timber since before the breakup of the ancient supercontinent to a stretch of Australian coastline with stromatolite formations that bear witness to the Precambrian dawn the existence of these survivors offers us a tantalizing glimpse of pivotal points in evolutionary history These are not living fossils but rather a handful of tenacious creatures of days long gone Written in buoyant sparkling prose *Horseshoe Crabs and Velvet Worms* is a marvelously captivating exploration of the world's old timers combining the very best of science writing with an explorer's sense of adventure and wonder **Mountain**

Time Paul Schullery, 2010-01-07 *Mountain Time* a thoughtful and often moving work is not only about Yellowstone as a superb sample of American wildness but also about a man named Paul Schullery and his relationship to it This fact gives the book much richness and power for Schullery comes across clearly as a caring observant undogmatic person whose reasonable and intelligent opinions are reinforced by plenty of facts In a certain mood it is possible to wish vainly that people of his civilized caliber were the only ones allowed to open their mouths very widely on any subject that really matters as Yellowstone definitely does John Graves author of *Goodbye to a River* and *From a Limestone Lodge* Paul has pushed outdoor writing to new limits I pay him the highest compliment I can I wish I had written *Mountain Time* Lionel Atwill *Sports Afield*
