**Seeds and Fruits of Plants of Eastern Canada and Northeastern United States**, 1978 **Seeds and Fruits of Plants of Eastern Canada and Northeastern United States** Frederick Howard Montgomery, *Seeds and Fruits of Plants of Eastern Canada and Northeastern United States* F. H. Montgomery, 1977 Hitherto there has been no way to identify Canadian and US seed samples except to compare them with known specimens Identification has been a process of elimination depending on the experience knowledge and memory of the observer The Seeds and Fruits of Plants of Eastern Canada and Northeastern United States describes and illustrates the seeds of about 1100 species of native wild and introduced weedy plants from some 118 families and provides keys for their identification based on their geometric shapes The primary tool used in describing the shape of the seeds and keying them is the chart of symmetric plane figures developed by the Systematics Association Committee of the International Association Plant Taxonomy That seeds which were obtained from herbaria or the author's own collection were thus sorted and classified according to the exact shape of their longitudinal and cross sections to form the major sections of the key Morphological details observed under magnifications up to 30 x were then used both for minor separations in the key and in describing species Photography was chosen as the most accurate means of illustration While primarily intended for taxonomists and those teaching seed identification as a text and for verification of identifications this book will also be an important reference for studies of archaeology studying seed remains ecologists studying bog formations and seed analysts both in Canada and the US *Guide to Sources for Agricultural and Biological Research* J. Edwards IV, 2020-09-30 Enormous changes affected the inhabitants of the Eastern Woodlands area during the eleventh through fifteenth centuries AD At this time many groups across this area known collectively to archaeologists as Oneota were aggregating and adopting new forms of material culture and food technology This same period also witnessed an increase in intergroup violence as well as a rise in climatic volatility with the onset of the Little Ice Age In Indigenous Life around the Great Lakes Richard W Edwards explores how the inhabitants of the western Great Lakes region responded to the challenges of climate change social change and the increasingly violent physical landscape As a case study Edwards focuses on a group living in the Koshkonong Locality in what is now southeastern Wisconsin Edwards contextualizes Koshkonong within the larger Oneota framework and in relation to the other groups living in the western Great Lakes and surrounding regions Making use of a canine surrogacy approach which avoids the destruction of human remains Edwards analyzes the nature of groups subsistence systems the role of agriculture and the risk management strategies that were developed to face the challenges of their day Based on this analysis Edwards proposes how the inhabitants of this region organized themselves and how they interacted with neighboring groups Edwards ultimately shows how the Oneota groups were far more agricultural than previously thought and also demonstrates how the maize agriculture of these groups was related to the structure of

their societies In bringing together multiple lines of archaeological evidence into a unique synthesis Indigenous Life around the Great Lakes is an innovative book that will appeal to archaeologists who study the Midwest and surrounding regions and it will also appeal to those who research risk management agriculture and the development of hierarchical societies more generally
