Moral Relativism and the Crisis of Contemporary Education

Written by Duke Pesta

As a life-long teacher, I might also be granted indulgence if I grumble about how little my college students actually know compared to what I learned. And although there is as much justice as exaggeration in these observations, the thing that never ceases to amaze me is how morally stunted and ethically underdeveloped our students are, how utterly unable to make even obvious moral distinctions, and how completely uninterested in differentiating between virtue and vice...

For thousands of years in the West, it was the humanities, as nursed and taught in the schools, which reinforced theology, helping inculcate moral values and instill a love of moral virtue across cultures and in the hearts of individuals... Over the last three centuries, however — a span of time that witnessed the rise of the Enlightenment and Romanticism, the dawn of Naturalism and Modernism, and the dominance in our time of Post-Modernism — the Judeo-Christian underpinnings of Western Culture have been shaken, eroded, and ultimately rejected altogether by new, man-centered ways of viewing reality...

... anyone who has spent meaningful time in our institutions of learning knows just how seriously teachers and academics take their liberal worldviews... the liberal post-modernism and moral relativity that dominate our schools seek to root out traditional values and meanings in order to supplant them with the liberal, materialist creeds of academics — belief-systems every bit as faith-based as those they seek to remove. Despite the obvious contradiction and hypocrisy, liberal academics proceed blithely down this intellectually tortured path by elevating politics to the exalted place in culture formerly occupied by morality...

We have reached the point in Western education where politically leftist approaches to culture have become institutionally sanctioned, unquestioningly normative, and zealously guarded: They alone offer students a legitimate position from which to analyze and critique culture...

Relativism And Reality A Contemporary Education:

Unfolding Social Constructionism Fiona J. Hibberd, 2006-11-24 For more than half of the 20 century psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social. In the late 1960s a reaction to that neglect brought about a crisis in social psychology. This crisis did not affect all social psychologists; some remained seemingly oblivious to its presence, others dismissed its significance and continued much as before. But in certain quarters the psychological was re-conceptualised as the social and the social was taken to be *sui generis*. Moreover, the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that as social beings our actions vary from occasion to occasion and are for many reasons unrepeatable. There is so it was thought an inherent instability in the phenomena of interest. The nomothetic ideal was said to rest on individualistic cause-effect positivism of the kind which arguably characterised the natural sciences but social psychology so it was said is an historical inquiry and its conclusions are necessarily historically relative. Gergen 1973. Events outside psychology converged to give impetus to the crisis within.

Reality, Spirituality, and Modern Man David R. Hawkins, MD/PHD, 2021-01-12 This is the seventh book in a progressive series based on the revelations of consciousness research. It describes in detail how to discern not only truth from falsehood but also the illusion of appearance from the actual core of reality. The text explains how to differentiate perception from essence and thereby enables the reader to resolve the ambiguities and classical riddles that have challenged mankind for centuries and baffled the best minds in history. While modern technologies have provided a plethora of new toys and conveniences, the basic problems of daily existence remain. This book provides the tools to survive and regain fundamental autonomy and inner harmony while living with the complexities of the modern world.

Reality, Spirituality and Modern Man David R. Hawkins, 2008 This text describes in detail how to discern not only truth from falsehood but also the illusion of appearance from the actual core of inner reality. It explains how to differentiate perception from essence and enables the reader to resolve the ambiguities and classical riddles that have challenged mankind for centuries.

Philosophy of Education Joseph James Chambliss, 1996 First

Published in 1996 Routledge is an imprint of Taylor Francis an informa company The Social Reality of Ethics John H. Barnsley,2020-07-20 Originally published in 1972 this book clarifies ethical concepts such as values norms and precepts It begins with a discussion of the conceptual problems faced by any inquiry into moral codes The author looks in particular at the numerous ways of specifying the moral component in human affairs and at the need for a definition appropriate to the requirements of social research He then examines these questions from amore empirical viewpoint and emphasis is put on the interplay between concepts and methods in social research The important issues of ethical relativism and its relation to sociological inquiry is also raised In this way some of the possible ethical implications of sociology itself both as an empirical discipline and as an organizing perspective are critically examined **Education and Its Discontents** Mark Moss,2012 Education and Its Discontents Teaching the Humanities and the Importance of a Liberal Education in the Age of Mass Information by Mark Moss is an exploration of how the traditional educational environment particularly in the post secondary world is changing as a consequence of the influx of new technology Students come to the classroom or lecture hall expecting to have their habits and tastes gleaned from the online world replicated in an Educational environment Faculty who do not adapt face enormous obstacles and faculty that do adapt run the risk of eroding the integrity of what they have been trained to teach Students now have access to myriad of technologies that instead of supplementing the educational process have actually taken it over Issues that run from plagiarism to the erosion of the humanities are now rampant concerns in the post secondary world Behavior issues YouTube videos cell phones and the incessant clicking of the computer keys are just a few of the technologies altering the educational landscape Moss discusses that it is now not only how we learn but what we continue to teach and how that enormously important legacy is protected Education and Its Discontents Teaching the Humanities and the Importance of a Liberal Education in the Age of Mass Information by Mark Moss argues that education has changed and the supremacy of the book and the lecture is now open for debate What has been gained over the last five hundred years is now susceptible to the vagaries of technology which compel us to question their continuing relevance

Religion, Education and Post-Modernity Andrew Wright,2003-12-16 This book the first to explore religious education and post modernity in depth sets out to provide a much needed examination of the problems and possibilities post modernity raises for religious education At once a general introduction to this topic and a distinctive contribution to the debate in its own right Religion Education and Post modernity explores and illuminates the problems and possibilities opened up for religious education by postmodern thought and culture The book describes the emergence of post modernity considers the impact of post modernity on religion addresses its impact on the philosophy of religion and considers the nature of religious education in the post modern world Andrew Wright argues that although post modernity has much to offer the religious educator there are also many pitfalls and dangers to be avoided Steering clear of the extreme of post modern hyper realism he constructs a religious pedagogy sensitive to post modern concerns for alterity difference and the voice of the Other whilst

insisting on the importance of reasons in cultivating religious literacy Reality By Design Joseph Petraglia,1998-02 An essential resource for understanding cutting edge developments in contemporary education Using real life examples of educational technology it explains why rhetorical relations must replace cognitive process as the central focus of education

The Social Thought of Emile Durkheim Alexander Riley,2014-02-04 This new volume of the SAGE Social Thinkers series provides a concise introduction to the work life and influences of mile Durkheim one of the informal holy trinity of sociology s founding thinkers along with Weber and Marx The author shows that Durkheim s perspective is arguably the most properly sociological of the three He thought through the nature of society culture and the complex relationship of the individual to the collective in a manner more concentrated and thorough than any of his contemporaries during the period when sociology was emerging as a discipline **Learning, Knowledge and Cultural Context** Linda King,2012-12-06 This special issue of

the International Review of Education includes contri butions on indigenou knowledge the cultural context of learning and on the interplay between the so called traditional and modern ways of educa tion It starts from the assumption that cultures are not static that they are shifting and mutating and that the Western need to encapsulate other cultures which found its most extreme form in their being frozen in time and boxed behind glass in museums of ethnology has distorted our under standing of the way in which different cultures create recreate and repro duce knowledge The basic premise of this position is that there is no such thing as a pure culture and that all cultures borrow lend adapt and distort distinct elements from other cultures All cultures moreover provide their members with ways of learning about that culture which include elements such as language forms of social organisation and ritual spaces for the trans mission of specialised knowledge Meaning may be shifted over time but that in itself is a product of the passage of knowledge through history Indeed much meaning is cyclical and reinterpretive so that cultures may look back to a mythological past which they assumed gave them their essential identity but which may be part fact part fantasy and part fiction This is then rein terpreted in the light of changed and changing historical circumstances Ethical Issues in Modern Medicine: Contemporary Readings in Bioethics Bonnie

Steinbock,Alex John London,John Arras,2012-03-29 No Place for Truth David F. Wells,1994-12-20 Has something indeed happened to evangelical theology and to evangelical churches According to David Wells the evidence indicates that evangelical pastors have abandoned their traditional role as ministers of the Word to become therapists and managers of the small enterprises we call churches Along with their parishioners they have abandoned genuine Christianity and biblical truth in favor of the sort of inner directed experiential religion that now pervades Western society Specifically Wells explores the wholesale disappearance of theology in the church the academy and modern culture Western culture as a whole argues Wells has been transformed by modernity and the church has simply gone with the flow The new environment in which we live with its huge cities triumphant capitalism invasive technology and pervasive amusements has vanquished and homogenized the entire world While the modern world has produced astonishing abundance it has also taken a toll on the human spirit

emptying it of enduring meaning and morality Seeking respite from the acids of modernity people today have increasingly turned to religions and therapies centered on the self And whether consciously or not evangelicals have taken the same path refashioning their faith into a religion of the self They have been coopted by modernity have sold their soul for a mess of pottage According to Wells they have lost the truth that God stands outside all human experience that he still summons sinners to repentance and belief regardless of their self image and that he calls his church to stand fast in his truth against the blandishments of a godless world The first of three volumes meant to encourage renewal in evangelical theology the other two to be written by Cornelius Plantinga Jr and Mark Noll No Place for Truth is a contemporary jeremiad a clarion call to all evangelicals to note well what a pass they have come to in capitulating to modernity what a risk they are running by abandoning historic orthodoxy It is provocative reading for scholars ministers seminary students and all theologically concerned individuals
