Madison Vine:

Empire of Vines Erica Hannickel, 2013-10-09 The lush sun drenched vineyards of California evoke a romantic agrarian image of winemaking though in reality the industry reflects American agribusiness at its most successful Nonetheless as author Erica Hannickel shows this fantasy is deeply rooted in the history of grape cultivation in America Empire of Vines traces the development of wine culture as grape growing expanded from New York to the Midwest before gaining ascendancy in California a progression that illustrates viticulture's centrality to the nineteenth century American projects of national expansion and the formation of a national culture Empire of Vines details the ways would be gentleman farmers ambitious speculators horticulturalists and writers of all kinds deployed the animating myths of American wine culture including the classical myth of Bacchus the cult of terroir and the fantasy of pastoral republicanism Promoted by figures as varied as horticulturalist Andrew Jackson Downing novelist Charles Chesnutt railroad baron Leland Stanford and Cincinnati land speculator Nicholas Longworth known as the father of American wine these myths naturalized claims to land for grape cultivation and legitimated national expansion Vineyards were simultaneously lush and controlled bearing fruit at once culturally refined and naturally robust laying claim to both earthy authenticity and social pedigree The history of wine culture thus reveals nineteenth century Americans fascination with the relationship between nature and culture

Convergence Culture Henry Jenkins, 2006-08-01 Winner of the 2007 Society for Cinema and Media Studies Katherine Singer Kovacs Book Award 2007 Choice Outstanding Academic Title A classic study on the dynamic between an individual and different media channels Convergence Culture maps a new territory where old and new media intersect where grassroots and corporate media collide where the power of the media producer and the power of the consumer interact in unpredictable ways Henry Jenkins one of America's most respected media analysts delves beneath the new media hype to uncover the important cultural transformations that are taking place as media converge He takes us into the secret world of Survivor Spoilers where avid internet users pool their knowledge to unearth the show's secrets before they are revealed on the air He introduces us to young Harry Potter fans who are writing their own Hogwarts tales while executives at Warner Brothers struggle for control of their franchise He shows us how The Matrix has pushed transmedia storytelling to new levels creating a fictional world where consumers track down bits of the story across multiple media channels Jenkins argues that struggles over convergence will redefine the face of American popular culture Industry leaders see opportunities to direct content across many channels to increase revenue and broaden markets At the same time consumers envision a liberated public sphere free of network controls in a decentralized media environment Sometimes corporate and grassroots efforts reinforce each other creating closer more rewarding relations between media producers and consumers Sometimes these two forces are at war Jenkins provides a riveting introduction to the world where every story gets told and every brand gets sold across multiple media platforms He explains the cultural shift that is occurring as consumers fight for control across disparate
