Luxury And Public Happiness In The Italian Enlightenment:

Luxury and Public Happiness Till Wahnbaeck, 2004 This work charts the development of political economy in 18th century Italy arguing that the focus on economic thought is characteristic of the Italian Enlightenment at large Through an analysis of the debate about luxury it traces the shaping of a new language of political economy *Suffering and Happiness in England 1550-1850: Narratives and Representations* Michael J. Braddick, Joanna Innes, 2017-07-26 Suffering and Happiness in England 1550 1850 pays tribute to one of the leading historians working on early modern England Paul Slack and his work as a historian and enters into discussion with the rapidly growing body of work on the history of emotions The themes of suffering and happiness run through Paul Slack's publications the first being more prominent in his early work on plague and poverty the second in his more recent work on conceptual frameworks for social thought and action Though he has not himself engaged directly with the history of emotions assembling essays on these themes provides an opportunity to do that The chapters explore in turn shifting discourses of happiness and suffering over time the deployment of these discourses for particular purposes at specific moments and their relationship to subjective experience In their introduction the editors note the very diverse approaches that can be taken to the topic they suggest that it is best treated not as a discrete field of enquiry but as terrain in which many paths may fruitfully cross The history of emotions has much to offer as a site of encounter between historians with diverse knowledge interests and skills **Luxury and Gender in European Towns, 1700-1914** Deborah Simonton, Marjo Kaartinen, Anne Montenach, 2014-09-04 This book conceives the role of the modern town as a crucial place for material and cultural circulations of luxury It concentrates on a critical period of historical change the long eighteenth and nineteenth centuries that was marked by the passage from a society of scarcity to one of expenditure and accumulation from ranks and orders to greater social mobility from traditional aristocratic luxury to a new bourgeois and even democratic form of luxury This volume recognizes the notion that luxury operated as a mechanism of social separation but also that all classes aspired to engage in consumption at some level thus extending the idea of what constituted luxury and blurring the boundaries of class and status often in unsettling ways It moves beyond the moral aspects of luxury and the luxury debates to analyze how the production distribution purchase or display of luxury goods could participate in the creation of autonomous selves and thus challenge gender roles **Luxury in Global Perspective** Karin Hofmeester, Bernd-Stefan Grewe, 2016-11-28 Global history is predicated on connections and exchange how connections between far flung people places and objects are forged through a variety of exchanges As world history has matured as a field its practitioners have found the movement of commodities between peoples places and time a fruitful vehicle for research and teaching Studies of bulk items like salt spices coffee and other globally traded commodities abound but few scholars have examined the role of luxury goods from a global perspective This anthology charts the many different contexts in which luxury objects have been used across the globe ranging from the social practices linked to these objects to their

production exchange and consumption as well as how these practices varied over time and space and how different societies attributed diverse meanings to the same objects Using luxury goods as a conduit *Luxury in Global Perspective* enriches our understanding of global history *The Enlightenment* Dorinda Outram, 2019-06-13 An engaging and accessible overview of the Enlightenment as a global phenomenon with updated material and additional online resources ***The Economy of Renaissance Florence*** Richard A. Goldthwaite, 2011-01-07 Winner 2010 Phyllis Goodhart Gordan Book Prize the Renaissance Society of America 2009 Outstanding Academic Title Choice Honorable Mention Economics 2009 PROSE Awards Professional and Scholarly Publishing division of the Association of American Publishers Richard A Goldthwaite a leading economic historian of the Italian Renaissance has spent his career studying the Florentine economy In this magisterial work Goldthwaite brings together a lifetime of research and insight on the subject clarifying and explaining the complex workings of Florence s commercial banking and artisan sectors Florence was one of the most industrialized cities in medieval Europe thanks to its thriving textile industries The importation of raw materials and the exportation of finished cloth necessitated the creation of commercial and banking practices that extended far beyond Florence s boundaries Part I situates Florence within this wider international context and describes the commercial and banking networks through which the city s merchant bankers operated Part II focuses on the urban economy of Florence itself including various industries merchants artisans and investors It also evaluates the role of government in the economy the relationship of the urban economy to the region and the distribution of wealth throughout the society While political social and cultural histories of Florence abound none focuses solely on the economic history of the city *The Economy of Renaissance Florence* offers both a systematic description of the city s major economic activities and a comprehensive overview of its economic development from the late Middle Ages through the Renaissance to 1600 ***Global Commerce in the Age of Enlightenment*** J. Bohorquez, 2022-12-30 Combining contextual institutional and global perspectives this book evaluates the impact of international trade on eighteenth century economic thought It meticulously delineates how economic ideas and institutions flowed between North and South Europe and across the Indian and Atlantic Oceans during the Age of Enlightenment *Global Commerce in the Age of Enlightenment* carefully explores contemporary debates about economic institutions which were a crucial element in the race for controlling international trade Eighteenth century thinkers devoted much attention to the relative merits of existing institutions such as free ports grasped the dangers of economic dependence and appraised emerging conceptions of property rights The author draws on an impressive range of sources including pamphlets and travel accounts and work from lesser known figures such as Pierre Poivre and Ange Goudar This volume will be valuable reading for advanced students and researchers of the history of economic thought economic history political economy the history of ideas and global history *The Economic Turn* Steven Kaplan, Sophus Reinert, 2019-01-16 The mid eighteenth century witnessed what might be dubbed an economic turn that resolutely changed the trajectory of world history The discipline of economics itself emerged amidst this turn and it is

frequently traced back to the work of François Quesnay and his school of Physiocracy Though lionized by the subsequent historiography of economics the theoretical postulates and policy consequences of Physiocracy were disastrous at the time resulting in a veritable subsistence trauma in France This galvanized relentless and diverse critiques of the doctrine not only in France but also throughout the European world that have hitherto been largely neglected by scholars Though Physiocracy was an integral part of the economic turn it was rapidly overcome both theoretically and practically with durable and important consequences for the history of political economy The Economic Turn brings together some of the leading historians of that moment to fundamentally recast our understanding of the origins and diverse natures of political economy in the Enlightenment

The Academy of Fisticuffs Sophus A. Reinert, 2018-12-28 The Italian Enlightenment no less than the Scottish was central to the emergence of political economy and creation of market societies Sophus Reinert turns to Milan in the late 1700s to recover early socialists preoccupations with the often lethal tension among states markets and human welfare and the policies these ideas informed

Love, Self-Deceit and Money Koen Stapelbroek, 2008-04-05 Love drives and gives life to the commerce of mankind Thus the sixteen year old Ferdinando Galiani 1728 1787 presented his project to understand the sociable nature of man This observation a reflection of his own position on the relation between trade and virtue hinted at what the mature works of Galiani one of the most noteworthy economists and wits in eighteenth century Italy would eventually yield In *Love Self Deceit and Money* Koen Stapelbroek reconstructs the Early Neapolitan Enlightenment debate on the morality of market societies a debate that hinged on the preservation of Naples independent statehood in a global arena of commercial and military competition Galiani rejected the moralizing and mercantile ideas of his contemporaries regarding the dangers threatening Naples and in his *Della moneta* 1751 he justified the systems set in place by the Neapolitan government With reference to early previously unstudied lectures on self deceptive Platonic love Koen Stapelbroek examines Galiani's role in the wider debate arguing that his early moral philosophical and historical work suggests a great deal about his political economic stance including his assertion that money is the ultimate ordering principle in the universe As a study of one of the most idiosyncratic minds of the Enlightenment period *Love Self Deceit and Money* shows how diverse ideas of the development of individual passions into social dispositions commerce and reform politics dovetailed seamlessly in the intellectual climate of eighteenth century Europe

Enlightened Reform in Southern Europe and its Atlantic Colonies, c. 1750-1830 Gabriel Paquette, 2016-05-06 Efforts to ascertain the influence of enlightenment thought on state action especially government reform in the long eighteenth century have long provoked stimulating scholarly quarrels Generations of historians have grappled with the elusive intersections of enlightenment and absolutism of political ideas and government policy In order to complement expand and rejuvenate the debate which has so far concentrated largely on Northern Central and Eastern Europe this volume brings together historians of Southern Europe broadly defined and its ultramarine empires Each chapter has been explicitly commissioned to engage with a common set of

historiographical issues in order to reappraise specific aspects of enlightened absolutism and enlightened reform as paradigms for the study of Southern Europe and its Atlantic empires In so doing it engages creatively with pressing issues in the current historical literature and suggests new directions for future research No single historian working alone could write a history that did justice to the complex issues involved in studying the connection between enlightenment ideas and policy making in Spanish America Brazil France Italy Portugal and Spain For this reason this well conceived balanced volume drawing on the expertise of a small carefully chosen cohort offers an exciting investigation of this historical debate *The Oxford Handbook of Luxury Business* Pierre-Yves Donzé, Véronique Pouillard, Joanne Roberts, 2022 This innovative volume brings together contributions from leading experts in the study of luxury to present the full range of perspectives on luxury business from a variety of social science approaches Topics include conceptual foundations and the evolution of the luxury industry the production of luxury goods luxury branding and marketing distributing luxury globalization and markets and issues of morality inequality and environmental sustainability The Oxford Handbook of Luxury Business is a necessary resource for all students and researchers of the field as well as for forward thinking industry professionals

The Books that Made the European Enlightenment Gary Kates, 2022-08-11 In contrast to traditional Enlightenment studies that focus solely on authors and ideas Gary Kates employs a literary lens to offer a wholly original history of the period in Europe from 1699 to 1780 Each chapter is a biography of a book which tells the story of the text from its inception through to the revolutionary era with wider aspects of the Enlightenment era being revealed through the narrative of the book's publication and reception Here Kates joins new approaches to book history with more traditional intellectual history by treating authors publishers and readers in a balanced fashion throughout Using a unique database of 18th century editions representing 5 000 titles the book looks at the multifaceted significance of bestsellers from the time It analyses key works by Voltaire Adam Smith Madame de Graffigny Jean Jacques Rousseau and David Hume and champions the importance of a crucial innovation of the age the rise of the erudite blockbuster which for the first time in European history helped to popularize political theory among a large portion of the middling classes Kates also highlights how when and why some of these books were read in the European colonies as well as incorporating the responses of both ordinary men and women as part of the reception histories that are so integral to the volume

[The Free Port of Livorno and the Transformation of the Mediterranean World](#) Corey Tazzara, 2017-10-20 In the twilight of the Renaissance the grand duke of Tuscany a scion of the fabled Medici family of bankers invited foreign merchants artisans and ship captains to settle in his port city of Livorno The town quickly became one of the most bustling port cities in the Mediterranean presenting a rich tableau of officials merchants mariners and slaves Nobody could have predicted in 1600 that their activities would contribute a chapter in the history of free trade Yet by the late seventeenth century the grand duke's invitation had evolved into a general program of hospitality towards foreign visitors the liberal treatment of goods and a model for the elimination of customs duties Livorno was the earliest and most

successful example of a free port in Europe The story of Livorno shows the seeds of liberalism emerging not from the studies of philosophers such as Adam Smith but out of the nexus between commerce politics and identity in the early modern Mediterranean [Introduction to the Spanish Universalist School](#) Pedro Aullón de Haro, Davide Mombelli, 2020-06-29

Introduction to the Spanish Universalist School presents the most significant authors works and concepts of a distinctive humanistic and scientific intellectual community one mostly comprised of ex Jesuits exiled to Italy at the end of the eighteenth century The study of this corner of the Hispanic Enlightenment marked especially by the work of Juan Andrés Lorenzo Hervás and Antonio Eximeno offers contributions to the history of European sciences and letters to the history of ideas and to the concepts of universality and globalization [Opera and Sovereignty](#) Martha Feldman, 2010-10-05

Performed throughout Europe during the 1700s Italian heroic opera or opera seria was the century's most significant musical art form profoundly engaging such figures as Handel Haydn and Mozart Opera and Sovereignty is the first book to address this genre as cultural history arguing that eighteenth century opera seria must be understood in light of the period's social and political upheavals Taking an anthropological approach to European music that's as bold as it is unusual Martha Feldman traces Italian opera's shift from a mythical assertion of sovereignty with its festive forms and rituals to a dramatic vehicle that increasingly questioned absolute ideals She situates these transformations against the backdrop of eighteenth century Italian culture to show how opera seria both reflected and affected the struggles of rulers to maintain sovereignty in the face of a growing public sphere In so doing Feldman explains why the form had such great international success and how audience experiences of the period differed from ours today Ambitiously interdisciplinary Opera and Sovereignty will appeal not only to scholars of music and anthropology but also to those interested in theater dance and the history of the Enlightenment **Malthus Across Nations** Gilbert Faccarello, Masashi Izumo, 2020-04-24

The writings of Thomas Robert Malthus continue to resonate today particularly An Essay on the Principle of Population which was published more than two centuries ago Malthus Across Nations creates a fascinating picture of the circulation of his economic and demographic ideas across different countries highlighting the reception of his works in a variety of nations and cultures This unique book offers not only a fascinating piece of comparative analysis in the history of economic thought but also places some of today's most pressing debates into an accurate historical perspective thereby improving our understanding of them [Keywords in](#)

[Criminology](#) Vincenzo Ruggiero, 2024-09-30 Taking inspiration from the classic text by Raymond Williams Keywords in Criminology reflects on the language used by criminologists and offers a one stop guide to core concepts in the discipline Written for the budding Criminology student it offers a specialized but plain dictionary for a specialized discipline From Abolitionism to Xenophobia the entries unveil the ambiguities and conflicting interpretations of the concepts discussed and explore their historical context their analytical use adoption or critical rejection The original formulation of each concept is examined along with the practices the concept has shaped and the favourable and unfavourable outcomes it has generated

Concepts of War, 1650-1900 Paul

Schuurman,2023-02-17 Why do people wage war How can wars be won How has warfare been an engine of change for human civilization for better and for worse In this book Paul Schuurman shows how some of the best Western minds between 1650 and 1900 tried to answer these questions in an epoch when European developments became a matter of global concern In eight wide ranging chapters he discusses the key concepts that philosophers and generals of this era developed to grasp and influence the dramatic phenomenon of war Their concepts remain fresh and relevant down to the present day

The Illusion of Free Markets Bernard E. Harcourt,2012-11-12 It is widely believed today that the free market is the best mechanism ever invented to efficiently allocate resources in society Just as fundamental as faith in the free market is the belief that government has a legitimate and competent role in policing and the punishment arena This curious incendiary combination of free market efficiency and the Big Brother state has become seemingly obvious but it hinges on the illusion of a supposedly natural order in the economic realm *The Illusion of Free Markets* argues that our faith in free markets has severely distorted American politics and punishment practices Bernard Harcourt traces the birth of the idea of natural order to eighteenth century economic thought and reveals its gradual evolution through the Chicago School of economics and ultimately into today s myth of the free market The modern category of liberty emerged in reaction to an earlier integrated vision of punishment and public economy known in the eighteenth century as police This development shaped the dominant belief today that competitive markets are inherently efficient and should be sharply demarcated from a government run penal sphere This modern vision rests on a simple but devastating illusion Superimposing the political categories of freedom or discipline on forms of market organization has the unfortunate effect of obscuring rather than enlightening It obscures by making both the free market and the prison system seem natural and necessary In the process it facilitated the birth of the penitentiary system in the nineteenth century and its ultimate culmination into mass incarceration today
