Regional Public Finances:

The production and financing of regional public goods (Occasional Paper IECE = Documento de Divulgación SITI ; n. 8)
Vito Tanzi, 2005 *Theory of Public Finance in a Federal State* Dietmar Wellisch, 2000-01-13 The central question of this book is whether the assignment of government functions to the individual jurisdictions in a federal state can ensure an optimal allocation of resources and a fair income distribution The analysis thereby gives a new answer to the old question about the optimal degree of fiscal decentralization in a federal state It shows that fiscal decentralization is a method to disclose the preferences of currently living and future generations for local public goods to limit the size of the government and to avoid excessive public debt finance While the allocative branch of the government benefits from fiscal decentralization it is difficult to obtain a distribution of incomes that differs from the outcome that the market brings along *Spain*
International Monetary Fund. European Dept., 2017-01-30 This 2016 Article IV Consultation highlights that Spain's economy has continued its recovery Real GDP expanded by 3.2 percent in 2015 with the same growth rate expected for 2016 despite a prolonged period of domestic political uncertainty Nearly 1.1 million jobs were created over the past two years The rebound in private consumption exports and investment aided by past reforms has remained the main driver of growth The current account is projected to record its fourth consecutive annual surplus Private sector balance sheets have further strengthened while public debt remains high at about 100 percent of GDP Real GDP growth is projected to moderate to 2.3 percent in 2017

Multi-level Finance and the Euro Crisis Ehtisham Ahmad, Massimo Bordignon, Giorgio Brosio, 2016-01-29 Representing a unique contribution to the analysis and discussion of the unfolding Eurozone crisis in terms of the relationship between central and local government this book addresses a number of important fiscal and political economy questions To what extent have local and regional governments contributed to the crisis To what degree have sub national services and investments borne the brunt of the adjustments How have multi level fissures affected tensions between different levels of government from the supranational to the local This volume covers these and many other critical issues that have been largely ignored despite their relevance The book first addresses general issues of fiscal coordination and management across levels of government in the context of incentives which can be altered by the existence of a supranational tier The country specific chapters prepared by leading experts provide a thorough review of the key problems of multi levels of government in the biggest economies in the Eurozone France and Germany and Southern Europe Portugal Spain Italy and Greece In further chapters the juxtaposition of Barcelona and Turin provides an opportunity to evaluate large investments in a multi level context associated in this case with the Olympics Macedonia provides a discussion of the related issues in an EU accession country As a whole the book explores the long term impact of the crisis on local service delivery and investment and the consequences for sustainable growth and political cohesion It also offers rarely found insights and suggestions to increase the stability and strength of multi level European institutions This is an enlightening resource for all those from academics

and graduates to policy makers and practitioners seeking a comprehensive understanding of European fiscal federal and financial issues **Fiscal and Debt Policies for the Future** P. Arestis, M. Sawyer, 2014-04-30 This book offers detailed analysis and informed comment on the future of emerging economic policies It is essential reading for all postgraduates and scholars looking for expert discussion and debate on the issues surrounding economic policy Central and Local Government Relations in Asia Naoyuki Yoshino, Peter J. Morgan, 2017 Sustainable and inclusive growth in emerging Asian economies requires high levels of public investment in areas such as infrastructure education health and social services The increasing complexity and regional diversity of these investment needs together with the trend of democratization has led to fiscal decentralization being implemented in many Asian economies This book takes stock of some major issues regarding fiscal decentralization including expenditure and revenue assignments transfer programs and sustainability of local government finances and develops important findings and policy recommendations *French Public Finance in the Great War and To-day* Harvey Edward Fisk, Bankers Trust Company (New York, N.Y.), 1922 Regional Government Competition Chen Yunxian, Gu Wenjing, 2018-12-07 This monograph provides a coherent and systematic explanation of China's regional economic development from the perspective of regional government competition It gives an almost unknown exposition of the mechanisms of China's regional economic development with numerous supporting cases drawn from both China and elsewhere This book is an invaluable resource for anyone interested to learn more particularly the development and transformation of China's regional economy from both the Chinese and global perspectives The Economics Of Public Finance Alan Blinder, 2011-07-01 This is the thirty fifth volume in the Brookings Studies of Government Finance series In the first of its four essays Analytical Foundations of Fiscal Policy Alan S Blinder of Princeton University and Robert M Solow of the Massachusetts Institute of Technology survey the theoretical and empirical underpinnings of fiscal policy After discussing how the influence of fiscal policy on macroeconomic activity ought to be assessed the authors examine and find inadequate the dictum that government should balance the budget rather than the economy They defend again both theoretically and empirically the efficacy of fiscal policy against the monetarist challenge From an examination of the lags and uncertainties in the operation of fiscal policy and an analysis of the 1968-70 income tax surcharge they conclude that although much remains to be learned about the econometrics of policy multipliers the post surcharge experience in no way undermines the theoretical foundations of fiscal policy Where the burdens of various taxes fall has been a matter of intense interest to economic theorists in the last twenty years As public expenditures and taxpayer resistance rise not only must policy makers try to distribute the burdens of taxation equitably but they must also attempt to move toward national goals by judicious use of tax instruments George F Break of the University of California at Berkeley in *The Incidence and Economic Effects of Taxation* a comprehensive review of recent tax literature focuses on the theoretical studies that have helped to expand knowledge of tax incidence and the empirical studies that support newly developed hypotheses In each area he surveys the

design of theoretical and general sales and income taxes the effect of economic choices both of individuals and businesses on the national well being Break indicates the ground still to be covered and the potential benefits of further inquiry In Public Expenditure Budgeting Peter O Steiner of the University of Michigan explores the literature dealing with the hard questions underlying public expenditures What is the public interest How does the community decide whether the government should undertake or finance a given activity instead of leaving it to a private action or inaction On what basis should incremental expenditure decisions of governmental units be made Steiner reviews the various approaches scholars have taken to the difficult questions surrounding the appropriateness of governmental provision of particular goods and services Although he finds none of the models fully satisfactory his work contributes to the debate concerning the process by which collective values are articulated and collective decisions come to be accepted as binding Dick Netzer's *State Local Finance and Intergovernmental Fiscal Relations* clarifies the debate that centered around the initial proposals for revenue sharing The author Dean of New York University's Graduate School of Public Administration explores the appropriate distribution of responsibility for public services among federal state and local governments the appropriate revenue systems for the subnational governments and the appropriate means of coordinating the systems with the responsibilities *Portugal* International Monetary Fund, 2011-12-20 Portugal's economic adjustment has continued but the contraction in output has been milder than expected The 2012 outlook for Europe has deteriorated substantially with growth revised down by 11.4 percentage points relative to spring forecasts Substantially higher capital requirements across Europe coupled with cuts in exposure to the periphery are placing further pressure on banks and the flow of credit The authorities have made significant progress in revenue administration reform and public administration restructuring OECD Studies on SMEs and Entrepreneurship Russian Federation: Key Issues and Policies OECD, 2015-10-16 This publication examines the major policy challenges achievements and next steps for the creation of a more entrepreneurial population and a stronger SME sector in the Russian Federation *Regional Income Redistribution and Risk Sharing* Mr. Jörg Decressin, 1999-09-01 This paper investigates income redistribution and risk sharing among Italy's regions and the implications for public policy Using a richer data set than in previous works this study allows for an assessment of public consumption's and investment's roles The findings suggest that Italy's fiscal system provides interregional redistribution at 30-35 percent and risk sharing at 20-30 percent of GDP mainly through public consumption Compared with results in the literature for other European countries there appears to be less redistribution and risk sharing in Italy through its welfare and tax systems because of their different structures Public Financial Management in Peru An OECD Peer Review OECD, 2023-02-23 This report analyses current public financial management practices in Peru in light of OECD recommendations and good practices and identifies areas where Peru could improve It focuses on four areas budgetary practices and governance treasury modernisation and cash management systems ensuring a fiscally sustainable competitive pay regime for the Peruvian public sector and public

infrastructure programming budgeting and management *Public Finance and Public Choice* James M. Buchanan, Richard A. Musgrave, 1999-10-12 In this volume based on a week long symposium at the University of Munich's Center for Economic Studies two leading scholars of governmental economics debate their divergent perspectives on the role of government and its fiscal functions James M Buchanan who was influential in developing the research program in public choice concentrates on the imperfections of the political process and stresses the need for rules to restrain governmental interference Richard A Musgrave a founder of modern public finance points to market failures and inequities that call for corrective public policies They apply their differing economic and political philosophies to a variety of key issues Each presentation is followed by a response and general discussion *The Oxford Handbook of Local and Regional Democracy in Europe* John Loughlin, Frank Hendriks, Anders Lidström, 2011 The Oxford Handbook of Local and Regional Democracy in Europe is an up to date and comprehensive analysis of subnational democracy in Europe It analyses subnational democracy in the 27 member states of the EU plus Norway and Switzerland **Proceedings of the 8th Global Conference on Business, Management, and Entrepreneurship (GCBME 2023)** Ratih Hurriyati, Lili Adi Wibowo, Sulastri Sulastri, Lisnawati Lisnawati, 2024-06-24 This is an open access book We would like to invite you to join our The 8th Global Conference on Business Management and Entrepreneurship The conference will be held in GH Universal Hotel Bandung Indonesia on August 8th 2023 with topic Digital Based Business in Improving Community Creative Economy Growth in the New Normal Era Conference Scope Topics Organizational Behavior Leadership and Human Resources Management Innovation IT Operations and Supply Chain Management Marketing Management Financial Management and Accounting Economics Education Strategic Management Entrepreneurship and Contemporary Issues Green Business **Białystok Law Books 9 Polish Financial Law** Urszula K. Zawadzka-Pak, 2014 **Regional Innovation Systems - An Analysis of Innovation Policy Instruments** Michaela Bison, 2007-02-01 Inhaltsangabe Abstract Innovation is essential for the competitiveness of companies within the globalised knowledge economy In the actual situation of high unemployment rates in most western countries public economy support works thereby actively on the improvement of innovation activity conditions The regional level is for this attempt the most interesting spatial entity because of its high significance in global economic mechanisms The questions motivating this master thesis are how regional innovation policy can improve a regional innovation system and which of the possible policy instruments the most effective ones are to combat unemployment Innovations are the new combination of recent or established knowledge whose implementation had a noticeable effect on the performance of the organisation it was implemented in This includes product process organisational and people innovations Innovations are not anymore an individual effort but a process which involves many actors and institutions The basis for the exploration of how to support the development and implementation of these innovations is the regional innovation system approach It divides the innovation process into phases and their linkages and allows identifying analytically the evolved actors and the weaknesses of the

innovation process The analysis of innovation policy instruments assigns each weakness within the innovation process an instrument which is explained and analysed in detail The examined instruments are competence centres start up centres science parks networks regional knowledge management and diffusion agencies Each instrument s function and its main characteristics get described together with a best practice example which leads to a conclusion on its effects on innovation and employment The result of the analysis is that competence centres start up centres and science parks are central instruments and have the highest potential for employment effects Networks regional knowledge management and diffusion agencies are more supporting measures that improve the performance of the first three For the success of all instruments their combination with each other and the utilisation of synergies and dependencies between them is essential A holistic concept including all instruments is the most effective way to support regional innovation processes These findings get transferred to the case study region Bonn where as an example for an *The Russian Labour Market* Vladimir Gimpelson, Douglas Lippoldt, 2001 Traces labour market developments during the transition from a planned to a market economy focussing on the period 1992 1998 Covers old vs new jobs wages and wage arrears social benefits and the politics of labour market adjustment Includes some data on labour turnover in Eastern European countries **Political Representation in the European Union** Sandra Kröger, 2014-04-03 In recent years the financial and economic crisis of 2008 9 has progressed into an equally important political and democratic crisis of the EU These troubled times have set the framework to re assess a number of important questions in regard to representative democracy in the EU such as the normative foundation of political representation the institutional relationship between representatives and represented the link between democracy and representation and new arenas and actors This book examines the diverse avenues through which different sorts of actors have expressed their voices during the Euro crisis and how their various interests are translated into the decision making process It offers a state of the art assessment of what political representation means in this context as well as a contribution to the representative turn in democratic theory The authors address three key themes The main actors and channels of political representation in the EU Interlocking levels of representation in the EU and the way in which national and supranational representation works How the European institutional system represents EU citizens through law and administration Focusing on the importance of representation in the legitimation of democracy this book will be of interest to students and scholars of European Union politics European studies democratic theory representation studies civil society and transnational democracy
