International Media Research John R. Corner, Philip Schlesinger, Professor Philip R Schlesinger, Roger Silverstone, 2004-01-14 International Media Research offers a rigorous and critical review of key approaches and concerns that have recently defined the field of media research. In this clearly argued collection of essays, the contributors analyze and reflect upon dominant themes and debates that have made media research an increasingly important element of cultural theory. The volume begins with a critical evaluation of the work of the leading media scholar Elihu Katz and continues with an exploration of the relationship between media studies and adjacent disciplines: cultural studies and gender and sexuality. Contributors drawn from Britain, America, Canada, and Belgium consider the relationships between media research and media policy in different national and international contexts. Focusing on the European Union, East Central Europe, North America, and Latin America, chapters assess the impact of social, economic, and political circumstances on policy debates and the shaping of the research agenda. The final chapter adopts a transatlantic perspective in tracing and analysing the history of the media's role in reporting war.

Exploring the Collective Unconscious in the Age of Digital Media Schafer, Stephen Brock, 2016-01-28 For decades we have witnessed the emergence of a media age of illusion that is based on the principles of physics: the multidimensionality, immateriality, and non-locality of the unified field of energy and information as a virtual reality. As a result, a new paradigm shift has reframed the cognitive unconscious of individuals and collectives and generated a worldview in which mediated illusion prevails. Exploring the Collective Unconscious in a Digital Age investigates

the cognitive significance of an altered mediated reality that appears to have all the dimensions of a dreamscape This book presents the idea that if the digital media sphere proves to be structurally and functionally analogous to a dreamscape the Collective Unconscious researched by Carl Jung and the Cognitive Unconscious researched by George Lakoff are susceptible to research according to the parameters of hard science This pivotal research based publication is ideally designed for use by psychologists theorists researchers and graduate level students studying human cognition and the influence of the digital media revolution
