Zaloga, 2012-04-20 The M3 and M5 Stuart were the most significant light tanks of the US Army as well as many other allied armies during World War II They have proved to be popular modelling subjects ever since largely due to the large number of kits available in many different scales covering a broad selection of the different variants used The Stuarts were also painted in a wide range of colourful camouflage schemes reflecting their widespread service and this adds to their appeal This title shows a number of different ways to model this popular tank in 1 35 scale covering construction painting and weathering the vehicle *Infantry*, 1988 **A History of the American Light Tank: Stuart** R. **German 88mm Gun vs Allied Armour** David Campbell,David Greentree,2021-02-18 Few weapons developed a more deadly reputation than the German 88 in the role of anti tank gun its long reach and lethal hitting power making it a significant problem for every type of British and later American armour Despite its individual potency it was almost always utilized as part of a comprehensive system of defences that relied on a mix of weapons carefully deployed in anticipation of the enemy s likely avenue and method of attack Used in this way the 88 became a particularly deadly part of the Afrika Korps attempts to shatter British armoured power in the Western Desert Initially extremely successful over the course of 1941 and 1942 in Operations Battleaxe and Crusader the Allies tactics and vehicles such as the American made M3 and the Crusader III eventually evolved to deal with the 88 s awesome power This detailed new book tells the story of that evolution and provides an in depth treatment of this key weapon of World War II **The Salvadoran Officer Corps and the Final Offensive of 1981** Brian J. Bosch,2013-02-22 The final offensive an insurgent campaign fought after El Salvador s coup of 1979 clearly demonstrated the strengths weaknesses idiosyncrasies and behavior of the Salvadoran officer corps During this crucial period the military institution faced the double threat of internal politics and a rebel guerrilla army Colonel Bosch served as the U S Embassy s Defense and Army Attach during the crisis His intimate perspective brings to life the important political and military events before during and after the final offensive His book also offers an historical perspective of officer attitudes from 1931 to 1979 The Armed Forces political crisis of 1979 and 1980 is discussed followed by a detailed analysis of the final offensive the short lived cohesiveness shown by the officer corps and the divisiveness that lasted through the war and into peace The text is complemented by a map and photographs *The Encyclopedia of Tanks and Armoured Fighting Vehicles* Christopher F. Foss,2002 Tanks and armoured fighting vehicles have revolutionised modern warfare dominating the battlefield in conflicts all over the world with their firepower armour and mobility Featured in this book are over 900 tanks armoured personnel carriers self propelled guns reconnaissance vehicles and armoured cars **The American Arsenal** Ian V. Hogg,2014-11-02 During WWII various U S military agencies produced catalogues of equipment to fill the gaps left by the official War Department manuals which led to inconsistent data appearing in different sources In order to standardize information and properly catalogue all the equipment the U S Ordnance Department put together a master guide published here as The American Arsenal All the information was checked and authenticated by reference to Ordnance Committee

Minutes and similar authorities No other single source provides so much accurate and authentic detail on U S weapons ammunition vehicles and other combat equipment with an authoritative explanation of their development and introduction processes Profusely illustrated with over 900 photographs and drawings the facts and figures are set in context in the introduction by weapons expert Ian V Hogg This is an invaluable reference work for those interested in the military equipment of WWII

*Russian Tanks of World War II* Tim Bean, Will Fowler, 2002 At the start of the campaign on the Eastern Front in the earliest days of Operation Barbarossa it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad Moscow and Stalingrad The ill prepared and under resourced Russian forces were forced to retreat Gradually the balance of the war swung in favour of the Russian forces whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east Critical in the Soviet victory was its armour tanks such as the T 34 proving the equal if not better than some of the tanks available to the Germans This authoritative history of the Soviet forces before and during World War 2 reveals the development of their tactics in the early post revolutionary era right through to the ultimate victory in Berlin in May 1945 The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs many of which have never been seen before The photographs include images of tank training in the 1920s and 1930s on active service and many compelling pictures from some of the major tank battles of the day Over the past five years aided by the opening up of archives in Russia previously closed to western experts there has been a massive growth in interest in the events that occurred on the Eastern Front *Russian Tanks* is an important addition to the literature currently available exploring as it does the vitally important Soviet armour of the period

**American Tanks & AFVs of World War II** Michael Green, 2014-07-20 A comprehensive highly illustrated study of US tanks and other armoured vehicles used in World War II The entry of the US into World War II provided the Allies with the industrial might to finally take the war to German and Japanese forces across the world Central to this was the focus of the American military industrial complex on the manufacture of tanks and armoured fighting vehicles Between 1939 and 1945 88 140 tanks and 18 620 other armored vehicles were built almost twice the number that Germany and Great Britain combined were able to supply In this lavishly illustrated volume armour expert Michael Green examines the dizzying array of machinery fielded by the US Army from the famed M4 Sherman M3 Stuart and M3 Lee through to the half tracks armored cars self propelled artillery tank destroyers armored recovery vehicles and tracked landing vehicles that provided the armoured fist that the Allies needed to break Axis resistance in Europe and the Pacific Publishing in paperback for the first time and packed with historical and contemporary colour photography this encyclopedic new study details the design development and construction of these vehicles their deployment in battle and the impact that they had on the outcome of the war

*The Desert Training Center/California-Arizona Maneuver Area, 1942-1944* Matt C. Bischoff, 2000 With the German Afrika Korps driving across the

North African desert with impunity in 1941 and 1942 the U S Army realized that it might be called upon to assist its British ally in the fight against the Germans and Italians Egypt along with the strategic Suez Canal and the Middle East in general was in danger of being lost to the Axis powers It became imperative that the Axis be expelled from North Africa The U S Army however had never fought a large scale war in a desert environment As a result the Army Ground Forces designated more than 18 000 square miles of the Arizona and California desert as an armored training facility Maj Gen George S Patton Jr was placed in charge of establishing this facility and served as its first commanding officer The facility would thereafter reflect his tough image and relentless training doctrines **Armor** ,2001 Marketing Security Assistance David J.
