Hermann Astleitner, 2024 This book summarizes the results of a multimethod project on school development performed during the COVID 19 pandemic It combines innovative theoretical approaches and findings as well as long term online research activities in which student assessments delivered the bases for adaptive teacher trainings The theoretical foundations relate to sustainable conditions of classroom and school development an approach to personality development and a focus on instructional coherence Empirical findings concern the development of learning strategy use and classroom needs over time as well as a model for effective teacher education and related course evaluations A further research area concerns advanced perspectives from digital learning research such as the effects of social media in classrooms mixed and virtual learning materials computer based collaborative learning and innovative interventions in media research The book is aimed at researchers teacher trainers instructional designers and practitioners in the field of school development as well as teacher education **Whose Math Is It?** Joseph Michael Assof, 2024-07-31 Foster Confidence and Ownership in Every Math Student When it comes to math does it feel like some students embrace problem solving with agency and ownership while others are confused or simply along for the ride How do educators bridge that divide to develop competence confidence and

ownership in every student The answers lie in establishing clear and effective measures for success Steeped in the principles of success criteria Whose Math Is It provides educators with everything they need to create a classroom environment where students feel empowered to step up and take the lead Divided into two parts this must read guide first defines what success looks like for math students then provides the research based best practices teachers can use to help students take control of their learning Learn how to Define and establish effective success criteria in a mathematics classroom Implement a variety of strategies to support student ownership and success Develop class wide social norms specific to math Promote metacognition through self regulated learning self assessment and feedback Reinforce student ownership through structured peer interactions and collaboration Whose Math Is It is an essential resource for K 12 math teachers who want to empower their students to actively own their mathematics learning By emphasizing the importance of success criteria promoting self regulated learning and developing math specific social norms this book provides practical strategies for creating an environment where when asked Whose math is it every student can emphatically respond My math Gender differences and disparities in socialization contexts: How do they matter for healthy relationships, wellbeing, and achievement-related outcomes? Caterina Fiorilli,Daniela Barni,Jan Retelsdorf,Joyce Endendijk,2023-01-05 Math Trailblazers 2E G4 Teacher Implemenation Guide ,2003 A research based NSF funded K5 mathematics program integrating math science and language arts Includes a Spanish translantion of instuctional units Quantitative Measures of Mathematical Knowledge Jonathan Bostic,Erin Krupa,Jeffrey Shih,2019-04-29 The aim of this book is to explore measures of mathematics knowledge spanning K 16 grade levels By focusing solely on mathematics content such as knowledge of mathematical practices knowledge of ratio and proportions and knowledge of abstract algebra this volume offers detailed discussions of specific instruments and tools meant for measuring student learning Written for assessment scholars and students both in mathematics education and across educational contexts this book presents innovative research and perspectives on quantitative measures including their associated purpose statements and validity arguments *Math Trailblazers 2E G3 Teacher Implemenation Guide* TIMS Project,2004 A complete research based K 5 mathematics program integrating math science and language arts The program embodies the NCTM Principles and standards for school mathematics and is based on the ideas that mathematics is best learned by solving problems in real world contexts and that a curriculum should balance conceptual understanding and procedural skill P 4 of cover **Exploring Mathematics Through Play in the Early Childhood Classroom** Amy Noelle Parks,2015-04-28 This practical book provides pre and inservice teachers with an understanding of how math can be learned through play The author helps teachers to recognize the mathematical learning that occurs during play to develop strategies for mathematizing that play and to design formal lessons that make connections between mathematics and play Common Core State Standards are addressed throughout the text to demonstrate the ways in which play is critical to standards based mathematics teaching and to help teachers become more familiar with these standards Classroom examples illustrate that

unlike most formal tasks play offers children opportunities to solve nonroutine problems and to demonstrate a variety of mathematical ways of thinking such as perseverance and attention to precision This book will help put play back into the early childhood classroom where it belongs Book Features Makes explicit connections to play and the Common Core State Standards in Mathematics Offers many examples of free play activities in which mathematics can be highlighted as well as formal lessons that are inspired by play Provides strategies for making assessments more playful helping teachers meet increasing demands for assessment data while also reducing child stress Includes highlight boxes with recommended resources questions for reflection key research findings vocabulary lesson plan templates and more This is one of those books that I wish I had written It is smart readable relevant and authentically focused on children From the Foreword by Elizabeth Graue Sorenson Professor of Early Childhood Education University of Wisconsin In this deceptively easy to read book Amy Parks explains two things that could make a world of difference in early childhood and elementary classrooms Mathematics isn't something in a workbook it's a fascinating part of the real world And playing in school isn't a luxury it's an essential context for learning about all sorts of things including mathematics Through vignettes of children learning mathematics as they play Parks helps teachers recognize their answerability to the moment eschewing someone else's determination of best practice in favor of what works with actual children eager to learn mathematics Rebecca New School of Education University of North Carolina at Chapel Hill
