Mühlematter, Helmut Zander, 2021-06-08 The historiographers of religious studies have written the history of this discipline primarily as a rationalization of ideological most prominently theological and phenomenological ideas first through the establishment of comparative philological and sociological methods and secondly through the demand for intentional neutrality This interpretation caused important roots in occult esoteric traditions to be repressed This process of purification Latour is not to be equated with the origin of the academic studies De facto the elimination of idealistic theories took time and only happened later One example concerning the early entanglement is Tibetology where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the Theosophical Society Similarly the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance which hold that all religions have a common origin In this perspective it is not only the history of religious studies which must be revisited but also the partial shaping of religious studies by these traditions insofar as it saw itself as a counter model to occult ideas

*No Religion Higher Than Truth* Maria Carlson, 2015-03-08 Among the various kinds of occultism popular during the Russian Silver Age 1890-1914 modern Theosophy was by far the most intellectually significant This contemporary gnostic gospel was invented and disseminated by Helena Blavatsky an expatriate Russian with an enthusiasm for Buddhist thought and a genius for self promotion What distinguished Theosophy from the other kinds of mysticism the spiritualism table turning fortune telling and magic that fascinated the Russian intelligentsia of the period In answering this question Maria Carlson offers the first scholarly study of a controversial but important movement in its Russian context Carlson's is the only work on this topic written by an intellectual historian not ideologically committed to Theosophy Placing Mme Blavatsky and her secret doctrine in a Russian setting the book also discusses independent Russian Theosophical circles and the impact of the Theosophical Anthroposophical schism in Russia It surveys the vigorous polemics of the Theosophists and their critics demonstrates Theosophy's role in the philosophical dialogues of the Russian creative intelligentsia and chronicles the demise of the movement after 1917 By exploring this long neglected aspect of the Silver Age Carlson greatly enriches our knowledge of fin de siècle Russian culture Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
