Macroeconomics Of Monetary Union An Analysis Of The Cfa Franc Zone:

The Macroeconomics of Monetary Union David Fielding,2005-11-04 This book applies contemporary macroeconomic theory and econometric modelling techniques in order to address policy issues relating to the CFA Franc Zone a group of francophone African Countries sharing a common currency that is linked to the French Franc Euro Within this methodological framework the author analyses the way in which the monetary institutions of the CFA influence macroeconomic development and policy formation

The CFA Franc Zone Mr.James M. Boughton,1991-12-01 The CFA franc zone comprises a group of countries in central and west Africa whose currencies have been firmly linked to the French franc since 1948 It combines the features of a currency union with those of an exchange rate peg and an analysis of its effectiveness must examine both dimensions Viewed from the perspective of a currency union among the African countries it would appear that the zone would not constitute an optimum currency area But when France is viewed as an integral part of the system the benefits including discipline credibility and stability in international competitiveness become clearer

Who Gains from Free Trade Rob Vos,2007-01-24 The editors are among the world s leading experts on Latin American development A range of countries across Latin America are studied Latin America examines the success and failure stories of free trade in the US

Targeting Development Richard Black,Howard White,2003-11-20 The Millennium Development Goals accepted by the UN in 2000 are along with the targets set by the OECD in 1996 the subject of this expertly written book Is development achievable in the time frames given How useful were the goals in the first place How far have we come in solving the aching problems of the developing world These questions and more are asked and answered This impressive collection featuring an array of respected contributors and a preface from Mark Malloch Brown of the UNDP will be required reading among development economists and those interested in development studies more generally Perhaps more importantly the lessons learned from this book shall need to be understood and acted upon by policy makers at both national and international levels

Development Dilemmas Melvin D. Ayogu,Don Ross,2005 The new economy is characterized in the developing world by open capital markets and coordinated international regulation neither of which existed in the colonial period

Work, Female Empowerment and Economic Development Sara Horrell,Hazel Johnson,Paul Mosley,2008-02-14 This book discusses how to alleviate poverty in Africa identifying the constraints under which women operate and policies that will aid growth and empower women recognizing the importance of bargaining parameters and the role of assets

Microfinance, Debt and Over-Indebtedness Isabelle Guérin,Solène Morvant-Roux,Magdalena Villarreal,2013-10-15 Although microcredit programmes have long been considered efficient development tools many forms of debt induced distress have emerged in their wake This has brought to light the problem of over indebtedness a topic which has been previously underexplored in the literature This new book from a group of leading scholars explores the manifestations scale and economic and social implications of household over indebtedness in areas conventionally considered

as financially excluded The book approaches debt not only as a financial transaction but also as a form of social bond and offers a socioeconomic analysis of over indebtedness The volume puts forward a broad definition of over indebtedness highlighting its situational and semantic complexity and diversity It provides a close analysis of local conceptions of debt and over indebtedness highlighting frameworks of calculation and the constant renegotiation of their boundaries On top of this it looks far beyond microcredit to examine all the financial practices that individuals juggle The volume argues that over indebtedness has more to do with social inequalities than financial illiteracy and should therefore be understood in the light of global trends of financialization It also reveals the ambiguity of financial inclusion policies and in many respects questions the actions of new credit providers This book will be valuable reading for students researchers and policy makers interested in microfinance and development issues

Latecomer Development Banji Oyelaran-Oyeyinka, Padmashree Gehl Sampath, 2009-12-16 The most important issue for development centres on the debate about the centrality of knowledge technology and innovation to the process of economic development While this much is broadly agreed what is at issue is the precise mechanics of overcoming economic development challenges in different contexts At the heart of it all is about how economies at different levels deploy the unending streams of information and knowledge to developmental ends In time the notion of income convergence between the poorer South and the wealthy North has proved a mirage while a new economic divide has in fact occurred within the South itself and as well between regions and within regions The debate relating to latecomers is thus framed in discussions about regions and countries that arrive late to mastering industrialization in achieving economic prosperity through the use of knowledge In other words a new divide has emerged among the latecomers themselves and with it greater conceptual complexity in the ways of our understanding of the divergent ways of economic development We have thus separated fast followers and new late comers This book enters this debate acutely aware of the complexity of this process The authors argue that economic development is largely driven by innovation concentrating on the dynamics of process product and organizational changes and how they are embedded within specific and varied contextual institutions

Social Protection for Africa's Children Sudhanshu Handa, Stephen Devereux, Douglas Webb, 2010-10-04 Social protection is an increasingly important part of the social policy dialogue in Africa and yet because of its relatively new place in a rapidly evolving agenda evidence on critical design choices such as targeting and on impacts of social protection interventions is mostly limited to case studies or small unrepresentative surveys This impressive collection makes a major contribution to building the evidence base drawing on rigorous analysis of social protection programmes in several African countries as well as original research and thinking on key topical issues in the social protection discourse Social Protection for Africa's Children is divided into four parts The first presents economic and human rights based right arguments for social protection as an integral part of the social policy menu in Africa This is followed by a part on targeting which highlights some of the key policy trade offs faced when deciding between alternative target groups The third part presents rigorous

quantitative evidence on the impact of social cash transfers on children from programmes in South Africa Malawi and Ethiopia and the final part addresses a set of issues related to social justice and human rights This book significantly advances existing knowledge about social protection for children in Africa both conceptually and empirically It makes a strong case for social protection interventions that address the short term amelioration and long term structural needs of children and shows that programming in this sector for children is both feasible and achievable Policy makers and practitioners in this sector will have in this book the theoretical and empirical evidence necessary to advance social protection for Africa s children in the decades to come Furthermore this book should be an essential resource to postgraduates and students focussing on development economics in Africa

Trade Policy, Growth and Poverty in Asian Developing Countries Kishor Sharma, 2003-12-08 Asia constitutes a large portion of the world s population and this new book provides a good selection of contributions that cover trade equity and development in the continent With contributions from such leading experts as Clem Tisdell T N Srinivasan and Gustav Ranis the book s chapters cover countries from Pakistan and India to Korea and Indonesia This book should be required reading for those interested in the economic growth and development of Asian countries

Public Finance and Economic Growth in Developing Countries Stephen Peterson, 2015-04-24 Public finance is crucial to a country s economic growth yet successful reform of public finances has been rare Ethiopia is an example of a country that undertook comprehensive reform of its core financial systems independent of the IMF and the World Bank and successfully transformed itself into one of the fastest growing economies in Africa With Ethiopia s twelve year reform as its guiding case study this book presents new analytical frameworks to help governments develop better financial reforms It shows in detail how four core financial systems budgeting accounting planning and financial information systems can be reformed One of the principal findings presented is that governments must establish basic public financial administration before moving to more sophisticated public financial management Other key findings include the identification of four strategies of reform recognize improve change and sustain the centrality of ongoing learning to the process of reform and the importance of government ownership of reform This book will be of interest to researchers and policymakers concerned with public finance developmental economics and African studies

Economic Transitions to Neoliberalism in Middle-Income Countries Alfredo Saad-Filho, Galip L. Yalman, 2009-12-04 Neoliberalism is based on the systematic use of state power to impose under the veil of non intervention a hegemonic project of recomposition of capitalist rule in most areas of social life The tensions and displacements embedded within global neoliberalism are nowhere more evident than in the middle income countries At the domestic level the neoliberal transitions have transformed significantly the material basis of social reproduction in these countries These transformations include but they are not limited to shifts in economic and social policy They also encompass the structure of property the modality of insertion of the country into the international economy and the domestic forms of exploitation and social domination The political counterpart of these

processes is the limitation of the domestic political sphere through the insulation of markets and investors from social accountability and the imposition of a stronger imperative of labour control allegedly in order to secure international competitiveness. These economic and political shifts have reduced the scope for universal welfare provision and led to regressive distributive shifts and higher unemployment and job insecurity in most countries. They have also created an income concentrating dynamics of accumulation that has proven immune to Keynesian and reformist interventions. This book examines these challenges and dilemmas analytically and empirically in different national contexts. This edited collection offers a theoretical critique of neoliberalism and a review of the contrasting experiences of eight middle income countries: Brazil, China, India, Mexico, South Africa, South Korea, Turkey, and Venezuela. The studies included are interdisciplinary, ranging across economics, sociology, anthropology, international relations, political science, and related social sciences. The book focuses on a materialist understanding of the workings of neoliberalism as a modality of social and economic reproduction and its everyday practices of dispossession and exploitation. It will therefore be of particular interest to scholars in industrial policy, neoliberalism, and development strategy.

Assessing Prospective Trade Policy Oliver Morrissey, 2010-09-30. The European Union (EU) has provided trade preferences to the African, Caribbean, and Pacific (ACP) countries since 1975. To maintain these preferences, a series of economic partnership agreements (EPAs) between the EU and regional groupings of ACP countries are being agreed. Negotiations started around 2003, and many framework agreements have been signed. As multilateral negotiations within the World Trade Organisation have stalled, EPAs are currently the single most important policy issue for ACP trade. This volume assesses EPAs and the potential impact on ACP countries, provides guidance for ACP negotiators in future negotiations, and introduces methods to analyse the impact of future trade reforms. The essential features are that ACP countries commit to remove tariffs on substantially all imports from the EU, and the EU offers improved market access to ACP exporters. For ACP countries, the major impacts will be increased imports from the EU, hence a loss of tariff revenue and increased competition from imports in domestic and regional markets, implying significant adjustment costs which may be offset by some increases in exports to the EU. This collection excellently outlines a variety of analytical methods that can be used to assess the potential economic effects of trade policy reforms, shows how these can be applied to EPAs, and derives implications for the issues that should be addressed in negotiating the details of agreements. This valuable contribution offers a balanced assessment of the issues and should be essential reading for postgraduates and researchers focussing on Development Economics. Furthermore, the book is written in an accessible style and should be an excellent resource for trade negotiators and government officials concerned with trade relations, as well as officials in the European Commission, individual countries, ACP, Commonwealth, EU, and in multilateral organizations: WTO, UNECA, World Bank, UNCTAD.

Culture, Institutions, and Development Jean-Philippe Platteau, Robert Peccoud, 2010-10-04. Does culture matter? This question has taken on added significance since fundamentalist revivalism has recently gained ground in different

parts of the world The old controversy between Max Weber and Karl Marx which centres around the extent to which cultural factors such as social norms and values affect economic growth is of critical importance particularly because of its policy implications Indeed if culture is not an autonomous factor susceptible to influencing economic realities it should not matter and public authorities can dispense with thinking about cultural interventions On the other hand if culture does have a real impact the question arises as to whether it is conducive or detrimental to economic growth political liberalization and the emancipation of individuals among other things Culture Institutions and Development addresses this debate at a concrete level by looking at five important issues the role of tradition and its influence on development the role of religion with special reference to Middle Eastern countries the role of family kinship and ethnic ties in the process of development the relationship between culture and entrepreneurship and the relationship between culture and poverty This collection offers a nuanced view that neither denies nor exaggerates the role of cultural factors in explaining relative growth performances across countries Instead the contributors focus on the dynamic two way relationship between culture and development in a way that stresses policy stakes and the value of multidisciplinary collaboration between economists historians and other social scientists This book will be of interest to postgraduates and researchers in all the social sciences as well as to professionals working in national development agencies international organisations and Non Governmental Organisations

Towards New Developmentalism Shahrukh Rafi Khan, Jens Christiansen, 2010-10-04 The global financial and economic crisis starting in 2007 has provoked the exploration of alternatives to neo liberalism Although neo liberalism has been critiqued from various perspectives these critiques have not coalesced into a concrete alternative in development economics literature The main objective of this book is to name and formulate this alternative identify what is new about this viewpoint and project it on to the academic landscape This book includes contributions from many prominent development economists who are unified by a form of developmental pragmatism Their concern is with the problems of development that preoccupied the pioneers of economic development in the mid twentieth century known as the developmentalists Like the developmentalists the contributors to Towards New Developmentalism are policy oriented and supportive of institutional development and engagement with economic globalization This collection has an over arching concern with promoting social justice and holds the general view of the market as the means to affecting an alternative program of development rather than as a master whose dictates are to be obeyed without question This important collection sets the agenda for new developmentalism drawing on issues such as industrial policy technology competition growth and poverty In broad terms the economic development debate is cast in terms of whether the market is the master an ideological neo liberal perspective or the means to affect change as suggested by the pragmatic perspective that is being termed neo developmentalism This book will be valuable reading to postgraduates and researchers specialising in the area of development studies including within economics international relations political science and sociology

Anti-Poverty Land Reform Issues Never Die M. Riad

El-Ghonemy, 2009-12-16 What can we do to unlock the unrealised potential of the hundreds of millions of rural poor and landless workers The ever topical central theme in this collection of essays is the mixed role of government and the institutionally regulated market in tackling rural poverty and land distribution inequality Drawing on over half a century of M Riad El Ghonemy's academic and field experience in developing countries across Africa Latin America the Middle East and South East Asia this is a comprehensive record of the late twentieth century study of and struggle against rural inequality seen through the eyes of one of its foremost observers Containing a balance of in depth field studies and El Ghonemy's personal observations from 1952 onwards this volume provides the basis for discussion and debate on a range of developmental issues Foremost among these is the appropriate approach both to explain the factors underlying developing countries rural backwardness and to enable them to achieve the Millennium Development Goal of halving the incidence of poverty and hunger by 2015 The compelling argument made here is that redistributive land reform combined with non farm intensive employment opportunities and investment in education within rural areas are necessary to tackle persistent poverty effectively Anti Poverty Land Reform Issues Never Die is essential reading for undergraduate and postgraduate students learning rural development and institutional and development economics M Riad El Ghonemy is Senior Research Associate at the Department of International Development University of Oxford and Research Fellow at the Department of Economics the American University in Cairo and Emeritus Professor Ein Shams University Cairo He is the author of several publications including The Political Economy of Rural Poverty Routledge 1990

Law Reform in Developing and Transitional States

Timothy Lindsey, 2007 Law reform in developing countries has become an increasingly topical subject in recent years A critical issue is why so many law reform projects in developing economies are regarded by their sponsors and recipients as unsuccessful This informative book examines examples of law reform projects in post socialist and post authoritarian states in Asia identifies common problems proposes analytical frameworks for understanding the problems identified Though parallels between Asian models and those in developing states elsewhere in the world are strong the book has been developed to avoid suggestion that the issues covered are somehow peculiarly Asian indeed it is shown that cultural relativist approaches to Asia are unsustainable This is an invaluable reference for those involved in the areas of development economics Asian studies and comparative politics

Industrial Innovation, Networks, and Economic Development Anant Kamath, 2014-11-27 This book offers an innovative examination of how low technology industries operate Based on extensive fieldwork in India the book fuses economic and sociological perspectives on information sharing by means of informal interaction in a low technology cluster in a developing country In doing so the book sheds new light on settings where economic relations arise as emergent properties of social relations This book examines industrial innovation and microeconomic network behaviour among producers and clusters perceiving knowledge diffusion to be a socially spatial as much as a geographically spatial phenomenon This is achieved by employing two methods simulation modelling and

quantitative qualitative and historical social network analysis The simulation model based on its findings motivates two empirical studies one descriptive case and one network study of low tech rural and semi urban traditional technology clusters in Kerala state in southern India These cases demonstrate two contrasting stories of how social cohesion either supports or thwarts informal information sharing and learning This book pushes towards an economic sociology approach to understanding knowledge diffusion and technological learning which perceives innovation and learning as being more social processes than the mainstream view perceives them to be In doing so it makes a significant contribution to the literature on defensive innovation and the role of networks in technological innovation and knowledge diffusion as well as to policy studies of Indian small firm and traditional technology clusters **Credit Cooperatives in India** Biswa Swarup Misra,2010-04-08

Credit cooperatives in India make up one of the largest rural financial systems in the world Playing a vital role in dispensing credit in largely agricultural areas they are also the weakest link in the formal credit delivery system This book provides a valuable case study of the traditional banking system in this developing economy exploring the reasons for the poor performance of credit cooperatives in India and suggesting measures to revitalise them Although this sector has grown along with the micro credit sector to provide finance for the poor and the less creditworthy borrowers financing development still remains a major problem in the developing world However the financial health of credit cooperatives in India has been a matter of perennial concern The author argues that cooperatives hold great promise for financial inclusion if the financial position of the cooperatives can be consolidated Providing a detailed analysis of the historical evolution of cooperatives in India the book establishes the link between different segments of this institutional system and their performance in a commercial sense to show that cooperatives occupy an important place in India s financial edifice as they play a key role in the multi agency framework for rural credit delivery As such the analysis provides a valuable reference for scholars of economics Asian economics and finance *Essays on Balance of Payments Constrained Growth* John McCombie,Tony Thirlwall,2004-03-26 There are many theories concerning the relationship between the pace of development and economic growth in different countries This impressive collection explores the relationship between a country s balance of payments and their rate of economic growth The evidence and ramifications within the book will be of interest to economists and policy makers in developing countries
