Luis Barragán Antonio Riggen Martínez, Luis Barragán, 1996 Many books cover the sublime forms and colors of Luis Barragan s architecture its visual aspect yet are silent on his education and development as an architect his methods and his theories Luis Barragan Mexico s Modern Master 1902 1988 is the first in depth study of the architect and his work It also includes a great number of exquisite visual representations thereby presenting a complete treatment of Barragan that enhances an understanding of the equally poetic and architectonic nature of his work and places him within the historical and political context of Mexico The author portrays the myriad influence on the young Barragan early trips to the United States and Europe where he became acquainted with some of his most important and lasting models Le Corbusier Frederick Kiesler Jose Clemente Orozco and above all Ferdinand Bac the strong sense of identity of the tapatios natives of his home city

of Guadalajara and his circle of contemporaries all in the arts all committed to discussing and publicizing new social and artistic ideas Barragan s early works synthesized many of these elements and a quality of Mediterraneanism was their strongest characteristic This monograph also features the most extensive documentation available on Barragan In addition to photographs and architectural drawings of his best known projects it features a myriad of previously unpublished photographs an extensive illustrated list of over sixty built and unbuilt works and a complete register of projects
