Copyright Office,1949   Empirical Foundations for a Theory of Language Change Uriel Weinreich,William Labov,Marvin Herzog,1968   **Futurescapes** ,2009-01-01 This book testifies to the growing interest in the many spaces of utopia It intends to map out on utopian and science fiction discourses some of the new and revisionist models of spatial analysis applied in Literary and Cultural Studies in recent years The aim of the volume is to side step the established generic binary of utopia and dystopia or science fiction and thus to open the analysis of utopian literature to new lines of inquiry The essays collected here propose to think of utopias not so much as fictional texts about future change and transformation but as vital elements in a cultural process through which social spatial and subjective identities are formed Utopias can thus be read as textual systems implying a distinct spatial and temporal dimension as spatial practices that tend to naturalize a cultural and social construction that of the good life the radically improved welfare state the Christian paradise the counter society etc and make that representation operational by interpellating their readers in some determinate relation to their givenness as sites of political and individual improvement This volume is of interest for all scholars and students of literature who wish to explore the ways in which utopias of the past and recent present have circulated as media of cultural exchange and homogenization as sites of cultural and linguistic appropriation and as foci for the spatial formation of national and regional identities in the English speaking world   Workpapers in Indonesian Languages and Culture ,1990   **The Concept of Modernism** Astradur Eysteinsson,2018-07-05 The term modernism is central to any discussion of twentieth century literature and critical theory Astradur Eysteinsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes but is in fact a product of critical practices relating to nontraditional literature Intervening in these practices and correlating them with modernist works and with modern literary theory Eysteinsson undertakes a comprehensive reexamination of the idea of modernism Eysteinsson critically explores various manifestations of modernism in a rich array of American British and European literature criticism and theory He first examines many modernist paradigms detecting in them a conflict between modernism s culturally subversive potential and its relatively conservative status as a formalist project He then considers these paradigms as interpretations and fabrications of literary history Seen in this light modernism both signals a historical change on the

literary scene and implies the context of that change Laden with the implications of tradition and modernity modernism fills its major function that of highlighting and defining the complex relations between history and postrealist literature Eysteinsson focuses on the ways in which the concept of modernism directs our understanding of literature and literary history and influences our judgment of experimental and postrealist works in literature and art He discusses in detail the relation of modernism to the key concepts postmodernism the avant garde and realism Enacting a crisis of subject and reference modernism is not so much a form of discourse he asserts as its interruption a possible other modernity that reveals critical aspects of our social and linguistic experience in Western culture Comparatists literary theorists cultural historians and others interested in twentieth century literature and art will profit from this provocative book **Catalog of Copyright Entries.
