The book highlights how these beliefs address fundamental questions about the meaning of life and our connection to the universe. The book's unique value lies in its balanced exploration of both religious and literary perspectives. It begins by examining the historical roots and theological interpretations of reincarnation across major religions. It then transitions into fantasy literature, analyzing how authors creatively reimagine these concepts. Finally, the book synthesizes these perspectives, considering the psychological and philosophical implications of believing in reincarnation and the eternal soul. **Unfolding Consciousness** Edi

Bilimoria, 2024-03-11. Exploring the Living Universe and Intelligent Powers in Nature and Humans. author Edi Bilimoria heralds the new science of consciousness and offers the readers a roadmap and necessary tools to achieve future growth. Presented in three volumes, plus volume IV contains references, resources, further reading; they reveal the unity of the Eastern and Western branches of our perennial wisdom. Bilimoria shows how science seeks truth using a synthesis of both traditions. Evidence from a wide range of sources: scientific, medical, philosophical, religious, and cultural is put forward to argue the case that humans are spiritual beings primarily and not merely complicated biological machines. Bilimoria teaches that consciousness is not the product of matter but the primary element from which all else emanates. This process and its underlying mechanisms are described in detail with much clarity. This work has over 2000 references and is supported by copious tables and diagrams, plus individual chapter summaries and sidenotes to assist readers in navigating the multidimensional terrain traversed. Key areas: The scientific and esoteric worldviews compared and contrasted. The ultimate promise of science. The soft and hard problems of consciousness. How external input to the physical senses results in an internal subjective experience. Quantum physics: its contribution to a new scientific paradigm. The Mystery Teachings of All Ages: their worldwide unity and central message. Wet computers and computers: Is the brain no different in principle from a computer? Death and after: the transition and continuity of consciousness in other realms. Paranormal phenomena and apparitions. Subtle bodies. Evolution and destiny. Powers latent in human beings. Divinity and the united message of all world religions. The question of immortality. The primacy of consciousness and the manner of its unfoldment from the unmanifest realms to the physical world.
