Sedimentary Petrology and Paleocurrents of the Harebell Formation, Pinyon Conglomerate, and Associated Coarse Clastic Deposits, Northwestern Wyoming David A. Paleocurrents and Basin Analysis P. E. Potter, F. J. Pettijohn, 2012-12-06 The study of paleocurrents since 1963 is now a very routine part of sedimentology and more and more such studies are finding use in other fields Thus it seemed appropriate for us to review post 1963 developments and present them in a compact manner for the interested reader Instead of rewriting a second edition which thirteen years later we would organize in a completely different way we have brought each chapter up to date with new material up to 1976 A new update supplement has in this edition been inserted after each one of the original chapters We have stayed close to the original theme of paleocurrents how to measure them and how to use them to solve geological problems ranging in scale from the hand specimen to the sedimentary basin and beyond We have used many annotated references and tables to help present this information to the reader The reader will note that we have cited a few 1962 references publications that appeared too late to be cited in the original 1963 edition A few times we have also cited a reference which was included in the first edition These are marked with an asterisk and hence do not appear in the new lists of references We have been aided by many In Cincinnati WANDA OSBORNE and JEAN CARROL did typing and RICHARD SPOHN the University's geological librarian was very helpful in obtaining many references to the literature
