Oakey, 1985 Technological change economic implications regional development Innovation location of industry research and development public sector machinery industry information technology Graphs maps references statistical tables **High-Technology Development in Regional Economic Growth** Byung-Rok Choi, 2019-06-04 This title was first published in 2003 Korea has had considerable success in developing its high technology industries and these have become significant employers in this region By analysing the situation in Korea this book explores the effects of dynamic externalities on the growth of regional employment in the high technology industries It puts forward innovative simultaneous equation models to test three sets of hypotheses related to so called Jacobs and MAR effects differentiated by firm size organizational type and product Clear evidence is found for endogenous technological progress marked by positive feedback especially for small firms in diversified high technology enclaves There are technological externalities associated with knowledge spillovers and local employment has indirect effects on employment growth via dynamic externalities The implications for local economic development policy are outlined in a concluding section **The Regional Economics of Technological Transformations** Roberta Capello, Camilla Lenzi, 2021-08-30 The Regional Economics of Technological Transformations provides a comprehensive overview of 4 0 technological transformations in Europe and their socio economic impact with a particular emphasis on the regional dimension of the phenomena The authors employ extensive original data and robust quantitative methods to analyse technological change in all regions of the 27 EU countries plus the UK and shed light on this trend for Europe and beyond Structured in four parts the book first looks at conceptual definitions empirical measurements and expected impacts on both the economic performance GDP and productivity growth and the labour market and then moves on to analyse where 4 0 technological transformation actually takes place in Europe and the reasons for this Next it offers original empirical evidence on the impacts of the different transformations and of their intertwined effects on both the economy and the society Finally the book explores the policy implications of this technological transformation This book will be valuable reading for advanced students researchers and policymakers working across regional economics industrial economics and innovation policy It will be of primary interest to regional scientists interested in the field who may enjoy the conceptual and empirical solutions to the study of a very complex timely and still largely unexplored theme Sociologists engineers and political economists can benefit from the book s analysis noting the urgency of the development of new ethical rules governing the new digital and labour markets Finally the book may appeal to policymakers interested in opportunities to increase regional competitiveness and sustainability goals through the advent of 4 0 technologies Technology, Innovation, and Regional Economic Development , 1983-05 **Knowledge Flows, Technological Change and Regional Growth in the European Union** Małgorzata Runiewicz-Wardyn, 2013-06-14 The book provides conceptual and empirical insights into the complex relationship

between knowledge flows and regional growth in the EU The author critically scrutinizes and enhances the RIS Regional Innovation System approach discussing innovation as a technological institutional and evolutionary process Moreover she advances the ongoing discourse on the role of space and technological proximity in the process of innovation and technological externalities The book closes with an investigation of the role of technological change and knowledge spillovers in the dynamic growth and catching up of EU regions *Routledge Library Editions: Economic Geography*

Various,2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization **The Social and Economic Impact of New Technology 1978-84: A Select Bibliography**

Leslie Grayson,2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts **New Technology and Regional Development**

Bert Van Der Knapp,Egbert Wever,2003-08-16 First Published in 2004 Since the second half of the seventies a period of economic recession a growing interest for technological change can be noticed in all old industrial countries The reason for this phenomenon is the conviction that the economic future of these countries will depend to a large degree on their ability to create new products and processes and to make these commercially viable Hence the stimulation and subsidising of all kinds of Research and Development R D activities by the governments of these countries Against this background it was certainly not unexpected that the IGU Commission on Industrial Change presided by Godfrey Linge decided to organise a congress on

Technology and Industrial Change This congress was held in August 1985 at Nijmegen in the Netherlands In this book some of the papers presented there are published We are very happy that we were allowed to include the very interesting contributions of the representatives of Philips in Eindhoven and of the European Commission in Brussels Technological Change and Regional Development in Europe Ludwig Schätzl,Javier Revilla Diez,2012-12-06 This book presents the findings of the extensive research programme funded by the Deutsche Forschungsgemeinschaft German Research Council and entitled Technological Change and Regional Development in Europe The goal of this programme was to carry out research by means of empirical surveys into the relationship between technological change and regional development Over a period of six years a total of 50 research projects have been undertaken in three phases each lasting two years This research programme has succeeded in actively involving leading German regional scientists from many universities as well as non university research institutions In addition numerous research projects were carried out in close co operation with internationally renowned partners We should like to express our gratitude for the support provided by the Deutsche Forschungsgemeinschaft Without their financial backing of the research programme it would not have been possible to undertake such an ambitious project Thanks also go to the contributors of this volume for their willingness to participate in our joint project We wish in addition to acknowledge the contribution of Prof Dr Philip Cooke whose refereeing of the chapters has enhanced the quality of the work presented here Finally our thanks go to Angela Spence for her expert editorial assistance linguistic editing and the preparation of the Index and also Franco Vaio for taking care of the technical aspects and production of the final copy Their combined efforts have been crucial for successfully bringing together contributions from so many different authors in a single volume Globalization and Regional Economic Modeling Russel Cooper,Kieran Donaghy,Geoffrey Hewings,2007-09-23 Globalization is affecting regional economies in a broad spectrum of aspects from labor market conditions and development policies to climate change To understand better how this works we need both conceptual and methodological contributions We need new schemes to organize our thinking direct our attention and frame thought experiments on the basis of which guidance may be offered And we need methodological innovations that enable us to carry out studies and thought experiments at levels of spatial and temporal resolution and formal complexity adequate to capture and account for the phenomena that characterize globalization The chapters of this volume written by an international cast of eminent regional scientists represent contributions of both types in many cases introducing and demonstrating the use of new tools for analyzing and understanding enormous changes underway in regional economies around the world *Impact of State Restructuring on Indonesia's Regional Economic Convergence* Adiwan Fahlan Aritenang,2017-03-09 The creation of the ASEAN Free Trade Area AFTA in 1992 and decentralization in 1999 mark the state restructuring in Indonesia This book analyses the impact of state restructuring on regional economic development in Indonesia between 1993 and 2010 Regional economic analysis shows persistent and severe regional disparities throughout

the period Particularly econometrics study found that decentralization has accelerated regional disparities whilst the AFTA effect is insignificant on regional economic growth Furthermore historical institutionalism analysis on two cities the manufacturing industry in Batam and the creative economy in Bandung shows that past and embedded local institutions provide the capacity to adapt and create new development paths The book suggests the importance of local specific policies that embrace local knowledge and institutions to develop regional specialization and competitive advantage This book fills the gap in Indonesian literature that lacks studies on the integrated impact of decentralization and trade liberalization both economically and politically

Renewing Cities Ross J. Gittel, 2014-07-14 The cities of Lowell and New Bedford in Massachusetts Jamestown in New York and McKeesport in Pennsylvania have all undergone years of adversity and decline their economic bases having been badly damaged by structural changes in the national economy particularly in the manufacturing sector In situations like these can local development efforts make a difference Ross Gittel answers in the affirmative This interdisciplinary work focuses on comparative case studies of the four cities The book reveals how public private and community based local economic development initiatives affect local economic performance what works and what does not work City leaders and institutions can help reorganize and reshuffle local resources with results that include increased investment greater effort by local individuals and institutions more cooperation among different development interests and improvement in city economic positioning relative to the regional economy and local development cycles Gittel emphasizes the possibility of shifting from a zero sum game attracting jobs from elsewhere toward the goal of converting underutilized local resources to higher value uses through alternative forms of economic and political organization Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Regional Economic Outlook, October 2018, Sub-Saharan Africa International Monetary Fund. African Dept., 2018-10-11 The macroeconomic outlook for sub Saharan Africa continues to strengthen Growth is expected to increase from 2.7 percent in 2017 to 3.1 percent in 2018 reflecting domestic policy adjustments and a supportive external environment including continued steady growth in the global economy higher commodity prices and accommodative external financing conditions Inflation is abating and fiscal imbalances are being contained in many countries Over the medium term and on current policies growth is expected to accelerate to about 4 percent too low to create the number of jobs needed to absorb anticipated new entrants into labor markets

Research priority assessment for the CIP 2005-2015 strategic plan: Projecting impacts on poverty, employment, health and environment , **Regions in Recession and Resurgence** Michael Chisholm, 2015-03-27 The world economy has

undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

STRUCTURE, REGIONAL ECONOMIC GROWTH AND CONVERGENCE IN CHINA Junfang Sun, Zexu Jing, 2023-10-10

The Seventh National Population Census NPC results show that China's population structure has undergone profound changes While the rates of education penetration and urbanization continue to rise issues such as population aging and low fertility rates have become prominent Population is the core factor influencing economic growth and its structural changes will bring numerous opportunities and challenges for China's future economic development Currently most of the research on the economic effects of population structure mainly focus on constructing a certain static panels to analyze certain demographic factors lacking consideration of the wholeness and correlation aspects of population structure Moreover the design of models seldom incorporate the intrinsic dynamics and convergence of economic growth Therefore it is of great significance to construct a dynamic panel model and systematically study the impact of various demographic factors on regional economic growth and convergence so as to understand and grasp the demographic changes in China and promote the coordinated development of regional economy Based on a comprehensive review of the theoretical literature this book first conducts a systematic analysis of the spatial and temporal evolution patterns of China's national and regional population structure and regional economic development Second it identifies the mechanism through which population structure affects regional economic growth and convergence and proposes research hypotheses Subsequently based on the neoclassical economic growth convergence model a dynamic model is constructed to examine the influence of population structure on

regional economic growth and convergence Using panel data on population structure and economic growth from 31 provinces autonomous regions and municipalities directly under the central government an empirical analysis is conducted using the SYS GMM method Additionally a heterogeneity analysis is conducted with samples from the eastern central and western regions Furthermore taking into account the reality of shortened spatial and temporal distances and intensified population mobility between regions a spatial econometric model is constructed to analyze the spatial spillover effect of population structure on regional economic growth The current research theory for interfacial loess landslides is relatively lagging behind Therefore this book provides a detailed theoretical study on the failure mechanism and calculation model of interface type loess landslides and provides a clear theoretical derivation process and application methods The research process involves interdisciplinary research in soil mechanics elastic plastic mechanics fracture mechanics structural mechanics theoretical mechanics and other disciplines which not only reflects the multi angle nature of research issues but also reflects the multi scale nature of research issues The conclusions of the study as follows changes in the gender structure of the population do not have a significant impact on the speed of national and regional economic growth On the other hand an increase in the gender ratio in the western region may promote economic growth convergence Secondly population aging can reduce labor supply and savings rate inhibit innovation thereby impeding regional economic growth and convergence The influence of the rate of urbanization on economic growth shows an inverted U shaped pattern Initially urbanization promotes economic growth but excessive urbanization may hinder it The eastern region has the highest urbanization rate and experiences an inverted U shaped impact on economic growth whereas the central and western regions benefit from linearly positive effects of urbanization Moreover the improvement of urbanization rate is one of the most important factors promoting regional economic growth convergence The enhancement of the population s educational level can promote total factor productivity and human capital in the country as a whole and each region thereby driving economic growth It also stands as one of the most crucial factors promoting regional economic growth Additionally considering spatial factors the aging of the population has a positive effect on the interaction of regional economic growth Based on the above conclusions this book proposes the following policy recommendations First adhere to the concept of gender equality and alleviate the pressure caused by the marriage squeeze Second improve the pension system and vigorously develop the silver economy Third promote the coordinated development of new urbanization and prevent pseudo urbanization and counter urbanization Fourth implement the three major strategies of innovation driven science and education revitalization and talent power Fifth strive to promote the upgrading of the employment structure and give full play to the important role of the tertiary industry in absorbing labor

Regional Economic Development Robert J. Stimson, Roger R. Stough, Brian H. Roberts, 2013-03-09

Regional economic development has attracted the interest of economists geographers planners and regional scientists for a long time And of course it is a field that has developed a large practitioner cohort in government and business agencies from

the national down to the state and local levels In planning for cities and regions both large and small economic development issues now tend to be integrated into strategic planning processes For at least the last 50 years scholars from various disciplines have theorised about the nature of regional economic development developing a range of models seeking to explain the process of regional economic development and why it is that regions vary so much in their economic structure and performance and how these aspects of a region can change dramatically over time Regional scientists in particular have developed a comprehensive tool kit of methodologies to measure and monitor regional economic characteristics such as industry sectors employment income value of production investment and the like using both quantitative and qualitative methods of analysis and focusing on both static and dynamic analysis The father of regional science Walter Isard was the first to put together a comprehensive volume on techniques of regional analysis Isard 1960 and since then a huge literature has emerged including the many titles in the series published by Springer in which this book is published **High-Speed**

Railways and New Structure of Socio-economic Development in China Xiaoyan Lin, 2023-06-14 This book systematically expounds the significance of the high speed railway in China s regional economic and social development It also contains a large number of case discussions so that readers can fully understand the development of China s high speed railway and its role in promoting China s economy The purpose of this book is to determine whether high speed railway has important political and strategic significance for China s development the inherent relationship and mechanism of the high speed railway together with economic and social development and how to achieve the high speed rail and economic and social coordination as well as sustainable development
