Catalog of Books* ,1996 **Catholic School Journal** ,1964 **ERIC Educational Documents Index, 1966-69: Major descriptors** ,1970 **Hearing Ourselves Think** Ann M. Penrose,Barbara M. Sitko,1993-07-01 In *Hearing Ourselves Think* cognitive process research moves from the laboratory to the college classroom where its rich research tradition continues and an important new set of instructional approaches emerges Each chapter moves from research results to classroom action providing a direct and important link between research theory and practice The book develops the concept of the research based classroom in which students actively examine the processes and contexts of reading and writing and then turn their observations into principles for practice *Hearing Ourselves Think* contributes to a lively new tradition of socio cognitive research in writing and reading exploring the dynamics of cognitive processes as they interact with dimensions of the academic context **ERIC Educational Documents Index** Educational Resources Information Center (U.S.),1966 A subject author institution index which provides titles and accession numbers to the document and report literature that was announced in the monthly issues of *Resources in education* earlier called *Research in education* **Revision Cognitive and Instructional Processes** Linda Allal,L. Chanquoy,Pierre Largy,2012-12-06 *Revision Revisited* LINDA ALLAL LUCILE CHANQUOY University ofGeneva SWitzerland UniversityofNantes France *Revision* is a fundamental component of the writing process So fundamental that for some specialists writing is largely a matter of revising or as Murray 1978 stated Writing is rewriting p 85 Experience with writing does not however automatically translate into increased skill in revision Learning to revise is a lengthy complex endeavor Beginning writers do little revision spontaneously and even experienced writers encounter difficulties in attempting to improve the quality of their texts Fitzgerald 1987 Although revision has been extensively dealt with in the writing and learning to write literature this book proposes to revisit theory and research in this area through a series of new contributions The introduction begins with an overview of what revision encompasses It then examines two parallel interrogations that under lie the chapters assembled here namely 1 What are the implications of research on cognitive processes for instruction in revision 2 What are the questions raised by instructional research for the investigation of cognitive processes of revision A final section presents the chapters of this book **Teaching and Evaluating Writing in the Age of Computers and High-Stakes Testing** Carl Whithaus,2005-04-27 This book takes on a daunting task How do writing teachers continue to work toward preparing students for academic and real world communication situations while faced with the increasing use of standardized high stakes testing Teachers need both the technical ability to deal with this reality and the ideological means to critique the information technologies and assessment methods that are transforming the

writing classroom Teaching and Evaluating Writing in the Age of Computers and High Stakes Testing serves this dual need by offering a theoretical framework actual case studies and practical methods for evaluating student writing By examining issues in writing assessment ranging from the development of electronic portfolios to the impact of state wide standards based assessment methods on secondary and post secondary courses this book discovers four situated techniques of authentic assessment that are already in use at a number of locales throughout the United States These techniques stress interacting with students as communicators using synchronous and asynchronous environments describing the processes and products of student learning rather than enumerating deficits situating pedagogy and evaluation within systems that incorporate rather than exclude local variables and distributing assessment among diverse audiences By advocating for a flexible system of communication based assessment in computer mediated writing instruction this book validates teachers and students experiences with writing and also acknowledges the real world weight of the new writing components on the SAT and ACT as well as on state mandated standardized writing and proficiency exams Christian Home Educators' Curriculum Manual Cathy Duffy,1992 *El-Hi Textbooks & Serials in Print, 2003* ,2003 Bulletin of the Atomic Scientists ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Theorizing Composition** Mary Kennedy,1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory s critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works **Reading-Writing Connections** Mary F. Heller,1999-04 Reprint of 2 e originally published by Addison Wesley Longman This language arts textbook focuses on appropriate methods materials enabling

elementary middle school teachers to integrate reading writing listening speaking in K 8 classrooms **Strategies for E-Learning in Teaching English as a Foreign Language** Mohammed AbdAlgane,Rabea Ali,2024-03-08 This book addresses the urgent need for insights into integrating digital technologies in EFL teaching The book explores strategies for leveraging e learning tools to enhance language learning experiences Methodologically it synthesizes existing literature incorporates case studies and gathers insights from interviews with experienced EFL instructors Key findings highlight the effectiveness of digital strategies in promoting language acquisition engagement and interactivity However limitations include challenges related to technology access and varying digital literacy levels among students The book s impact lies in reshaping EFL pedagogy by bridging traditional methods with contemporary digital resources The contribution to research is evident in synthesizing current scholarship and identifying emerging trends in digital language education Practitioners benefit from practical applications fostering innovation in teaching approaches Digital Pathways in English Pedagogy is a valuable resource fostering a paradigm shift in EFL instruction by embracing the transformative potential of digital technologies
