ten lectures published here for the first time that offer a representative selection of Dr Griffiths original fully argued and richly exemplified contributions to literary criticism and literary history Crammed into his writing are decades of reading in several languages and across most genres and literary periods In these lectures he pursues the blind spots not only of other people s arguments but of the whole business of criticism in general with what he calls its over concentration on a narrow range of examples such over concentration warps our thinking Implicit and explicit throughout his work is the argument that an appropriately wide range of instances is essential to making progress in conceptualisation that what we need in order to do better thinking is a keener attention to a greater variety of examples Such examples include in these lectures the works of Shakespeare Dante Kafka Beckett Racine Rabelais T S Eliot and Jonathan Swift
