Business Leadership Under Fire: Nine Steps to Rescue and Transform Organizations Pepyn Dinandt, Richard Westley, 2021-11-04 Disaster, disruption, and change are recurring challenges in business. We are used to reading about the successful disruptors of established industries: Tesla, Amazon, Netflix, Uber, etc. But what about the companies they disrupted? What ever happened to them? How did they cope? And more importantly, what are the secrets of making a business thrive again? *Business Leadership Under Fire: Nine Steps to Rescue and Transform Organizations* is the book every business leader needs. It will inspire readers with its thoughtful, practical, and battle-hardened recipes for success. Pepyn Dinandt usually gets parachuted into an organization only after it realizes it is in real trouble. It is his job to assess and understand the situation that faces the business while also devising effective ways forward towards recovery and success. In *Business Leadership Under Fire*, Dinandt draws on his own extensive business experience and with the help of decorated army officer Colonel Richard Westley marries this proven expertise with the leadership insights of military thinkers to develop an imaginative and practical nine-step plan for any leader who wishes not simply to survive but to inspire and thrive under fire. Using lessons forged on the front lines of both the military and commercial worlds, Dinandt and Westley's concise book is required reading for anyone in any organization that needs help in turbulent times.

Building Leadership Development Programmes Nigel Paine, 2016-11-03 Most leadership development runs on rails: courses are organized with standard content usually delivered by companies set up expressly for that purpose. Most leadership programmes fail when judged on whether they achieve lasting impact and behaviour change because what is covered is often forgotten after the programme ends. *Building Leadership Development Programmes* is designed to show how leadership development should work. It challenges the widely accepted notion that leadership development cannot be measured and it exemplifies how to design programmes that are in line with organizational needs and deliver lasting and measurable impact. *Building Leadership*

Development Programmes is structured around detailed case studies from around the world that offer unique insights into the process of building effective leadership development looking at a range of approaches from almost zero cost options to high end investment that actually works It helps readers think through what it is that they are actually trying to achieve offering processes to work through to establish what is necessary for their organization and take a longer view than looking for quick fixes It features case studies including Crotonville Leadership Centre who have worked with GE McKinsey and the Red Cross and interviews with world authorities on leadership and talent development Detailed guidance will help identify the right measures to ensure impact and to adopt the right methodologies including looking at leadership coaching mentoring social learning and action learning blowing apart the idea that expensive training courses are always required

The Techniques of Inner Leadership Gilbert W. Fairholm, 2003-10-30 Leadership is fundamentally different from management but traditional leadership skills were based on an ill fitting management oriented model When leadership is recognized as a discrete professional specialty new techniques and methods are needed to operationalize the new values based theories In addition to distinguishing leadership from management this book distinguishes inner leadership practiced by those in the middle ranks from leadership as practiced by the CEO Inner leadership is an applied complex of specialized knowledge theory skills attitudes and attributes used to make things happen in the lives and behavior of other community members The leader's goal is to cause followers to accept the leader's values e.g. his or her standards of what are acceptable goals behavior and overall conduct as their own It is an intimate personal life transforming task that resolves itself into a set of discrete techniques sets of attitudes actions and intentions that distinguish leaders from managers or other corporate workers The special focus of the 21 leadership techniques presented here is on those unique methods of group interaction that characterize leadership activities in the middle of the corporation These techniques represent a substantial body of inner leadership practice that differentiates leadership from all other group roles and functions

Women and Leadership Genevieve Brown, Beverly J. Irby, 2001 While our culture aids and encourages men in their achievement women are often discouraged Women as a group have not been as successful as men in the fields which have traditionally been assigned achievement value Common internal barriers for women include low confidence perceived lack of advancement opportunities poor self image and weak determination and motivation Coupled with difficult experiences such barriers can persuade some women to relinquish their aspirations for a career in administration In various ways both subtle and direct our culture discourages women from expressing their intelligence For some who weather the difficulties the results can be highly confirming and motivating As women strive to achieve professional success and recognition they still feel societal pressure to assume more conventional roles Although cultural sexism is a consistent theme in these women's stories so are strength determination and inspiration

Follower-Centered Perspectives on Leadership Mary Uhl-Bien, Raj Pillai, Michelle C. Bligh, 2009-03-01 The majority of leadership theories and studies have tended to emphasize the personal background personality traits perceptions and actions of leaders From this perspective the followers have been viewed as recipients or moderators of the leader's influence and as vehicles for the actualization of the leader's vision mission or goals One of the major challengers of this dominant view was the late James R Meindl As an alternative to the leader centric perspective on leadership Meindl offered a follower centric approach that views both leadership and its consequences as largely constructed by followers and hence influenced by followers cognitive processes and inter follower social influence processes As a tribute to Jim Meindl and his contributions to the field of

Mac Ruairc,E. Ottesen,R. Precey,2013-02-11 Inclusion is increasingly becoming one of the policy drivers shaping educational discourse and practice What constitutes the term inclusion itself and how ideas derived from the different perspectives on inclusion impact school leadership practice point to a highly contested field of enquiry Originally embedded in discourse relating to special education ideas relating to inclusion are attracting much broader appeal within system reforms in many jurisdictions This book seeks to keep the consideration of inclusion firmly in its broader context and to decouple it from the discourse relating to students with special educational additional needs This allows the authors to position their contributions more explicitly within discourses that draw on difference and diversity as unavoidable features of schools Within this collection we address the current political dogmas in many countries that take a purely rational managerial approach to leadership arguing that this is not contributing to inclusion in schools In doing this the book seeks to shape current discourses on leadership by exploring perspectives which are likely to enhance our understanding of inclusion Tolerance respect listening clarifying language being comfortable with differences and ambiguity and articulating and challenging the rationale behind the way we do things around here are key aspects of inclusive leadership and also fundamental imperatives for writing this book It will be useful to those in education who are engaged in further academic study in education or in reflective practice and to anyone taking advanced programmes in educational leadership and management The international perspectives on the issue of inclusion informing this book ensure that this book will be essential for those engaged in a comparative analysis of leadership practice in different contexts or those concerned with the complexity of ensuring inclusive models of education
