## Seed Remembers:

Seeds of Memory J. Richard Jacobs, 2021-07-10 SPACE once believed to be a vast and vacant void has been found in fact to be filled with all sorts of things things that roam freely and at random Our little spaceship Earth is no longer as secure as we once thought it to be There are clouds of dust and gas so hot that their mere passing would scour our little system of planets with a breath of death and destruction complete Clouds so massive that just their passing could throw all our little planets from of their peaceful orbits into the deep cold of a sunless darkness and fling our star out and on its way to being one of the eternal roamers of our galaxy or even throw it into an intergalactic journey to who knows where Black holes blazars blasts of deadly radiation from nearby super novae stars burned out hulks of stars super dense neutron stars rocks small or incredibly large and a host of other things none of them welcome visitors IN THIS INCREDIBLE SWEEPING SAGA across thousands of years and hundreds of light years we come face to face with our fears and deep prejudices It is here in SEEDS OF MEMORY that we get an idea of what it means to be HUMAN and what HUMAN really means It is here in SEEDS OF MEMORY that we are confronted with the need to know colliding head on with reality Are we HOMO SAPIENS SAPIENS truly the only form that humans can take and is our history the only history Might there not be others or others created out of the very stuff of life who are after all our brothers and sisters kith and kin In this story we find that the lines that divide have indistinct fuzzy edges and that we are the ones who make those divisions Here we discover humanity at its magnificent best its seething worst and everything imaginable between while we make an uncertain attempt to reunite two peoples separated by time and space and other things One of those unwelcome visitors has arrived and we are pitifully unprepared This is a speculative look into a far flung future disaster that could actually happen and well might someday and how the human species reacts to it It could even be said that it is a look at a future history a history we might not be able to survive

school group of texts terms or practices and identify a considerable range of types of mnemonic faculties in Buddhism Included are discussions of Buddhist teaching meditation visualization prayer commemoration of the Buddha dharma practice the use of mnemonic lists to condense lengthy scriptures and the purported recollection of infinite previous lives that immediately preceded Sakyamuni's attainment of Buddhahood Even enlightened awareness itself is said by some Buddhist schools to consist in a mnemonic engagement with reality as such The authors explore Buddhist views on mundane acts of memory such as recognizing reminding memorizing and storing data as well as special types of memory that are cultivated in religious practice One of the most striking discoveries is that perception is intimately related to certain types of memory Several essays investigate if and if so how meditative mindfulness and recollection of the past both of which can be designated by the term *smṛti* are connected within the Buddhist tradition The question of whether recollection of the past can be explained without violating the foundational Buddhist notions of radical impermanence and no self is addressed by several of the contributing scholars Among the primary sources for the studies in this volume are the northern and southern Abhidharma literature the *Mātkas* Pāli and Mahāyāna sūtras works of the Buddhist logicians Yogācāra materials the Tibetan Great Perfection Rdzogschen tradition and Indian and Tibetan commentarial works Affinities of Buddhist views on memory with those found in Western phenomenology semiology psychology and history of religions are considered as well

Jordan, 2015-04-14 Each week during the growing season farmers markets offer up such delicious treasures as brandywine tomatoes cosmic purple carrots pink pearl apples and chioggia beets varieties of fruits and vegetables that are prized by home chefs and carefully stewarded by farmers from year to year These are the heirlooms and the antiques of the food world endowed with their own rich histories While cooking techniques and

flavor fads have changed from generation to generation a Ribston Pippin apple today can taste just as flavorful as it did in the eighteenth century But how does an apple become an antique and a tomato an heirloom In *Edible Memory* Jennifer A Jordan examines the ways that people around the world have sought to identify and preserve old fashioned varieties of produce In doing so Jordan shows that these fruits and vegetables offer a powerful emotional and physical connection to a shared genetic cultural and culinary past Jordan begins with the heirloom tomato inquiring into its botanical origins in South America and its culinary beginnings in Aztec cooking to show how the homely and homegrown tomato has since grown to be an object of wealth and taste as well as a popular symbol of the farm to table and heritage foods movements She shows how a shift in the 1940s away from open pollination resulted in a narrow range of hybrid tomato crops But memory and the pursuit of flavor led to intense seed saving efforts increasing in the 1970s as local produce and seeds began to be recognized as living windows to the past In the chapters that follow Jordan combines lush description and thorough research as she investigates the long history of antique apples changing tastes in turnips and related foods like kale and parsnips the movement of vegetables and fruits around the globe in the wake of Columbus and the poignant perishable world of stone fruits and tropical fruit in order to reveal the connections the edible memories these heirlooms offer for farmers gardeners chefs diners and home cooks This deep culinary connection to the past influences not only the foods we grow and consume but the ways we shape and imagine our farms gardens and local landscapes From the farmers market to the seed bank to the neighborhood bistro these foods offer essential keys not only to our past but also to the future of agriculture the environment and taste By cultivating these edible memories Jordan reveals we can stay connected to a delicious heritage of historic flavors and to the pleasures and possibilities for generations of feasts to come
