Cody,2005-06-27 The export of American architecture began in the nineteenth century as a disjointed set of personal adventures and commercial initiatives It continues today alongside the transfer of other aspects of American life and culture to most regions of the world Jeffrey Cody explains how why and where American architects planners building contractors and other actors have marketed American architecture overseas In so doing he provides a historical perspective on the diffusion of American building technologies architectural standards construction methods and planning paradigms Using previously undocumented examples and illustrations he shows how steel frame manufacturers shipped their products abroad enabling the erection of American style skyscrapers worldwide by 1900 and how this phase was followed by similar initiatives by companies manufacturing concrete components The Relationship Hermeneutics in the Context of Pastoral and Catechesis - Locus for Dialogue with Culture in the Missio Ecclesiae Kingsley Anagolu ,2019 The authority oriented pastoral catechetical planning method which characterizes the African mission transmission has been problematic as it subtly neglects in its pedagogy the culture and daily life of the subject Hence the people operate a Christian cultural double standard This book proffers an alternative as the author makes the concept of the relationship hermeneutics model to a creative writing that aims towards an empirical application in the theology of inculturation which is a subject oriented and dialogical method that draws its strength from the incarnation prototype
