Reindeer Husbandry:

Reindeer Husbandry Svein Disch Mathiesen, Inger Marie Gaup Eira, Ellen Inga Turi, Anders Oskal, Mikhail Pogodaev, Marina Tonkopeeva, 2022-12-09 This open access book focuses on climate change Indigenous reindeer husbandry and the underlying concept of connecting the traditional knowledge of Indigenous reindeer herders in the Arctic with the latest research findings of the world's leading academics The Arctic and sub Arctic environment climate and biodiversity are changing in ways unprecedented in the long histories of the north challenging traditional ways of life well being and food security with legitimate concerns for the future of traditional Indigenous livelihoods The book provides a clear and thorough overview of the potential problems caused by a warming climate on reindeer husbandry and how reindeer herders knowledge should be brought to action In particular the predicted impacts of global warming on winter climate and the resilience of the reindeer herding communities are thoroughly discussed **Reindeer Husbandry and Global Environmental Change** Tim Horstkotte, Øystein Holand, Jouko Kumpula, Jon Moen, 2022-04-20 This volume offers a holistic understanding of the environmental and societal challenges that affect reindeer husbandry in Fennoscandia today Reindeer husbandry is a livelihood with a long traditional heritage and cultural importance Like many other pastoral societies reindeer herders are confronted with significant challenges Covering Norway Sweden and Finland three countries with many differences and similarities this volume examines how reindeer husbandry is affected by and responds to global environmental change and resource extraction in boreal and arctic social ecological systems Beginning with an historical overview of reindeer husbandry the volume analyses the realities of the present from different perspectives and disciplines Genetics behavioural ecology of reindeer other forms of land use pastoralists norms and knowledge bio economy and governance structures all set the stage for the complex internal and externally imposed dynamics within reindeer husbandry In depth analyses are devoted to particularly urgent challenges such as land use conflicts climate change and predation identified as having a high potential to shape the future pathways of the pastoral identity and productivity These futures with their risks and opportunities are explored in the final section offering a synthesis of the comparative approach between the three countries that runs as a recurring theme through the book With its richness and depth this volume contributes significantly to the understanding of the substantial impacts on pastoralist communities in northernmost Europe today while highlighting viable pathways to maintaining reindeer husbandry for the future This book will be of great interest to students and scholars of both the natural and social sciences who work on natural resource management global environmental change pastoralism ecology social ecological systems rangeland management and Indigenous studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *What it Means to be a Herdsman* Joachim Otto Habeck, 2005 In this book author Joachim Otto Habeck takes the reader to the tundra in the Far North of the Russian Federation describing and interpreting the practice of reindeer herding

on the land His vivid account of the everyday life of Komi reindeer herders and their family members as they interact with their bosses the town the market and oil companies reveals both the reach of their agency and its limitations Through a meticulous analysis of each of these domains Habeck shows how public discourse about reindeer husbandry as a traditional life style derives from outside the Komi reindeer herding communities yet it has powerful effects on the local actors ability to frame their own existence He argues that the concept of tradition despite its many positive connotations places Komi reindeer herders in a golden cage which leaves no space for acknowledging their drive to innovation and flexibility

Reindeer Husbandry and Its Ecological Principles Sven Skjenneberg, 1979 Translation of Norwegian book first published by Universtetsforlaget Oslo 1968 describing current state of reindeer husbandry Reindeer Husbandry Svein Disch Mathiesen, Inger Marie Gaup Eira, Ellen Inga Turi, Anders Oskal, Mikhail Pogodaev, Marina Tonkopeeva, 2023-10-27 This open access book focuses on climate change indigenous reindeer husbandry and the underlying concept of connecting the traditional knowledge of indigenous reindeer herders in the Arctic with the latest research findings of the world s leading academics The Arctic and sub Arctic environment climate and biodiversity are changing in ways unprecedented in the long histories of the north challenging traditional ways of life well being and food security with legitimate concerns for the future of traditional indigenous livelihoods The book provides a clear and thorough overview of the potential problems caused by a warming climate on reindeer husbandry and how reindeer herders knowledge should be brought to action In particular the predicted impacts of global warming on winter climate and the resilience reindeer of communities are thoroughly discussed

From the Past to the Future: 300 Years of Sámi Reindeer Herding Knowledge Inger Marie G. Eira, Anders Oskal, Svein Disch Mathiesen, Marina Tonkopeeva, 2025-08-04 This open access book provides a unique way of documenting traditional Sámi knowledge that has survived almost 300 years followed by today s analysis of the modern state of Sámi reindeer husbandry Reindeer herders knowledge their language and ways of managing the herds have hardly changed over the past centuries It is the same ancient knowledge that now forms the basis for how reindeer herders think and carry out their operations The book shows sustainable reindeer husbandry with long continuity in knowledge and practices which is still used today It gives an overview of the knowledge systems and technical language of an ancient industry that has survived through millennia and is still crucial today Our vision with this book is to highlight the long perspectives of Sámi reindeer herders indigenous knowledge based on what Knud Leem did at the beginning of the eighteenth century The content is based on Knud Leem s translated version of *Description over Finmarkens Lapper* their language of language lifestyle and past idolatry There is a direct need for this unique material to be published in English to provide access to the knowledge of the time to a wider audience In the rest of the world the eighteenth century is getting more and more attention in both national and international research it is in this period that modern ways of thinking about religion politics science and society find their form Movements and ideas from the eighteenth century are important as they structure our ideas and discussions to this day

Therefore Knud Leem's descriptions of the Sámi in the eighteenth century will also be important today and in future. Leem was a unique researcher of his time as he collected all material in Sámi.

Cattle husbandry in Eastern Europe and China Abele Kuipers, Andriy Rozstalnyy, Gerry Keane, 2023-08-07 This book presents an analysis of the dairy and associated sector developments in Eastern Europe and China. The transition in cattle husbandry in Eastern Europe resulting in enormous structural changes but not in an increased production volume is different from emerging countries like China where traditional small scale farming goes together with the remodelling or start of mega farms. Capacity building by means of cooperation appears to be hindered by historical experience. Farm development paths were studied in more depth in Poland, Lithuania and Slovenia using detailed farmer surveys. Farmers' strategies, availability of resources and opportunities and threats were analysed and interactive group trainings in strategic management were part of the analysis. The results are presented here. Although farmers showed similar wishes concerning farm development, the local environment and policies determine the degree of achievement. Farm fragmentation, the high percentage of rented land and availability of suitable labour are major constraints. Future EU policies are a concern but new technologies are embraced. This book is a must for those interested in the transition in Eastern Europe. It is indispensable to consultants, marketers, companies, farm leaders and government officials in agriculture.

The Proposed Nordic Sámi Convention Nigel Bankes, Timo Koivurova, 2013-01-31 In 2005 an expert group representing the governments of Norway, Sweden and Finland and the Sámi parliaments of these countries agreed upon a draft text of a Nordic Sámi Convention. Key parts of the text deal with the recognition of Sámi land and resource rights. More recently the three governments have embarked on negotiations to move from this draft text to a final convention that may be adopted and ratified by all three countries. Negotiations commenced in the Spring of 2011 and should be completed within five years. This collection of essays explores the national and international dimensions of indigenous property rights and the draft Convention which recognises the Sámi as one people divided by international boundaries. Part one of the book seeks to provide a global and theoretical context for these developments in the Nordic countries with a series of essays dealing with the moral and legal reasons for recognising indigenous property interests and different conceptualisations of the relationship between indigenous peoples and settler societies including recognition, reconciliation and pluralism. Part two of the book examines some international legal issues associated with the Convention including the background to the Convention. Part three turns to examine aspects of the recognition of Sámi property interests in each of the three Nordic states while Part four provides some comparative experiences examining the recognition of indigenous property rights in a number of jurisdictions including Canada, Australia and a number of South American states. An additional essay considers gender issues in relation to indigenous property rights.

Animal Harm Angus Nurse,2016-04-15 Why do people harm injure torture and kill animals This book evaluates the reasons why these crimes are committed and outlines the characteristics of the animal offender It considers ethical and value judgements made about animals and the tacit acknowledgement and justification of unacceptable criminal behaviour towards the harming of animals made by offenders Situating animal abuse wildlife crime illegal wildlife trading and other unlawful activities directed at animals firmly within Green Criminology the book contends that this is a distinct multi dimensional type of criminality which persists despite the introduction of relevant legislation Taking a broad approach the book considers the killing and harming of animals in an international context and examines the effectiveness of current legislation policy and sentencing Including a section on further reading and useful organizations this book is a valuable exploration into perspectives on the responsibility owed by man to animals as part of broader ecological and legal concerns It will interest criminologists ecologists animal protectionists and those interested in law and society and law and the environment

Community Adaptation and Vulnerability in Arctic Regions Grete K. Hovelsrud,Barry Smit,2010-09-08 The Year That Changed How We View the North This book is about a new theoretical approach that transformed the field of Arctic social studies and about a program called International Polar Year 2007 2008 IPY that altered the position of social research within the broader polar science The concept for IPY was developed in 2003 2005 its vision was for researchers from many nations to work together to gain cross disciplinary insight into planetary processes to explore and increase our understanding of the polar regions the Arctic and Antarctica and of their roles in the global system IPY 2007 2008 the fourth program of its kind followed in the footsteps of its predecessors the first IPY in 1882 1883 the second IPY in 1932 1933 and the third IPY later renamed to International Geophysical Year or IGY in 1957 1958 All earlier IPY IGY have been primarily geophysical initiatives with their focus on meteorology atmospheric and geomagnetic observations and with additional emphasis on glaciology and sea ice circulation As such they excluded socio economic disciplines and polar indigenous people often deliberately except for limited ethnographic and natural history collection work conducted by some expeditions of the first IPY That once dominant vision biased heavily towards geophysics oceanography and ice sheets left little if any place for people that is the social sciences and the humanities in what has been commonly viewed as the hard core polar research

Power and the People Yulian Konstantinov,2023-09-02 This book discusses state periphery relations from the view point of a reindeer husbandry community in the Russian Far North Murmansk Region The time is the current period of Putin led Russia The analysis is based on the premise that the mode of current top power governance can be described as selective de centralization Below a certain level of state power interests conflicts get resolved in favour of local communities That gains support for the supreme leadership and reproduces a Soviet like reality Termed sovkhoism the latter holds the Soviet state farm sovkhos as creating an ideal socio economic environment When issues are of significant interest to superior power

selection favours cavalier bypassing of people friendly concerns At this level power acts in an authoritarian mode favouring the interests of state power structures in conjunction with the upper tiers of the loyal oligarchate It is shown how this governing mode contains significant potential for escalating centre vs periphery tensions **The New Arctic** Birgitta Evengård, Joan Nymand Larsen, Øyvind Paasche, 2015-06-11 In the late 18th century explorers and scientists started venturing into the Arctic in a heroic and sometimes deadly effort to understand and unveil the secrets of the unforgiving and mysterious polar region of the high north Despite that the Arctic was already populated mattered less for the first wave of polar researchers and explorations who nevertheless brought back valuable knowledge Today the focus in Arctic science and discourse has changed to one which includes the peoples and societies and their interaction with the world beyond The image of a static Arctic heralded first by explorers prevailed for a long time but today the eyes of the World see the Arctic very differently Few if any other places on Earth are currently experiencing the kind of dramatic change witnessed in the Arctic According to model forecasts these changes are likely to have profound implications on biophysical and human systems and will accelerate in the decades to come The New Arctic highlights how and in what parts the natural and political system is being transformed We re talking about a region where demography culture and political and economic systems are increasingly diverse although many common interests and aspects remain and with the new Arctic now firmly placed in a global context Settlements range from small predominantly indigenous communities to large industrial cities and all have a link to the surrounding environment be it glaciers or vegetation or the ocean itself The New Arctic contributes to our further understanding of the changing Arctic It offers a range of perspectives which reflect the deep insight of a variety of scientific scholars across many disciplines bringing a wide range of expertise The book speaks to a broad audience including policy makers students and scientific colleagues
