Site Reading David J. Alworth, 2018-11-20 Site Reading offers a new method of literary and cultural interpretation and a new theory of narrative setting by examining five sites supermarkets dumps roads ruins and asylums that have been crucial to American literature and visual art since the mid twentieth century Against the traditional understanding of setting as a static background for narrative action and character development David Alworth argues that sites figure in novels as social agents Engaging a wide range of social and cultural theorists especially Bruno Latour and Erving Goffman Site Reading examines how the literary figuration of real material environments reorients our sense of social relations To read the sites of fiction Alworth demonstrates is to reveal literature as a profound sociological resource one that simultaneously models and theorizes collective life Each chapter identifies a particular site as a point of contact for writers and artists the supermarket for Don DeLillo and Andy Warhol the dump for William Burroughs and Mierle Laderman Ukeles the road for Jack Kerouac Joan Didion and John Chamberlain the ruin for Thomas Pynchon and Robert Smithson and the asylum for Ralph Ellison Gordon Parks and Jeff Wall and shows how this site mediates complex interactions among humans and nonhumans The result is an interdisciplinary study of American culture that brings together literature visual art and social theory to develop a new sociology of literature that emphasizes the sociology in literature

The Contingent Object of Contemporary Art Martha Buskirk, 2005-02-18 An exploration of transformations in the nature of the art object and artistic authorship in the last four decades In this book Martha Buskirk addresses the interesting fact that since the early 1960s almost anything can and has been called art Among other practices contemporary artists have employed mass produced elements impermanent materials and appropriated imagery have incorporated performance and

video and have created works through instructions carried out by others Furthermore works of art that lack traditional signs of authenticity or permanence have been embraced by institutions long devoted to the original and the permanent Buskirk begins with questions of authorship raised by minimalists use of industrial materials and methods including competing claims of ownership and artistic authorship evident in conflicts over the right to fabricate artists works Examining recent examples of appropriation she finds precedents in pop art and the early twentieth century readymade and explores the intersection of contemporary artistic copying and the system of copyrights trademarks and brand names characteristic of other forms of commodity production She also investigates the ways that connections between work and context have transformed art and institutional conventions the impact of new materials on definitions of medium the role of the document as both primary and secondary object and the significance of conceptually oriented performance work for the intersection of photography and the human body in contemporary art Buskirk explores how artists active in the 1980s and 1990s have recombined strategies of the art of the 1960s and 1970s She also shows how the mechanisms through which art is presented shape not only readings of the work but the work itself She uses her discussion of the readymade and conceptual art to explore broader issues of authorship reproduction context and temporality

Brown, 2019 *Through the Looking Glass* examines John Cage's interactions and collaborations with avant garde and experimental filmmakers and in turn seeks out the implications of the audiovisual experience for the overall aesthetic surrounding Cage's career As the commercially dominant media form in the twentieth century cinema transformed the way listeners were introduced to and consumed music Cage's quest to redefine music intentionality and expression reflect the similar transformation of music within the larger audiovisual experience of sound film This volume examines key moments in Cage's career where cinema either informed or transformed his position on the nature of sound music expression and the ontology of the musical artwork The examples point to moments of rupture within Cage's own consideration of the musical artwork pointing to newfound collision points that have a significant and heretofore unacknowledged role in Cage's notions of the audiovisual experience and the medium specific ontology of a work of art

Christine Filippone, 2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women's movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women's Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century
