security and economic order **China's Search for Security** Andrew J. Nathan, Andrew Scobell, 2015-02-10 Despite its impressive size and population economic vitality and drive to upgrade its military China remains a vulnerable nation surrounded by powerful rivals and potential foes Understanding China's foreign policy means fully appreciating these geostrategic challenges which persist even as the country gains increasing influence over its neighbors Andrew J Nathan and Andrew Scobell analyze China's security concerns on four fronts at home with its immediate neighbors in surrounding regional systems and in the world beyond Asia By illuminating the issues driving Chinese policy they offer a new perspective on the country's rise and a strategy for balancing Chinese and American interests in Asia Though rooted in the present Nathan and Scobell's study makes ample use of the past reaching back into history to illuminate the people and institutions shaping Chinese strategy today They also examine Chinese views of the United States explain why China is so concerned about Japan and uncover China's interests in such problematic countries as North Korea Iran and the Sudan The authors probe recent troubles in Tibet and Xinjiang and explore their links to forces beyond China's borders They consider the tactics deployed by mainland China and Taiwan as Taiwan seeks to maintain autonomy in the face of Chinese advances toward unification They evaluate the strengths and weaknesses of China's three main power resources economic power military power and soft power The authors conclude with recommendations for the United States as it seeks to manage China's rise Chinese policymakers understand that their nation's prosperity stability and security depend on cooperation with the United States If handled wisely the authors believe relations between the two countries can produce mutually beneficial outcomes for both Asia and the world **China's Search for Security** Andrew James Nathan, Andrew Scobell, 2012 Andrew J Nathan and Andrew Scobell analyze China's security concerns on four fronts at home with its immediate neighbors in surrounding regional systems and in the world beyond Asia By illuminating the issues driving Chinese policy they offer a new perspective on the country's rise and a strategy for balancing Chinese and American

interests in Asia The authors probe recent troubles in Tibet and Xinjiang exploring their links to forces beyond China's borders They also consider the tactics deployed by mainland China and Taiwan as the latter seeks to maintain autonomy in the face of Chinese advances toward unification and they evaluate the strengths and weaknesses of China's three main power resources economic power military power and soft power

Environmental Change and Food Security in China Jenifer Huang McBeath, Jerry McBeath, 2010-03-25 Abstract This chapter defines food security as the condition reached when a nation's population has access to sufficient safe and nutritious food to meet its dietary needs and food preferences It stresses China's importance to global food security because of its population size The chapter introduces the contents of the volume and then treats briefly food security in ancient and dynastic 211 bc 1912 China It examines environmental stressors such as population growth natural disasters and insect pests as well as imperial responses for example irrigation flood control storage and transportation systems The chapter also briefly introduces the Republican era 1912 1949 and compares environmental stressors and government responses then to those of the imperial period Keywords Food system Food security Food production regions Environmental stressors Population growth Natural disasters Insect pests and Plant diseases Deforestation Climate change Irrigation systems Flood control Grand Canal 1 1 The Problem of Food Security and Environmental Change Food is the material basis to human survival and in each nation state providing a system for the development production and distribution of food and its security is a primary national objective Many forces have influenced the food security of peoples since ancient times with particular challenges from natural disasters floods famines drought and pestilence and growing populations globally

China's Security Interests in the 21st Century Russell Ong, 2007-03-12 The collapse of communism in Europe the quest for economic security and the War on Terror have all affected China's view of security matters Ong provides a comprehensive study of the new policy and security challenges China faces in the coming years Covering all of China's current security interests and concerns this remarkable book includes chapters on Chinese concepts of security the role of the United States and regional tensions including the Korean peninsula Japan Taiwan and China's quest for great power status

The Rise of China in Asia Carolyn Wilson Pumphrey, Carolyn W. Pumphrey, 2002 *China's Energy Security* Giulia C Romano, Jean-Francois Meglio, 2016-06-10 A secure supply of energy is essential for all nations to sustain their economy and indeed their very survival This subject is especially important in the case of China as China's booming economy and consequent demand for energy is affecting the whole world and in turn potentially driving realignments in international relations Moreover as this book argues energy security should be considered more broadly to include issues of sustainability environmental protection and the domestic organisation of energy policy and energy supply This book presents a comprehensive picture of China's energy security It covers all energy sectors coal oil gas renewables international relations with all major sources of energy supply the Middle East Central Asia Africa and key areas of domestic policy making and supply

After Engagement Jacques deLisle, Avery Goldstein, 2021-04-20 From cooperation to a new cold

war is this the future for today's two great powers U.S. policy toward China is at an inflection point. For more than a generation since the 1970s a near consensus view in the United States supported engagement with China with the aim of integrating China into the U.S.-led international order. By the latter part of the 2010s that consensus had collapsed as a much more powerful and increasingly assertive China was seen as a strategic rival to the United States. How the two countries tackle issues affecting the most important bilateral relationship in the world will significantly shape overall international relations for years to come. In this timely book leading scholars of U.S.-China relations and China's foreign policy address recent changes in American assessments of China's capabilities and intentions and consider potential risks to international security, the significance of a shifting international distribution of power, problems of misperception and the risk of conflicts, China's military modernization, its advancing technology and its Belt and Road Initiative as well as regional concerns such as the South China Sea disputes, relations with Japan and tensions on the Korean Peninsula receive special focus. **China's**

Approach to Energy Security Shaofeng Chen, 2023-07-15 This book aims to analyze how and why China takes a state-managed marketization approach (SMMA) to energy security against the backdrop of global efforts of decarbonization and intensified strategic competition between China and the United States. How and why does China's SMMA work? Taking an evolving historical perspective, this book explores China's perception of energy security, the policy process, institutional restructuring in China's petroleum industry, China's foreign energy quest and the ramifications of the Chinese approach on the international energy market and on world decarbonization. To demonstrate to what extent China's SMMA differs from other countries, it also makes a comparative analysis of the approaches by China, the U.S. and India. This book will keenly interest scholars of the Chinese political economy, climate change and geopolitics. *PLA Influence on China's National Security Policymaking* Phillip C. Saunders, Andrew Scobell, 2015-09-09 In recent years there have been reports of actions purportedly taken by People's Liberation Army (PLA) units without civilian authorization and of Chinese Communist Party (CCP) civilian leaders seeking to curry favor with the military, suggesting that a nationalistic and increasingly influential PLA is driving more assertive Chinese policies on a range of military and sovereignty issues. To many experienced PLA watchers, however, the PLA remains a party army that is responsive to orders from the CCP. *PLA Influence on China's National Security Policymaking* seeks to assess the real relationship between the PLA and its civilian masters by moving beyond media and pundit speculation to mount an in-depth examination and explanation of the PLA's role in national security policymaking. After examining the structural factors that shape PLA interactions with the Party-State, the book uses case studies to explore the PLA's role in foreign policy crises. It then assesses the PLA's role in China's territorial disputes and in military interactions with civilian government and business, exploring the military's role in China's civil-military integration development strategy. The evidence reveals that today's PLA does appear to have more influence on purely military issues than in the past but much less influence on political issues and to be more actively engaged in policy debates on mixed civil

military issues where military equities are at stake

China's Security Interests in the Post-Cold War Era Russell

Ong, 2002 This work examines the military political and economic dimensions of China's security as well as the security environment in Asia

China's Energy Security and Relations With Petrostates Anna Kuteleva, 2021-07-26 This book

examines the development of bilateral energy relations between China and the two oil rich countries Kazakhstan and Russia Challenging conventional assumptions about energy politics and China's global quest for oil this book examines the interplay of politics and sociocultural contexts It shows how energy resources become ideas and how these ideas are mobilized in the realm of international relations China's relations with Kazakhstan and Russia are simultaneously enabled and constrained by the discursive politics of oil It is argued that to build collaborative and constructive energy relations with China its partners in Kazakhstan Russia and elsewhere must consider not only the material realities of China's energy industry and the institutional settings of China's energy policy but also the multiple symbolic meanings that energy resources and particularly oil acquire in China China's Energy Security and Relations with Petrostates offers a nuanced understanding of China's bilateral energy relations with Kazakhstan and Russia raising essential questions about the social logic of international energy politics It will appeal to students and scholars of international relations energy security Chinese and post Soviet studies along with researchers working in the fields of energy policy and environmental sustainability

China's Search for Energy Security Suisheng Zhao, 2014-06-11 China's rapid economic growth in the recent decades has produced an

unprecedented energy vulnerability that could threaten the sustainability of its economic development a linchpin to social stability and ultimately the regime legitimacy of the Chinese Communist Party CCP as well as the foundation for China's rising power aspirations What is the Chinese perception of the energy security and challenges how has the Chinese government responded to the challenges What are the international implications of China's search for energy security This collection of contributions by leading scholars seeks answers to these extremely important questions The book is divided into three parts Part I presents an overview of China's sense of energy security and its strategic responses Part II examines China's energy policy making processes the efforts to reform and reorganize the energy sector and reset policy priorities Part III focuses on the international implications of China's search for energy security This book consists of articles published in the Journal of Contemporary China

CHINA: FOOD SECURITY AND AGRICULTURAL GOING GLOBAL Han

Jun, 2022-11-21 Through decades of efforts China has overall achieved self sufficiency in food supply which is the result of effective policies and measures adopted by the Chinese government This book focuses on China's food security strategy and agricultural going global strategy and goes into details on policies and measures for achieving domestic food security It specially analyzes status and development trend of China's corn industry since corn is the most sensitive grain variety that plays an important role as food feed and raw material for bioenergy It also studies overseas agricultural development potential for agricultural investment and cooperation globally It finally elaborates China's agricultural going global strategy

with specific cases to evaluate policy effect in order to promote international cooperation in agriculture The conclusions are that as the world s most populated country China should rely on its domestic production to ensure food supply However with intensified constraints on resources and environment China should appropriately adjust its food security goals to ensure the basic self sufficiency of cereals and rely more on global markets for non cereal grain varieties Looking to the future China should establish a food security system that is efficient open and sustainable through profound reform to increase its domestic food productivity promote sustainable development of agriculture and expand international cooperation in agriculture
