On Calculating The Factor Of Chance In Language Comparison:

On Calculating the Factor of Chance in Language Comparison Donald Ringe, 2007-12 While all human languages are likely to be genetically related the remoter relationships cannot be demonstrated by reliable linguistic methods because the languages in question have diverged too much Any demonstration of a relationship between languages depends on finding words only elementary probability theory is needed to address the problem The author discusses strictly limited tightly controlled types of similarity between words because those are easiest to understand then he discusses more complex cases Illustrations

Linguistics Today □ Facing a Greater Challenge Piet van Sterkenburg, 2004-10-13 Every five years the Permanent International Committee of Linguists CIPL organises a world congress for linguists And every five years the Committee faces the challenge of presenting a programme at the highest possible level The CIPL Executive Committee decided for the Congress planned for 2003 in Prague to focus on four major topics which play an important role in today's linguistic debate 1 Typology 2 Endangered Languages 3 Methodology and Linguistics including fieldwork and 4 Language and the mind Leading experts have introduced the four themes in their plenary lectures in the course of the congress which served as a basis for the articles presented in the current volume This book should be a welcome tool for all linguists wishing to find their way quickly in current developments A CD Rom containing the full proceedings of the Prague Congress is included

The Comparative Method Reviewed Mark Durie, Malcolm Ross, 1996-05-16 Historical reconstruction of languages relies on the comparative method which itself depends on the notion of the regularity of change The regularity of sound change is the famous Neogrammarian Hypothesis sound change takes place according to laws that admit no exception The comparative method however is not restricted to the consideration of sound change and neither is the assumption of regularity Syntactic morphological and semantic change are all amenable in varying degrees to comparative reconstruction and each type of change is constrained in ways that enable the researcher to distinguish between regular and more irregular changes This volume draws together studies by scholars engaged in historical reconstruction all focussing on the subject of regularity and irregularity in the comparative method A wide range of languages are represented including Chinese Germanic and Austronesian

Historical Linguistics and the Comparative Study of African Languages Gerrit Jan Dimmendaal, 2011 This advanced historical linguistics course book deals with the historical and comparative study of African languages The first part functions as an elementary introduction to the comparative method

involving the establishment of lexical and grammatical cognates the reconstruction of their historical development techniques for the subclassification of related languages and the use of language internal evidence more specifically the application of internal reconstruction Part II addresses language contact phenomena and the status of language in a wider cultural historical and ecological context Part III deals with the relationship between comparative linguistics and other disciplines In this rich course book the author presents valuable views on a number of issues in the comparative study of African languages more specifically concerning genetic diversity on the African continent the status of pidginised and creolised languages language mixing and grammaticalisation

The Indo-European Controversy Asya Pereltsvaig, Martin W. Lewis, 2015-04-30 Over the past decade a group of prolific and innovative evolutionary biologists has sought to reinvent historical linguistics through the use of phylogenetic and phylogeographical analysis treating cognates like genes and conceptualizing the spread of languages in terms of the diffusion of viruses Using these techniques researchers claim to have located the origin of the Indo European language family in Neolithic Anatolia challenging the near consensus view that it emerged in the grasslands north of the Black Sea thousands of years later But despite its widespread celebration in the global media this new approach fails to withstand scrutiny As languages do not evolve like biological species and do not spread like viruses the model produces incoherent results contradicted by the empirical record at every turn This book asserts that the origin and spread of languages must be examined primarily through the time tested techniques of linguistic analysis rather than those of evolutionary biology

The Oxford Handbook of Historical Phonology Patrick Honeybone, Joe Salmons, 2015 This critical overview examines every aspect of the field including its history key current research questions and methods theoretical perspectives and sociolinguistic factors The authors represent leading proponents of every theoretical perspective The book is a valuable resource for phonologists and a stimulating guide for their students

Genetic Linguistics Joseph Greenberg, 2005-03-17 This book collects Joseph Greenberg s most important writings on the genetic classification of the world s languages William Croft sets the work in context and considers its impact and the bitter controversy it excited

Proto-Australian Mark Harvey, Robert Mailhammer, 2024-08-19 This book is the first full evaluation of the Proto Australian hypothesis which proposes that most Australian languages have a common ancestor Proto Australian PA Using the standard methodologies of historical linguistics the authors show that nearly all Australian languages descend from PA Given that PA was a single language it was spoken only in a small area of Australia Its descendants have spread across the continent Current theories of language spread do not offer clear motivations for large scale spread in hunter gatherer economies This raises significant questions for analyses of Australian prehistory and archaeology specifically and more widely for general theories of hunter gatherer prehistory and language spread

Archaeology and Language I Roger Blench, Matthew Spriggs, 2003-09-02 Archaeology and Language I represents groundbreaking work in synthesizing two disciplines that are now seen as interlinked linguistics and archaeology This

volume is the first of a three part survey of innovative results emerging from their combination Archaeology and historical linguistics have largely pursued separate tracks until recently although their goals can be very similar While there is a new awareness that these disciplines can be used to complement one another both rigorous methodological awareness and detailed case studies are still lacking in literature Archaeology and Language I aims to fill this lacuna Exploring a wide range of techniques developed by specialists in each discipline this first volume deals with broad theoretical and methodological issues and provides an indispensable background to the detail of the studies presented in volumes II and III This collection deals with the controversial question of the origin of language the validity of deep level reconstruction the sociolinguistic modelling of prehistory and the use and value of oral tradition The Syllable in Speech Production Barbara L. Davis, Krisztina Zaido, 2010-10-18 As a testament to the scope of Peter MacNeilage's scholarly work across his 40 year career contributions to this tribute volume represent a broad spectrum of the seminal issues addressed by phonetic and evolutionary science over a number of years Approaches to the problems raised by attempting to understand these fundamental topics are illustrated in the broad diversity of paradigms represented in the volume This diversity in itself is a tribute to the breadth of scholarly questions pursued by MacNeilage across his career Chapters are arranged around five thematic areas Two themes Evolutionary Perspectives on Speech Production and Acquisition of Speech reflect the major thrust of Peter's scholarly career over the past 25 years The other themes are reflective of the broad implications of MacNeilage's work for scholars in disparate scientific domains One of the strengths of this volume is the unitary focus of contributions by scientists from diverse scientific backgrounds in considering the applicability of the Frame Content Theory within their own scholarly perspectives Thematic strands in the volume include Evolutionary Perspectives on Speech Production Neurobiological Aspects of Speech Perception Action Relationships Acquisition of Speech Production Skill Modeling and Movement Alternative Perspectives on the Syllable Evolutionary Linguistics April McMahon, Robert McMahon, 2012-10-11 How did the biological brain and behavioural structures underlying human language evolve This is an introduction to the interdisciplinary debates **The Zuni Enigma** Nancy Yaw Davis, 2001-11 Did a group of 13th century Japanese journey to the American Southwest there to merge with the people language and religion of the Zuni tribe That is the question proposed by an anthropologist in The Zuni Enigma 16 illustrations **Reconstructing Syntax**, 2020-06-15 During several decades syntactic reconstruction has been more or less regarded as a bootless and an unsuccessful venture not least due to the heavy criticism in the 1970s from scholars like Watkins Jeffers Lightfoot etc This fallacious view culminated in Lightfoot's 2002 625 conclusion i f somebody thinks that they can reconstruct grammars more successfully and in more widespread fashion let them tell us their methods and show us their results Then we ll eat the pudding This volume provides methods for the identification of i cognates in syntax and ii the directionality of syntactic change showcasing the results in the introduction and eight articles These examples are offered as both tastier and also more nourishing than the pudding Lightfoot had in

mind when discarding the viability of reconstructing syntax **Languages of the Himalayas** George van Driem, 2022-09-12 The survey work *Languages of the Himalayas* provides a bird's eye view of Himalayan languages and language communities. It also constitutes a primary source for much new hitherto unpublished data on several languages. The demographic mosaic of the Himalayas today is viewed in a historical and comparative linguistic perspective. The reader will find an outline of the historical and prehistorical developments that have determined the modern ethnolinguistic composition of the Himalayan region involving various independent linguistic stocks or language families. Maps illustrate the distribution of language communities and trace the routes of ancient migrations. There is an illuminating discussion of grammatical features found in Himalayan languages. The print edition is available as a set of two volumes 9789004103900 **Language History, Language Change, and Language Relationship** Hans Henrich Hock, Brian D. Joseph, 2009-08-17 Why does language change? Why can we speak to and understand our parents but have trouble reading Shakespeare? Why is Chaucer's English of the fourteenth century so different from Modern English of the late twentieth century that the two are essentially different languages? Why are Americans and English one people divided by a common language? And how can the language of Chaucer and Modern English or Modern British and American English still be called the same language? The present book provides answers to questions like these in a straightforward way aimed at the non-specialist with ample illustrations from both familiar and more exotic languages. Most chapters in this new edition have been reworked with some difficult passages removed, other passages thoroughly rewritten, and several new sections added, e.g. on language and race and on Indian writing systems. Further, the chapter notes and bibliography have all been updated. The content is engaging, focusing on topics and issues that spark student interest. Its goals are broadly pedagogical, and the level and presentation are appropriate for interested beginners with little or no background in linguistics. The language coverage, for example, goes well beyond what is usual for books of this kind, with a considerable amount of data from various languages of India. Language George Melville Boring, Bernard Bloch, 2002 Proceedings of the annual meeting of the Society in v 1 11 1925-34. After 1934 they appear in *Its Bulletin*. *Trask's Historical Linguistics* Robert McColl Millar, R. L. Trask, 2023-05-18 *Trask's Historical Linguistics* provides an accessible introduction to historical linguistics, the study of language change over time. This engaging book is illustrated with language examples from all six continents and covers the fundamental concepts of language change, methods for historical linguistics, linguistic reconstruction, sociolinguistic aspects of language change, language contact, the birth and death of languages, language and prehistory, and the issue of very remote relations. The fourth edition of this renowned textbook is fully revised and updated and covers the most recent developments in historical linguistics, including a thorough reworking of sections on morphological and syntactic change, incorporating progress in areas such as grammaticalization and the discussion of the Indo-European homeland. Discussion and analysis of folk historical linguistics and its connection with some of the more eccentric views of professional linguists. An expanded discussion of language

contact historical sociolinguistics and language planning including a discussion of contemporary competing views on the genesis and nature of creoles and their importance in our understanding of radical linguistic change Updated support material including suggestions for essay questions and a larger number of supporting examples of the phenomena described in the book Trask's *Historical Linguistics* is essential reading for advanced undergraduate and postgraduate students of historical linguistics as well as any student looking for a grounded introduction to the English language

Crosslinguistic Influence in Second Language Acquisition Rosa Alonso Alonso, 2016-01-11 This volume provides an unprecedented insight into current approaches to crosslinguistic influence CLI The collection investigates a range of themes including linguistic relativity the possible contributions of neurolinguistics the problem of cognitive development and the role of the frequency of structures in acquisition from distinct overlapping and complementary perspectives Chapters focusing on vocabulary morphosyntactic categories semantic structures and phonetic and phonological structures feature in the volume as do over 20 languages in order to offer new insights into both theoretical and empirical issues in CLI including the consequences of great or little similarity in structures between languages The relevance of CLI research for teaching is discussed in a number of chapters as is the phenomenon of multilingualism The collection will appeal to researchers graduate and postgraduate students teachers and professionals interested in the field of CLI in SLA

Principles of Syntactic Reconstruction Gisella Ferraresi, Maria Goldbach, 2008 This is a collection of state of the art papers in the field of syntactic reconstruction It treats a range of topics which are representative of current debates in historical syntax The novelty and merit of the present book is the editors believe that in contrast to most previous work on diachronic syntax it combines the perspectives of the traditional philological research on syntactic reconstruction with the insights of modern syntactic theory as it is emphasised in the Foreword by Giuseppe Longobardi The volume includes articles by well recognized researchers in historical linguistics with a focus on syntactic change In the present volume syntactic reconstruction is discussed from a variety of angles including historical linguistics phenomena of language contact generative approaches as well as typological and variationist research In the articles languages from a diverse range of families are discussed including Indo European North and South Caucasian Sino Tibetan and Turkic
