Seizures Of The Sun:

Febrile Seizures Tallie Z. Baram, Shlomo Shinnar, Carl E. Stafstrom, 2022-09-20 Febrile seizures are the most common seizures in infants and children worldwide This fact provides strong impetus to study and understand them and their consequences and consider their treatment These topics were the focus of the first edition of this book The 20 years since the publication of this first edition have witnessed an explosion of new information about febrile seizures meriting this new edition Key advances have been made in the genetics and neurobiological underpinnings of febrile seizures and especially the very long fever related seizures called febrile status epilepticus. The role of neuroinflammatory factors in the emergence of these seizures and their consequences the demonstration of unique clinical and neuroradiological aspects of febrile status epilepticus and the prospect of predictive bio markers to identify and characterize cognitive and epilepsy outcomes are exciting and important In this edition the authors and editors tackle these developments in chapters addressing the questions of parents physicians allied health care professionals and basic and translational scientists Reviews all aspects of febrile seizures including epidemiology neurobiology and treatment Discusses novel and newly discovered information based on up to the minute methods Provides an engaging style that is accessible to clinicians researchers and educated parents
