Stumpf, 2024 In the early eighties as world superpowers engaged in the aggressive stockpiling of weapons of mass destruction US president Ronald Reagan's announcement of the Strategic Defense Initiative began the development and coordination of missile technologies applicable to strategic defense against civilization's most dangerous

inventions While the initial focus of this effort was the intercontinental ballistic missiles carrying nuclear threats from the Soviet Union or China by the end of the decade attention turned to potential ICBM threats from rogue states such as North Korea Iran and Iraq And so a new time for ballistic missile defense had begun

The Last Thirty Seconds A Brief History of the Evolution of Hit To Kill Technology is a masterful record of the evolution of improved ballistic missile defense capabilities in the decades since the height of the nuclear arms race With an exceptionally researched style David K Stumpf recounts the development of midcourse and terminal phase defense commonly known as hit to kill a nonnuclear technique at the center of current ballistic missile defense systems using kinetic energy rather than explosives for the destruction of reentry vehicles carrying chemical biological or nuclear warheads With the aid of recently declassified documents Stumpf guides the reader through the complex history of the evolution of a technology that many said could never be achieved bringing its story to life with dozens of rare photographs and technical illustrations While much of the subject remains classified what is described in this detailed study will be welcomed by librarians engineers and high technology history professionals for the depth of its access the substance of its references and the exposure of archival material on the missiles the have defined military defense from the Cold War to the present

Uncertainty in Global Politics Anastasia Shesterinina, Miriam Matejova, 2023-11-16 This book engages in a constructive practical debate on the nature and effects of uncertainty in global politics International contributors explore the processes associated with different forms of uncertainty in the context of environmental issues diplomacy and international negotiations and conflict and security From the collapse of the Soviet Union to the 1997 and 2008 financial crises to the Arab Uprisings and the European migrant crisis and the COVID 19 pandemic assessments of many events with lasting consequences on the global order have begun with why didn t we see this coming There is much to learn from how phenomena that affect the global order generate uncertainty and

what effects such uncertainty has on actors and issues Presenting perspectives from all corners of the discipline and emerging and established scholars the book provides an up to date overview of the state of the literature a concise yet conceptually rich theoretical framework a mix of regional and global contemporary issues process oriented empirical evidence and methodological tools to assess different forms of uncertainty and propose practical solutions to addressing uncertainty in diverse contexts The book will be of interest to scholars of global politics international security global environmental politics international organizations and institutions social movements and conflict studies Adapting to Flexible Response, 1960-1968 Walter S. Poole, 2013 Arms, Revenue, and Entitlements William Mannen, 2020-07-02 In the second half of the twentieth century strategic and economic conditions compelled the U S government to start running budget deficits on a permanent basis A new role of global leadership in containing communism required a robust military establishment The federal government overwhelmingly relied for general revenue on an income tax code that also could not impede economic growth And general revenue increasingly funded transfer payments in an expanding entitlement state Fiscal overstretch resulted in unending deficits that continue to this day At first the shift to deficit normality was not obvious The Truman and Eisenhower administrations attempted to hold the line on deficits but this commitment gradually waned in subsequent years Arms Revenue and Entitlements U S Deficits in the Cold War 1945 1991 looks at the Cold War era from a budgetary perspective and how defense spending income tax reductions and entitlement programs all contributed to the emergence of the deficit normative state As national debt continues to climb in the twenty first century Arms Revenue and Entitlements shows how the U S reached this point and how a comprehensive policy approach might again restore fiscal stability Weapons in Space Aaron Bateman, 2024-05-07 A new and provocative take on the formerly classified history of accelerating superpower military competition in space in the late Cold War and beyond In March 1983 President Ronald Reagan shocked the world when he established the Strategic Defense Initiative SDI derisively known as Star Wars a space based missile defense program that aimed to protect the US from nuclear attack In Weapons in Space Aaron Bateman draws from recently declassified American European and Soviet documents to give an insightful account of SDI situating it within a new phase in the militarization of space after the superpower détente fell apart in the 1970s In doing so Bateman reveals the largely secret role of military space technologies in late Cold War US defense strategy and foreign relations In contrast to existing narratives Weapons in Space shows how tension over the role of military space technologies in American statecraft was a central source of SDI's controversy even more so than questions of technical feasibility By detailing the participation of Western European countries in SDI research and development Bateman reframes space militarization in the 1970s and 1980s as an international phenomenon He further reveals that even though SDI did not come to fruition it obstructed diplomatic efforts to create new arms control limits in space Consequently Weapons in Space carries the legacy of SDI into the post Cold War era and shows how this controversial program continues to shape the global discourse about instability in space and the

growing anxieties about a twenty first century space arms race **Missile Defense 2020** Thomas Karako,Ian Williams,2017-04-18 In policy pronouncements over the last two administrations the protection of the American homeland was regularly identified as the first priority of U S missile defense efforts Homeland missile defense today is provided by the Ground based Midcourse Defense program and other elements of the larger Ballistic Missile Defense System The limited defenses fielded today have advanced considerably since limited defensive operations began in late 2004 but nevertheless they remain too limited and too modest relative to emerging threats The Missile Defense Agency s path to improve the system may require additional effort to stay ahead of even limited missile threats This report explains how the current system works as well as current and potential plans to modernize the system and the authors offer recommendations for future evolution of the system **Exodus From Empire** Terrence E. Paupp,2006-11-20 This book lays out a comprehensive vision for a new world order based on cooperation between the developing world and leading Left countries in Latin America Arguing that the ravages of corporate capitalism are unsustainable Terrence E Paupp presents an energetic critique of the problems of empire and looks ahead to a global countermovement against the IMF and US hegemony **Joint Force Quarterly** ,2009 *Congressional Record* United States.
