*Techniques 2001* S.J. Gortler,K. Myszkowski,2012-12-06 This book contains the proceedings of the 11th Eurographics  
Workshop on Rendering which took place from the 25 to the 27th of June 2001 in London United Kingdom Over the past  
11 years the workshop has become the premier forum dedicated to research in rendering Much of the work in rendering now  
appearing in other conferences and journals builds on ideas originally presented at the workshop This year we received a  
total of 74 submissions Each paper was carefully reviewed by two of the 28 international programme committee members as  
well as external reviewers selected by the co chairs from a pool of 125 individuals In this review process all submissions and  
reviews were handled electronically with the exception of videos submitted with a few of the papers The overall quality of the  
submissions was exceptionally high Space and time constraints forced the committee to make some difficult decisions In the  
end 29 by papers were accepted and they appear here Almost all papers are accompanied color images which appear at the  
end of the book The papers treat the following varied topics methods for local and global illumination techniques for  
acquisition and modeling from images image based rendering new image representations hardware assisted methods shadow  
algorithms visibility perception texturing and filtering Each year in addition to the reviewed contributions the workshop  
includes invited presentations from internationally recognized experts      SIGGRAPH (Special Interest Group on Computer  
Graphics) 95 Robert (editor) Cook,ACM (Association for Computing Machinery). Special Interest Group on Computer  
Graphics (SIGGRAPH) (sponsor),1995      Rendering Techniques '97 Julie Dorsey,Philipp Slusallek,2012-12-06 The book  
contains the proceedings of the 8th Eurographics Rendering Workshop which took place from 16th to 18th June 1997 in Saint  
Etienne France After a series of seven successful events the workshop is now well established as the major international  
forum in the field of rendering and illumination techniques It brought together the experts of this field Their recent research  
results are compiled in this proceedings together with many color images that demonstrate new ideas and techniques This  
year we received a total of 63 submissions of which 28 were selected for the workshop after a period of careful reviewing and  
evaluation by the 27 members of the international program committee The quality of the submissions was again very high  
and unfortunately many interesting papers had to be rejected In addition to regular papers the program also contains two  
invited lectures by Shenchang Eric Chen Live Picture and Per Christensen Mental Images The papers in this proceedings

contain new research results in the areas of Finite Element and Monte Carlo illumination algorithms image based rendering outdoor and natural illumination error metrics perception texture and color handling data acquisition for rendering and efficient use of hardware While some contributions report results from more efficient or elegant algorithms others pursue new and experimental approaches to find better solutions to the open problems in rendering [Index of Conference Proceedings](#) British Library.
