Moral Differences Truth Justice Conscience In A World Of Conflict:

Moral Differences Richard W. Miller, 2014-07-14 In a wide ranging inquiry Richard W Miller provides new resources for coping with the most troubling types of moral conflict disagreements in moral conviction conflicting interests and the tension between conscience and desires Drawing on most fields in philosophy and the social sciences including his previous work in the philosophy of science he presents an account of our access to moral truth and within this framework develops a theory of justice and an assessment of the role of morality in rational choice In Miller s view we are often in a position to claim that our moral judgments are true descriptions of moral facts But others relying on contrary ways of moral learning would reject truths that we are in a position to assert in dissent that does not depend on irrationality or ignorance of relevant evidence or arguments With this mixed verdict on moral realism Miller challenges many received views of rationality scientific method and the relation between moral belief and moral choice In his discussion of justice Miller defends the adequacy for modern political choices of a widely shared demand that institutions be freely and rationally acceptable to all Drawing on social research and economic theories he argues that this demand has dramatically egalitarian consequences even though it is a premise of liberals and conservatives alike In the final chapters Miller investigates the role and limits of morality in the choice of conduct arguing for new perspectives on reason and impartiality Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Illusions of Paradox Richmond Campbell, 1998 Modern epistemology has run into several paradoxes in its efforts to explain how knowledge acquisition can be both socially based and thus apparently context relative and still able to determine objective facts about the world In this important book Richmond Campbell attempts to dispel some of these paradoxes to show how they are ultimately just illusions of paradox by developing ideas central to two of the most promising currents in epistemology feminist epistemology and naturalized epistemology Campbell s aim is to construct a coherent theory of knowing that is feminist and naturalized Illusions of Paradox will be valuable for students and scholars of epistemology and women s studies

Knowledge and Its Place in Nature Hilary Kornblith, 2002-08 Philosophers have traditionally used conceptual analysis to investigate knowledge Hilary Kornblith argues that this is misguided it is not the concept of knowledge that we should be investigating but knowledge itself a robust natural phenomenon suitable for scientific study Cognitive ethologists not only attribute intentional states to non human animals they also speak of such animals as having knowledge and this talk of knowledge does causal and explanatory work within their theories The account of knowledge which emerges from this literature is a version of reliabilism knowledge is reliably produced true belief This

account of knowledge is not meant merely to provide an elucidation of an important scientific category. Rather Kornblith argues that knowledge in this very sense is what philosophers have been talking about all along. Rival accounts are examined in detail and it is argued that they are inadequate to the phenomenon of knowledge even of human knowledge. One traditional objection to this sort of naturalistic approach to epistemology is that in providing a descriptive account of the nature of important epistemic categories it must inevitably deprive these categories of their normative force. But Kornblith argues that a proper account of epistemic normativity flows directly from the account of knowledge which is found in cognitive ethology. Knowledge may be properly understood as a real feature of the world which makes normative demands upon us. This controversial and refreshingly original book offers philosophers a new way to do epistemology.

What Is Non-fiction Cinema? Trevor Ponech, 2021-11-28 Trevor Ponech has written a serious and pathbreaking study of how to define non-fiction cinema. Working from the position that no cinematic representation is wholly factual, Ponech argues that what determines whether a film is fiction or non-fiction is the filmmaker's intention. Persuasively defending this unique position, the author provides a philosophically rigorous analysis of the communicative practices of filmmakers. In *What Is Non-Fiction Cinema*, Trevor Ponech has written a serious and pathbreaking study of how to define non-fiction cinema. Working from the position that no cinematic representation is wholly factual, Ponech argues that what determines whether a film is fiction or non-fiction is the filmmaker's intention. Persuasively defending this unique position, the author provides a philosophically rigorous analysis of the communicative practices of filmmakers. In making his case, Ponech cogently presents the other major theoretical positions regarding documentary cinema and shows why each is incomplete. The result is a cutting edge philosophical inquiry into purposiveness in film.

The Capacity to Govern Yehezkel Dror, 2012-12-06 The inadequacies of contemporary forms of governance are increasingly recognized: the brain drain from politics, distrust of governments, the danger of mass media and money-dominated elections, and the failure of governments to find good policy options on major issues. Industry, civil society, and non-governmental organizations, however important, cannot compensate for government's incapacity to shape the future which only it is democratically entitled to do. Radical improvements in governance are urgently needed but salient proposals are scarce. This book diagnoses contemporary governments as obsolete and proposes changes in values, structures, staffing, public understanding, and political culture to equip governance for the radically novel challenges of the 21st century. This is the first Report dealing with governance commissioned and approved by the Club of Rome, testifying to the significance of this book.

Moral Disagreements Christopher W. Gowans, 2013-04-03 Can moral disagreements be rationally resolved? Can universal human rights be defended in face of moral disagreements? The problem of moral disagreement is one of the central problems in moral thinking. It also provides a stimulating stepping stone to some of the perennial problems of philosophy such as relativism, scepticism, and objectivity. *Moral Disagreements* is the first anthology to bring together classic and contemporary readings on this key topic. Stackhouse, Peter J. Paris, 2009-03-15 The promise and the threat of globalization are examined using the tools of theological ethics to understand and evaluate the social contexts of life at the deepest moral and spiritual levels **Geographic Thought** George L.
