Mad Anatomy:

Streetwalking on a Ruined Map Giuliana Bruno, 2021-06-08 Emphasizing the importance of cultural theory for film history Giuliana Bruno enriches our understanding of early Italian film as she guides us on a series of inferential walks through Italian culture in the first decades of this century This innovative approach the interweaving of examples of cinema with architecture art history medical discourse photography and literature addresses the challenge posed by feminism to film study while calling attention to marginalized artists An object of this critical remapping is Elvira Notari 1875 1946 Italy's first and most prolific woman filmmaker whose documentary style work on street life in Naples a forerunner of neorealism was popularly acclaimed in Italy and the United States until its suppression during the Fascist regime Since only fragments of Notari's films exist today Bruno illuminates the filmmaker's contributions to early Italian cinematography by evoking the cultural terrain in which she operated What emerges is an intertextual montage of urban film culture highlighting a woman's view on love violence poverty desire and death This panorama ranges from the city's exteriors to the body's interiors Reclaiming an alternative history of women's filmmaking and reception Bruno draws a cultural history that persuasively argues for a spatial corporal interpretation of film language **White Coat, Clenched Fist** Fitzhugh Mullan, 2006 A doctor tells his own behind the scenes story of the making of a medical man and the disintegration of an American myth

Cataloging Policy and Support Office,2004 **The nature and treatment of rabies, the report made for the Medical press and circular** Thomas Michael Dolan,1879 Mental Disability in Victorian England David Wright,2001-10-04 This book contributes to the growing scholarly interest in the history of disability by investigating the emergence of idiot asylums in Victorian England Using the National Asylum for Idiots Earlswood as a case study it investigates the social history of institutionalization privileging the relationship between the medical institution and the society whence its patients came By concentrating on the importance of patient centred admission documents and utilizing the benefits of nominal record linkage to other non medical sources David Wright extends research on the confinement of the insane to the networks of care and control that operated outside the walls of the asylum He contends that institutional confinement of mentally disabled and mentally ill individuals in the nineteenth century cannot be understood independently of a detailed analysis of familial and community patterns of care In this book the family plays a significant role in the history of the asylum initiating the identification of mental disability participating in the certification process mediating medical treatment and facilitating discharge back into the community By exploring the patterns of confinement to the Earlswood Asylum Professor Wright reveals the diversity of the insane

population in Victorian England and the complexities of institutional committal in the nineteenth century Moreover by investigating the evolution of the Earlswood Asylum it examines the history of the institution where John Langdon Down made his now famous identification of Mongolism later renamed Down s Syndrome He thus places the formulation of this archetype of mental disability within its historical cultural and scientific contexts Total Confinement Lorna A.
