Teacher educator learning has received increasing attention in recent decades. Although the professional development needs of teacher educators has become more visible, the spaces where teacher educators learn to teach teachers is less clear. How do teacher educators learn? What do they learn? And where does this learning take place? This edited volume provides answers to these questions through an unpacking of the programs, courses, and professional learning spaces in which beginning teacher educators learn. In this edited volume, chapters provide profiles or cases of the spaces in which beginning university-based teacher educators are prepared. University-based teacher educator learning occurs in a range of settings. As highlighted in this volume, such learning spaces include doctoral program concentrations or minors focused on the development of teacher educator identity and practice, individual doctoral courses dedicated to teacher education, formalized program experiences that assist in the preparation of teacher educators, and mentoring or critical friendship collaborations through which doctoral students learn about teacher education with peers or from experienced teacher educators.

Literacy and Learning in the Content Areas Sharon Kane, 2017-07-05. The 3rd Edition of *Literacy Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping, webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content communities and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

Applied Literacy in the Middle Grades Lawrence G. Erickson, 2003. This book describes ways of teaching children to employ their reading, writing, listening, and speaking skills to access, assess, and communicate information. *Applied Literacy in the Middle Grades* addresses the needs of middle school reading courses. This much-needed book focuses on and is intended for classroom teachers, offering a rich source of real classroom applications. Erickson provides superb ideas about motivating students, meeting state learning goals, teaching critical thinking, and evaluating primary and secondary sources of information. A goldmine of detailed material from actual classrooms, grades 5-8, helps illustrate literacy activities in science, language arts, and social sciences. Additional key topics include inquiring, teaching thematic units, schoolwork connections, literacy and content areas, and accountability. Middle school teachers, curriculum developers, literacy coordinators, and school administrators.
