Multiplicity of Nationalism in Contemporary Europe Ireneusz Paweł Karolewski, Andrzej Marcin Suszycki, 2010-01-01 Nationalism remains one of the key political societal and socio psychological phenomena in contemporary Europe The international scholars assembled in this edited collection suggest that the use of three perspectives supranationalism boundary making nationalism and regional nationalism may be promising as an explanatory framework for the analysis of nationalism in Europe The volume distances itself from older dichotomies such as civic and ethnic nationalism and questions the one sided normativity of nationalism in particular regarding the concept of liberal nationalism It argues that a promising approach to contemporary nationalism should reflect the multiplicity of nationalism

Re-mapping the Americas W. Andy Knight, Julián Castro-Rea, Hamid Ghany, 2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn t been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs academic as well as non academic audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere s recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub regional bodies that have

World Society Anna L. Ahlers, Damien Krichewsky, Evelyn Moser, Rudolf Stichweh, 2021-03-05 This book is about the radical novelty of modern polities in a functionally differentiated world society Premodern states were at the apex of a stratified hierarchical society They dominated society and all its groups and strata Modern polities have to be understood through the ecology of relations among different function systems They have to find and incessantly redefine their place in society They

produce decisions that are collectively binding but in preparing these decisions experience constraints and knowledge deficiencies that are related to the complexity of a functionally differentiated society The book concentrates on six analytical perspectives that reflect how modern polities are embedded into 21st century society These perspectives are the concept of inclusion and the inclusion revolution constitutive of modern polities the internal differentiation of polities that endows them with an unprecedented complexity the fact that polities do not know anything about society and the ways in which they compensate for this representation and responsiveness as strategies to reconnect with society the self restriction of some polities that brings about ever new autonomous expert organizations the symmetrical rise of autocracies and democracies as the two modern variants of political regimes

"What Country's This? And Whither Are We Gone?" Rosa E. Penna, Karoline Szatek-Tudor, Janet Hadley Williams, 2010-09-13 In the summer of 2008 the twelfth in a series of biennial conferences on the Literature of Region and Nation was held at Aberdeen University in the

North East of Scotland Over fifty scholars representing no fewer than twenty different countries convened for the occasion and twenty two of the papers presented are included in this volume As at previous conferences in the series the papers range widely in approach in subject matter and in geographical coverage readers of this book will find explorations of literature from all five continents The papers are arranged thematically the central concepts of region and nation are examined in the first section and subsequent sets of papers go on to consider literary and pictorial representations of places and peoples literature of diaspora and exile a keynote topic of the conference the use of language particularly non standard languages in literary texts and artistic interactions between cultures All the papers have been peer reviewed and some extensively revised The collection demonstrates the vitality of scholarship in the field of regional literary studies Variation and Change Mirjam Fried, Jan-Ola Östman, Jef Verschueren, 2010 The ten volumes of the Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics thus dividing its wide interdisciplinary spectrum in a transparent and manageable way While the other volumes select specific philosophical cognitive grammatical cultural interactional or discursive angles this sixth volume focuses on the dynamic aspects of language and reviews the relevant developments in variationist and diachronic scholarship The areas explored in the volume concern several general themes specific methodological approaches from comparative reconstruction to evolutionary pragmatics issues in intra lingual variation in terms of standard and non standard varieties cross linguistic variation including its cross cultural dimension and the study of diachronic relations across linguistic patterns including changes in all areas of pragmatic patterns and categories The contributions document two prominent and interrelated trends that shape contemporary variationist and diachronic research One it has moved from situating change within context independent systems toward incorporating patterns of language use and the speaker's role in language change And two it has reoriented its focus away from cataloguing instances of variation and toward seeking theoretically informed accounts that aim at explaining variation and change On the whole the volume argues for accepting and developing actively a systematic connection between research in diachrony synchronic variation and typology while also incorporating the socio cognitive perspective in linguistic analysis as a particularly promising source of useful methodology and explanatory models
