Bosnia and Herzegovina: Technical Assistance Report-Technical Assistance to Develop a Macroeconomic Framework at the Central Bank of Bosnia and Herzegovina Tibor Hlédik,Maria Arakelyan,Rilind Kabashi,2025-02-26

Technical assistance to develop a macroeconomic framework was delivered to the Central Bank of Bosnia and Herzegovina CBBH between April 2021 and December 2023

The Quarterly Macro Forecasting Framework QMFF developed during this project is a quarterly framework whose main behavioral equations are specified in terms of deviations of real variables from their long run trends

The framework is a novel combination of a gap based modeling approach and financial programming

This novel approach was custom built for the CBBH but it has the flexibility to be adjusted to accommodate the macroeconomic characteristics of various countries and different exchange rate regimes as well as to incorporate backward or forward looking expectation formation

While considerable progress has been achieved in the operation of the QMFF more time and resources are needed to fully utilize and integrate the QMFF as the CBBH's main policy analysis and forecasting tool

Post-Crash Economics and the Covid

Emergency in the Global Economy Abdullah Yusuf, Carlo J. Morelli, Omar Feraboli, 2023-07-28 This book continues the ongoing debate about the need for alternative interdisciplinary and heterodox approaches to teaching economics at university. It deals with challenges currently faced by economists, pursues an interdisciplinary approach to enhance collaboration with academics from disciplines other than economics, and analyses several questions and issues related to the 2007-08 financial crisis and the current Covid-19 emergency. The Covid pandemic has shown the flaws of the current neoliberal model and the inability of mainstream economic theory to address the problems created by the pandemic. The book engages with an academic audience interested in incorporating a wider range of economic approaches in their research and teaching, and with undergraduate and postgraduate economics students who are trying to understand the limitations of their current economics syllabi. The novelty of the book is the active involvement of undergraduate and postgraduate students who contribute to this volume with three chapters. The book will be of interest to a wide range of researchers, students, and teachers interested in interdisciplinary and heterodox economics.
